TIMECODEDIALOGUE

START TIMECODE 00.00.00 AT FIRST FRAME OF PICTURE

00.20.05           TECHNICIAN (VO FILTERED)-Incoming traveler! Incoming traveler! (Unintelligible) activation! Closing the iris.

00.30.15           GENERAL HAMMOND-There's no one scheduled to come back for twenty four hours. Who is it?

00.33.20           TECHNICIAN (OS)-SG-1's remote access code, sir.

00.36.04           GENERAL HAMMOND-What? They just went through.

00.38.06           TECHNICIAN-Opening the...

00.38.19           TECHNICIAN (OS CONT)-iris. Stand by!

00.42.06           MALE VOICE (OS)-Iris open.

00.46.26           TECHNICIAN (OS)-Sir, the gate is drawing twice the power as normal, and it's increasing.

01.03.02           TECHNICIAN (OS)-System overload, sir.

01.07.26           TECHNICIAN (CONT)-The wormhole has disengaged.

01.09.16 GENERAL HAMMOND-Get a medical team in here now. Teal'c, are you alright?

01.15.09 TEAL'C-I am.

01.16.16 GENERAL HAMMOND-Where are Colonel O'Neill and Captain Carter?

01.23.04 TEAL'C-They could not have been more than two minutes behind. I do not know.

03.27.14 GENERAL HAMMOND (OS)-Doctor Jackson's still unconscious, but Dr. Warner thinks he'll be alright.

03.31.20 GENERAL HAMMOND (CONT)-I need to know what went on back there, Teal'c.

03.34.14 TEAL'C-We were under fire. Distant. Energy weapons of some kind. Possibly Goa'uld technology.

03.41.23 GENERAL HAMMOND-So it's possible Colonel O'Neill and Captain Carter were struck by enemy fire.

03.45.02 TEAL'C-I do not believe so. They were but a few meters behind me as we passed...

03.48.25 TEAL'C (OS CONT)-through the stargate.

03.51.04 GENERAL HAMMOND-How many hostiles were there?

03.52.11 TEAL'C-They were some distance away, but we appeared to be surrounded.

03.56.17 TEAL'C (OS CONT)-We were there only moments.

03.57.23 TEAL'C (CONT)-Colonel O'Neill ordered us to lay down cover fire while Daniel Jackson dialed home.

04.02.20 TEAL'C (OS CONT)-General Hammond,...

04.03.24 TEAL'C (CONT)-I believe they should have made it through the gate. I do not understand why they did not.

04.12.27 TECHNICIAN-Preliminary report on the Stargate repairs, sir.

04.15.28 TEAL'C-Repairs?

04.16.27 GENERAL HAMMOND-There was some kind of overload during transit. We don't know why.

04.19.11 TEAL'C-I must return immediately.

04.20.26 GENERAL HAMMOND-Not with an army waiting on the other side.  
Sorry.

04.28.13 TEAL'C-General Hammond, I suggest a second probe be sent through.

04.31.26 GENERAL HAMMOND-As soon as the stargate is working again we'll do just that.

04.37.22 O'NEILL (OS)-Oh, God. Ah!

04.44.22 SAMANTHA-Colonel!

04.45.05 O'NEILL-Ah!

04.46.10 SAMANTHA-Oh, thank God.

04.48.28 O'NEILL-Carter --

04.49.26 SAMANTHA-Yeah, uh, try to stay put, sir.

04.51.14 SAMANTHA (OS CONT)-I think your leg's broken.

04.53.00 O'NEILL-No, my leg's definitely broken. What's the bad news?  
'Cause unless they've redecorated the gate room, I don't  
think we're in Kansas anymore.

05.06.02 SAMANTHA-Daniel must've misdialed.

05.10.06 O'NEILL-Misdialed? You mean this place is a wrong number?  
For cryin' out loud. Where is he?

05.22.09 SAMANTHA-He's not here, sir. Neither is Teal'c.

05.24.24 O'NEILL-No, he has to be.

05.26.09 SAMANTHA-Here -- I tried that. You've been unconscious for nearly two hours.

05.32.20 O'NEILL-They came through the gate before we did.

05.35.09 SAMANTHA-I know that. I also know that we're alone here. Wherever here is.

05.43.06 O'NEILL-Ice. Nice.

05.47.12 SAMANTHA (OS)-Yeah.

05.48.22 SAMANTHA (CONT)-I think we're inside a deep crevasse of a glacier. If their stargate's been overrun by ice, possibly on a planet in the middle of an ice age. Now,...

05.56.20 SAMANTHA (OS CONT)-there is some light filtering through up there,...

05.59.15 SAMANTHA (CONT)-and there are some fissures in the ice, but all of the are too narrow to follow very far. We're in trouble, sir.

06.07.15 O'NEILL-Oh, nonsense. We'll just dial home, straighten all this out. Where's the DHD?

06.21.22 SAMANTHA-Can't find that either.

06.25.12 O'NEILL-Oh. So, uh, we're in trouble.

06.32.27 SAMANTHA-We're in trouble.

06.49.07 TECHNICIAN-We've almost replaced all the superconductive interface elements, sir. The old ones all melted. It's gonna take some time to load test them, though.

06.56.20 GENERAL HAMMOND-Just tell me the minute we can send a probe through.

07.00.00 SILER-That'll be twenty four hours, General. Minimum.

07.02.11 TEAL'C-Captain Carter and Colonel O'Neill do not have that long.

07.04.20 GENERAL HAMMOND-I'll give you half that.

07.06.01 SILER-No, sir. It doesn't work that way. Twenty four hours is the best I can do.

07.10.13 GENERAL HAMMOND-Then you'd better get back to it.

07.11.19 SILER-Yes, sir. C'mon, let's go.

07.17.00 O'NEILL (OS)-Agh! O-o-oh God. Agh!

07.24.28 SAMANTHA (OS)-Okay. I, I think it's set.

07.27.18 O'NEILL-You think it's set?

07.29.09 SAMANTHA (OS)-I'm positive.

07.30.10 SAMANTHA (CONT)-All we have to do is put a splint on it and  
you'll be as good as new.

07.32.23 O'NEILL-Agh! Just take it easy, doctor.

07.35.10 SAMANTHA-Wrong kind'a doctor, I'm afraid.

07.38.05 O'NEILL-You wouldn't think jagged bones digging into raw  
nerves would hurt, but it does.

07.42.05 SAMANTHA-Sorry, sir, but I've never done this before in my  
life.

07.45.25 SAMANTHA (OS CONT)-Is this your first broken bone?

07.47.08 O'NEILL-Uh, uh, no. This, this would be, uh-uh-uh, nine. If  
you count skull fractures.

07.58.23 SAMANTHA-How'd you manage that?

08.00.04 O'NEILL-A little parachuting mishap over the borders of Iran  
and Iraq back in eighty...

08.08.07 O'NEILL (OS CONT)-agh!

08.10.10 SAMANTHA-Okay, this is gonna hurt, sir.

08.12.28 O'NEILL (OS)-Agh!

08.13.15 O'NEILL (CONT)-I know, I know, I know, I know.

08.18.07 SAMANTHA-So, what happened?

08.20.00 O'NEILL-I hit the ground. Go figure. Ah!

08.26.10 O'NEILL (OS CONT)-Gagh!

08.27.13 O'NEILL (CONT)-Ugh! My chute opened a little late. And it  
hurt just like that.

08.36.20 SAMANTHA-I'm sorry, Colonel, I'm doing the best I can.

08.38.14 O'NEILL-I know you are Captain. Can you just be done?

08.41.20 SAMANTHA-So you hit the ground and --

08.43.11 O'NEILL-And they all lived happily ever after.

08.45.27 SAMANTHA-Almost there, almost --

08.46.23 O'NEILL-No, you're there, Captain, you're there.

08.48.08 O'NEILL (OS CONT)-That's a great splint.

08.49.18 O'NEILL (CONT)-Stop!

08.51.00 O'NEILL (OS CONT)-Stop.

08.53.21 SAMANTHA (OS)-So,...

08.55.27 SAMANTHA (CONT)-how long before you were rescued?

08.58.09 O'NEILL-No rescue.

09.02.00 O'NEILL (OS CONT)-Wasn't exactly...

09.04.24 O'NEILL (CONT)-an official mission. If you know what I mean?

09.09.28 O'NEILL (OS CONT)-So, uh...

09.11.29 O'NEILL (CONT)-I had to make it out on my own. Nine days.

09.19.25 SAMANTHA-Wow. What got you through it?

09.24.11 O'NEILL-Sara.

09.27.16 SAMANTHA-Your wife.

09.29.23 O'NEILL-At the time. I had to see her again.

09.42.02 You tallied our supplies, yet?

09.43.26 SAMANTHA (OS)-Yes, sir.

09.45.10 SAMANTHA (CONT)-Supplies for three days, but we can stretch that. We've got a little drinking water, but --

09.53.26 O'NEILL-Ice melts.

09.54.11 SAMANTHA (OS OVERLAPPING)-Yeah.

09.55.13 SAMANTHA (CONT) -And we've got our field cooking gear to melt  
it. Flashlight batteries are gonna be a problem.

10.01.00 SAMANTHA (OS CONT) -We've got thermal blankets.

10.03.08 O'NEILL -That's good.

10.06.04 O'NEILL (OS CONT) -By the way, Captain.

10.09.24 O'NEILL (CONT) -We are gonna get outta here. That's an order.

10.16.12 SAMANTHA -How's the, the splint feel?

10.17.17 O'NEILL -Captain. You have to believe me.

10.25.14 SAMANTHA -I want to, sir. I just don't see how.

10.30.11 O'NEILL -Then we better start lookin' for a way.

10.33.16 O'NEILL (OS CONT) -Because...

10.34.21 O'NEILL (CONT) -I'll be damned if I'm gonna die on some god-  
forsaken block of ice a million light years from home.  
Is that clear?

10.40.29 SAMANTHA -Yes, sir.

10.41.27 O'NEILL (OS) -Good.

10.43.06 O'NEILL (CONT) -Now help me up.

10.44.08 SAMANTHA -Uh, I, I don't, I don't think you should move.

0.47.06 O'NEILL (OS) -Probably not,...

10.49.01 O'NEILL (CONT) -but my butt's freezin' to the ground. C'mon.

10.51.15 SAMANTHA -Yes sir.

10.54.27 O'NEILL (OS CONT) -Oh... Ah...

11.01.02 O'NEILL (CONT) -There. Ah. A little paint, a couple  
windows,...maybe a fireplace in the corner -- be just  
like home.

11.31.15 DANIEL -Teal'c?

11.33.02 TEAL'C (OS) -The stargate has malfunctioned.

11.35.06 TEAL'C (CONT) -We came back through the gate at too great a  
velocity.

11.41.05 DANIEL (OS) -Jack and Sam?

11.42.25 TEAL'C -They did not follow.

11.44.14 DANIEL -Yes they did.

11.47.15 DANIEL (OS CONT) -I know they did.

11.50.28 DANIEL (CONT) -They were right behind us. That doesn't make  
any sense.

11.53.18           TEAL'C-I concur. In a few hours a probe will be sent back in  
                  an attempt to determine their fate.

12.09.00           O'NEILL (OS)-We might be able to climb outta here. You  
                  might, anyway.

12.14.18           SAMANTHA (OS)-What?

12.17.07           O'NEILL-I said you might be able to climb outta here.

12.23.23           SAMANTHA-Colonel! I found it!

12.28.10           O'NEILL (OS)-Found what?

12.30.23           SAMANTHA-The DHD. I figure the glacial flow must have  
                  separated the stargate...

12.37.26           SAMANTHA (OS CONT)-from it's dial home device, but it looks  
                  like it might be intact.

12.45.07           O'NEILL (OS)-God... Aw!

12.47.27           SAMANTHA-Look.

12.49.08           O'NEILL (OS)-God! Oh.

13.00.02           O'NEILL (CONT)-Can we dig it out?

13.01.07           SAMANTHA (OS)-Even if it...

13.01.18 SAMANTHA (CONT)-doesn't work, we can use the chopped ice to  
melt drinking water.

13.11.21 What's wrong with your chest?

13.14.15 O'NEILL-I think I cracked a rib, too.

13.16.14 SAMANTHA-Why didn't you say something?

13.17.25 O'NEILL-I was afraid you'd try to put a splint on it.

13.21.03 O'NEILL (OS CONT)-I'll be fine.

13.27.20 SAMANTHA-I've been thinking where Daniel and Teal'c might be.

13.30.25 O'NEILL (OS)-Yeah?

13.33.24 SAMANTHA-So far I count three possible explanations.

13.36.28 SAMANTHA (OS CONT)-One -- Daniel misdialled and their here --  
Somewhere we haven't found.

13.43.14 O'NEILL-I don't see 'em.

13.44.09 SAMANTHA-Right. Two -- Daniel didn't misdial, but for some  
reason the stargate malfunctioned during transit --  
don't ask me how, I...

13.53.14 SAMANTHA (OS CONT)-haven't' figured that part out yet.

3.56.03 SAMANTHA (CONT)-Anyway, they got sent back to Earth, but for some reason we got sent here.

14.02.24 O'NEILL-What's three?

14.04.00 SAMANTHA-Three -- the stargate malfunctioned -- we got sent to this planet, Daniel and Teal'c got sent to another one.

14.12.01 O'NEILL-What's four?

14.13.15 SAMANTHA-There is no four.

4.14.16 O'NEILL-It's after three.

14.15.25 SAMANTHA-Not this time, Colonel.

14.19.00 O'NEILL-Alright. We'll assume they made it back to Earth. They'll start sending search parties.

14.29.08 SAMANTHA-To where?

14.30.21 O'NEILL-Here. I hope.

13.34.04 SAMANTHA-Where would they begin? They have no idea where we are.

14.37.00 SAMANTHA (OS CONT)-With all the possible stargates,...

4.38.16 SAMANTHA (CONT)-a random search could easily take...ten  
years.

14.41.21 O'NEILL-Not if they look here first.

14.43.10 SAMANTHA-Eh -- even if all SG teams...

14.46.00 SAMANTHA (OS CONT)-started searching right now,...

14.47.24 SAMANTHA (CONT)-the mathematical probability of them even --

14.49.23 O'NEILL (INTERRUPTING)-Captain!

14.56.04 SAMANTHA-I think too much.

5.05.24 SILER (OS)-Charging circuit MX-43 at twenty percent.

15.12.15 FEMALE TECHNICIAN (OS)-Twenty percent, sir.

15.13.18 MALE VOICE (VO)-Check your transport status.

15.15.07 SILER-One hundred.

15.18.27 SILER (OS CONT)-Circuit is holding. Reset and stand by.

15.22.03 SILER (CONT)-She's all yours, General.

15.24.07 GENERAL HAMMOND-Well done, Sergeant. You heard the man.

15.26.03 TECHNICIAN-Yes, sir.

15.37.00           TECHNICIAN (OS CONT)-Chevron one, encoded!

15.38.28           TEAL'C-SG-3 and I are ready and awaiting your orders,...

15.40.26           TEAL'C (OS CONT)-General.

15.41.28           GENERAL HAMMOND-I won't authorize this rescue mission unless  
                  the probe sends back the right...

15.45.03           GENERAL HAMMOND (OS CONT)-pictures, Teal'c.

15.46.17           TECHNICIAN (OS)-Chevron Two, encoded.

15.48.00           GENERAL HAMMOND (INTO MICROPHONE)-All defense teams, stay  
                  alert!

15.45.22           GENERAL HAMMOND (OS CONT)-These hostiles may have both our  
                  addresses...

15.52.04           GENERAL HAMMOND (CONT)-and our transmitter code.

15.54.13           TECHNICIAN-Chevron Three encoded.

15.56.04           DANIEL-You don't actually think they'd give up the  
                  transmitter code to the enemy, do you?

15.58.27           GENERAL HAMMOND-Not willingly, no.

16.01.02           TECHNICIAN (OS)-Chevron Four, encoded.

16.02.06           TEAL'C (OS)-I do...

6.02.13 TEAL'C (CONT) -not believe they would do so.

16.04.07 TEAL'C (OS CONT) -Even under the duress of torture.

16.06.00 TECHNICIAN (OS) -Chevron Five encoded.

16.07.26 GENERAL HAMMOND-Teal'c, in the event we find no enemy  
activity on the other side, you will co-ordinate with  
Major Castleman on the rescue mission.

16.13.02 TECHNICIAN (OS) -Chevron Six encoded.

16.14.10 TEAL'C-I understand.

6.21.06 TECHNICIAN (OS) -Chevron Seven is...

16.22.07 TECHNICIAN (CONT) -locked.

16.33.14 The probe should reach the stargate...

16.34.27 TECHNICIAN (OS CONT) -of P-four-H-seven-seven-one in five  
seconds. Four...three...two...one...

16.41.20 TECHNICIAN (CONT) -now!

16.51.06 DANIEL (OS) -No sign of Jack or Sam,...

16.52.13 DANIEL (CONT) -but no evidence they got into a fire fight  
either.

16.57.19 GENERAL HAMMOND-They were waiting for us. .

6.58.23 GENERAL HAMMOND (OS CONT) -Close the iris. Disengage the  
stargate.

17.03.02 GENERAL HAMMOND (CONT INTO MICROPHONE) -SG-3 stand down.  
(CONT) The rescue mission is scrubbed.

17.08.21 DANIEL-General --

17.23.29 O'NEILL-Soup's on.

17.25.19 SAMANTHA-Just a little more. I'm...

17.26.07 SAMANTHA (OS CONT) -almost through.

17.27.22 O'NEILL-C'mon now, you don't want it to get cold. Ah!

17.42.01 SAMANTHA-Ah, I didn't know you could cook.

17.46.00 O'NEILL-I can't, but my melted ice is to die for.

17.51.27 SAMANTHA-Thank you. Sir, maybe I should have another look at  
you?

18.00.03 O'NEILL-No, I'm fine. Eat.

18.06.08 SAMANTHA-I've been, uh, thinking about how the stargate  
might've malfunctioned.

18.10.12 O'NEILL-Yeah?

18.11.20 SAMANTHA (OS)-Well, we don't totally understand how it works,...

18.15.28 SAMANTHA (CONT)-but the theory we have so far is that the gate creates an artificial wormhole that somehow transfers and energized matter stream in one direction...

18.23.18 SAMANTHA (OS CONT)-along an extra-dimensional conduit. I think the matter stream between stargates got re-directed.

18.29.11 SAMANTHA (CONT)-Kind of like a, a lightning bolt jumping from one point to another in mid strike.

18.34.07 SAMANTHA (OS CONT)-Now, I figure it had to have been the attack on P-four-A-seven-seven-one.

18.39.19 SAMANTHA (CONT)-The gate itself was probably struck by enough energy during the firefight to influence the direction of the matter stream...

18.45.06 SAMANTHA (OS CONT)-before we reached the other side.

18.50.22 SAMANTHA (CONT)-Colonel?

18.54.20 O'NEILL-I'm sorry, I wasn't listening.

18.58.14 SAMANTHA-What I'm saying is, we must've emerged through a stargate relatively close to Earth in the gate network.

19.04.29 SAMANTHA (OS CONT)-Somewhere between P-four-A-seven-seven-one and Earth. Now, if the SG...

9.09.08 SAMANTHA (CONT) -rescue team's reach the same conclusion, it could significantly narrow their search.

19.14.20 O'NEILL-That's good news.

19.15.14 SAMANTHA (OS) -Yeah.

19.22.14 DANIEL-Okay, so if they are not there...and they are not here--

19.30.22 TEAL'C-It is possible they may have perished within the wormhole.

9.36.00 DANIEL-Yeah. In which case they're gone, I know. I thought of that. But if they are alive... If there's the least remote possibility that this malfunction sent them to a different stargate --

19.51.11 TEAL'C-Was it not Captain Carter who deduced the possible combination of stargate symbols numbered in the millions.

19.58.27 DANIEL-Yeah. Well, we have to narrow it down.

20.23.16 SAMANTHA-Whoa. Colonel,...

20.36.00 SAMANTHA (OS CONT) -Serpent guard.

0.38.29 O'NEILL-Yeah.

20.43.20 SAMANTHA-I guess he didn't make it.

20.46.01 O'NEILL-Ya think?

20.50.06 DANIEL-Okay, this is P-four-A-seven-seven-one. This is  
Earth. Now, the stargate...

20.54.24 DANIEL (OS CONT)-shut itself down just after Teal'c and I  
came through.

20.57.23 GENERAL HAMMOND-There was an energy surge --

1.00.20 DANIEL-Right. But what would that have done to the wormhole  
itself?

21.04.11 SILER-I have no idea.

21.05.17 DANIEL (OS)-Could it just disappear?

21.06.28 SILER-No, I don't think so, sir. It would have to discharge  
somewhere.

21.10.04 DANIEL-Like...another stargate?

21.13.11 SILER-Yeah, maybe. Sir, it's all theoretical, but we think  
Stargates are basically giant superconductors.

- 21.21.08 SILER (OS CONT)-Charged matter streams along lines of force between them.
- 21.24.10 DANIEL-Positive to negative. Like electricity, right?
- 21.26.15 SILER (OS)-Except...
- 21.26.27 SILER (CONT)-for the fact that the whole trip happens outside our dimension, yeah -- more or less.
- 21.31.14 DANIEL (OS)-Okay.
- 21.32.03 DANIEL (CONT)-What if it jumped? Redirected itself...here.
- 21.37.25 DANIEL (OS CONT)-Or here.
- 21.38.23 DANIEL (CONT)-Or anywhere along here.
- 21.42.19 GENERAL HAMMOND-You're suggesting we search all these worlds?
- 21.45.02 DANIEL-Well, at least we've narrowed an entire galaxy down to a handful of possibilities.
- 21.49.20 GENERAL HAMMOND-Assuming you're right, why haven't they used that stargate to come back on their own?
- 21.54.17 DANIEL-Teal'c and I were flung out of this gate at this end so fast I don't even remember hitting the ramp. Now they could be badly hurt, in which case we will not have to search...
- 22.01.00 DANIEL (OS CONT)-far from the stargates themselves.

22.03.19 DANIEL (CONT)-I think we owe it to them to try.

22.13.16 O'NEILL (OS)-You ID'd the seventh symbol yet?

22.16.01 SAMANTHA-Yeah.

22.17.27 SAMANTHA (OS CONT)-This one has to be the point of origin.

22.20.06 SAMANTHA (CONT)-I've never seen it before.

22.25.07 SAMANTHA (OS CONT)-Oh, no. Batteries.

22.29.11 SAMANTHA (CONT)-It's now or never.

22.30.25 O'NEILL-I've always preferred now...to never.

22.40.25 SAMANTHA-Here goes.

23.15.16 SAMANTHA-Damn it! Damn!

23.23.16 O'NEILL-Did you dial the right address?

23.25.18 SAMANTHA-Yes.

23.28.22 SAMANTHA (OS CONT)-It has to something...

23.29.16 SAMANTHA (CONT)-as simple as the control interface. If we  
can just dig down to the panel on the DHD I can fix it.

23.36.10 O'NEILL-Negative.

23.37.11 SAMANTHA-Sir, we gotta keep trying.

3.39.15 O'NEILL-Of course we do. But we've been awake for a very long time. It'll be there in the morning.

23.53.01 O'NEILL (OS CONT)-God.

23.55.09 SAMANTHA-What about you?

23.57.29 O'NEILL-I told you we're gonna get outta here. It's just gonna take longer than we thought.

24.06.05 SAMANTHA-Yes sir.

24.09.24 O'NEILL-Captain.

4.13.28 SAMANTHA-Yes, sir.

24.31.08 GENERAL HAMMOND (OS)-Dr. Jackson.

24.35.15 DANIEL (OS)-We just received probe telemetry from P-five-C-eleven...

24.38.05 DANIEL (CONT)-and twelve. Neither of them have a breathable atmosphere anymore. If they ever did.

24.43.09 GENERAL HAMMOND-I've formally reported Colonel O'Neill and Captain Carter as missing in action.

24.49.05 DANIEL-Why?

4.50.16 GENERAL HAMMOND (OS)-Missing...

24.50.26 GENERAL HAMMOND (CONT)-in action doesn't mean we stop  
looking, son.

24.58.00 DANIEL-Missing. I'm missing something.

25.17.15 O'NEILL-Oh, God...Captain, much as I might otherwise think  
this is nice --

25.36.01 SAMANTHA (OS)-Shh! Try to sleep.

25.39.22 O'NEILL-Is that what we're doing?

5.42.29 SAMANTHA (OS)-You're exhausted, you passed out. I just  
thought we had to combine body heat or we wouldn't make  
it through the night.

25.50.18 O'NEILL-That's fine. It's just...very hard to sleep with  
broken ribs when someone's lying on you.

26.02.03 SAMANTHA (OS)-Sorry.

26.02.19 O'NEILL-Ah! Ah!

26.03.05 SAMANTHA (OS OVERLAPPING)-Sorry, sorry.

26.07.17 O'NEILL-That's...that's...that's better. (Unintelligible)

26.13.25 SAMANTHA-We'll sleep for a few hours, then I'll fix the DHD.

26.18.04 O'NEILL-Okay..G'night.

26.21.27 SAMANTHA-G'night.

26.29.13 Um, Colonel.

26.32.28 O'NEILL-It's my sidearm, I swear. No giggling. Please.

26.47.09 SAMANTHA (OS)-If we don't make it, I won't have any regrets.  
You?

26.56.23 O'NEILL (OS)-I'd regret...dying.

27.53.16 SAMANTHA (OS)-God, why won't you work?

27.58.03 O'NEILL (INTO WALKIE TALKIE)-Carter. Carter.

28.02.06 SAMANTHA (INTO WALKIE TALKIE)-Colonel?

28.07.23 SAMANTHA (OS CONT)-Ow!

28.19.02 O'NEILL-I'm us -- I'm usually...the first one up.

28.22.18 SAMANTHA-You're bleeding internally, I don't know how badly.  
You're broken leg may already be frostbitten, I can't  
tell. I've been trying to warm it up with the last of  
our cooking sterno, but that's about had it.

28.37.20 O'NEILL-What's the bad news. Help me up.

28.42.24 SAMANTHA (OS)-No,...

28.43.05 SAMANTHA (CONT)-sir, you need to heal. That's an order.

28.48.00 O'NEILL-I give the orders around here.

28.50.08 SAMANTHA (OS)-Not doctor's orders.

8.57.26 SAMANTHA (CONT)-I want you to drink as much of this as you  
can. Once that sterno dies we won't be able to thaw  
anymore.

29.14.08 We should'a gotten you outta here by now. I'm sorry.

29.19.10 O'NEILL-You will. You will.

29.26.17 SAMANTHA-I've been working on the control panel for the last  
twelve hours. It just...I don't know why it won't work.  
It should work. I'm missing something.

29.43.06 O'NEILL-Captain.

29.44.09 SAMANTHA (OS)-Sir?

29.47.16 O'NEILL-It's time to go to plan "B".

29.51.20 SAMANTHA-What would plan "B" be?

29.54.11 O'NEILL-You, you take the rest of the supplies and you climb  
out of here.

30.03.17 O'NEILL (OS CONT)-Take your chances up on the planet.

30.08.09 O'NEILL (CONT)-Head towards daylight.

30.11.04 SAMANTHA-If I can't get that stargate to work, we will both  
go.

30.17.08 O'NEILL-Right. I'll race ya.

30.22.07 O'NEILL (OS CONT)-Alright, Captain.

30.24.09 O'NEILL (CONT)-Make it work.

30.27.12 SAMANTHA-Yes sir.

30.46.10 TEAL'C-Major Castleman requires medical attention.

30.49.24 TECHNICIAN (INTO MICROPHONE)-Medical team to the embarkation  
room. (CONT) Put the iris on save.

30.57.28 GENERAL HAMMOND-What happened?

30.59.12 TEAL'C-We were exploring a cave several meters from the stargate. He fell several meters from the rock ledge. There was no sign of Captain Carter or Colonel O'Neill.

31.09.00 GENERAL HAMMOND-Are you alright?

31.10.23 TEAL'C-I am ready to embark again.

31.15.05 GENERAL HAMMOND-I'm calling the search off.

31.17.05 DANIEL-What?

31.17.26 GENERAL HAMMOND-This was the last of the planets that fit your theory, Doctor.

31.20.24 DANIEL-It, it, it's been what, a few days? What if we stopped just short...

31.24.11 DANIEL (OS CONT)-of finding them?

31.25.03 GENERAL HAMMOND-I'm sorry.

31.26.06 GENERAL HAMMOND (OS CONT)-I cannot devote the resources of this command, risking more lives in the process, searching an entire galaxy.

31.33.24 SAMANTHA-Okay. The energy converters are intact. Oh, God, reset! Reset! Why didn't I think? Colonel, I'm gonna interrupt the power.

1.49.27 SAMANTHA (OS CONT)-I'm gonna shut it all off and turn it on  
again.

31.54.22 SAMANTHA (CONT)-Okay, this could work. This could work.

32.17.28 Okay. Okay.

33.04.27 SAMANTHA-Work! Work!

33.11.12 TEAL'C (OS)-Daniel Jackson.

33.13.19 DANIEL-Teal'c, did you see that?

33.24.23 TEAL'C-Why are you here?

3.27.05 DANIEL-I couldn't sleep. I was thinking I must be missing  
something and now I just realized...we ruled out a world  
we shouldn't have.

33.42.23 O'NEILL-I guess it didn't work.

33.46.29 SAMANTHA-I'm sorry.

33.52.07 O'NEILL-Not your fault.

33.55.14 SAMANTHA (OS)-I don't understand why it won't work.

34.01.12 O'NEILL-Captain. Plan "B". Go.

34.10.00 SAMANTHA-No sir.

34.11.17 O'NEILL (OS)-Sam,...

34.15.07 O'NEILL (CONT)-I'm dying. Follow my order. Please.

34.25.15 SAMANTHA-Sorry.

34.28.05 O'NEILL-Please.

34.33.02 SAMANTHA-Yes, sir.

35.16.11 DANIEL (VO)-How many Earth based cultures...

35.17.16 DANIEL (OS CONT)-have we encountered...

5.18.19 DANIEL (CONT)-from other worlds from periods both before and  
after we think the stargate was buried?

35.22.25 GENERAL HAMMOND-Several, I take it.

35.23.20 DANIEL-Right. And we've really only scratched the surface.  
Now, so far we've tried to account for these  
discrepancies with various theories of parallel or  
accelerated --

35.29.17 GENERAL HAMMOND (INTERRUPTING)-What's your point, Doctor?

35.34.20 DANIEL-What if there's a second stargate here?

35.39.03 DANIEL (OS CONT)-What if this energy surge caused the  
wormhole...

35.41.02 DANIEL (CONT)-to jump from one stargate to another...

35.43.18 DANIEL (OS CONT)-here?

35.45.22 GENERAL HAMMOND-On Earth?

35.47.00 DANIEL-Yes.

35.49.07 GENERAL HAMMOND-Teal'c,...

35.50.00 GENERAL HAMMOND (OS CONT)-would the goa'uld have put more  
than one stargate on a planet?

5.52.17 TEAL'C-If the first became lost to them. It is possible.

35.56.19 DANIEL (OS)-But remember,...

35.57.06 DANIEL (CONT)-the one that Ra put here might not have been  
the first. The goa'uld didn't build the stargate...

36.01.03 DANIEL (OS CONT)-system.

36.01.28 GENERAL HAMMOND-Then where is it?

36.12.16 SAMANTHA (INTO WALKIE TALKIE)-Colonel, I can't see the  
surface yet. It looks like it just keeps going up.

36.19.07 O'NEILL (INTO WALKIE TALKIE)-Sam.

- 36.21.04 SAMANTHA (INTO WALKIE TALKIE)-Yes sir?
- 36.24.26 O'NEILL (VO FILTERED)-It was an honor serving with you.
- 36.24.13 SAMANTHA (INTO WALKIE TALKIE)-Yes sir.
- 36.43.02 DANIEL-It would have to be in a remote location, otherwise it would've been discover by now. It could've even been buried until recently,...
- 36.47.16 DANIEL (OS CONT)-otherwise the goa'uld would've continued to use it.
- 36.50.10 TEAL'C-Let us hope it is not still buried.
- 36.52.27 GENERAL HAMMOND-We're looking for radio transmissions on SG-one's emergency frequency. Coordinate with our military listening posts around the entire globe.
- 36.59.23 DANIEL-General, when we first opened our stargate it used to shake. A lot. I mean, the ground, the whole facility, everything.
- 37.09.02 GENERAL HAMMOND-But since then we've installed frequency dampeners that limit that to only a slight vibration.

37.13.13

DANIEL-Okay, but what if the second gate doesn't have those?  
Would it shake enough to indicate it's location on a  
seismometer?

347.20.24

GENERAL HAMMOND-Damn right it would. Run a search for all  
recent seismic activity worldwide and see if any  
coincide with the time of our stargate malfunction.

37.29.03

DANIEL-And check around four a.m. local time. I was here, I  
thought someone was trying an off world activation, but  
nothing happened. Except for the Chevron's glow and  
there was a slight vibration.

7.38.01

TEAL'C (OS)-Captain Carter and Colonel O'Neill.

37.40.11

DANIEL-What happens when you dial your own phone number?  
Wrong person to ask. What happens when you dial your  
own phone number?

37.45.06

GENERAL HAMMOND-You get a busy signal.

37.46.10

DANIEL-Exactly. What else could cause a vibration like that  
unless they were trying to dial home? They couldn't get  
through. I mean, even if their seventh symbol looked  
different, their coordinates would still be exactly the  
same.

38.04.01 SAMANTHA (VO FILTERED)-Colonel,...

38.05.00 SAMANTHA (CONT INTO WALKIE TALKIE)-I'm almost there. I'm gonna try to bring back help, sir. I want you to hold that thought.

38.52.10 TECHNICIAN (OS)-We got it!

38.53.04 TECHNICIAN (CONT)-Antarctica. The timing of the events is to the second. Including the event Dr. Jackson experience a few hours ago.

38.58.23 GENERAL HAMMOND-Latitude and longitude?

38.59.23 TECHNICIAN-Yes sir! It's only about fifty miles out of McMurdo.

39.03.14 TEAL'C-General, permission to--

39.04.00 GENERAL HAMMOND (OS INTERRUPTING)-Granted!

39.04.18 GENERAL HAMMOND (CONT)-Order McMurdo Station to begin a search of those coordinates now!

39.21.05 SAMANTHA (INTO WALKIE TALKIE)-Colonel. It's an ice planet. That's all there is as far as the eye can see. No chance.

39.54.24 Colonel!

40.04.08 I'm coming down.

0.37.26 SAMANTHA (OS) - Colonel?  
40.53.24 SAMANTHA (CONT) - Colonel?  
40.59.04 O'NEILL - Sam.  
41.10.21 SAMANTHA - I'm here, Jack.  
41.15.18 O'NEILL - Cold. So cold.  
41.19.12 SAMANTHA - I know. It's alright. You can sleep now  
41.42.15 It was an honor to serve with you, too, Colonel.  
42.13.06 DANIEL (VO) - Sam.  
42.15.04 DANIEL (OS CONT) - Sam. C'mon, it's gonna be okay.  
42.19.16 DANIEL (CONT) - You're gonna be okay.  
42.20.18 TEAL'C - As is Colonel O'Neill.  
42.22.15 GENERAL HAMMOND - Let's get them in the chopper.  
42.26.24 SAMANTHA - The Colonel, he's bleeding internally.  
42.29.14 GENERAL HAMMOND - We know, Captain, don't worry. He's...  
42.30.23 GENERAL HAMMOND (OS CONT) - going to be alright.  
42.32.29 SAMANTHA - General, you came through the stargate for us.

2.37.18

GENERAL HAMMOND-Not exactly, Captain. The team from the SGC will be arriving within the hour to secure this area. In the meantime, let's get these people home.

43.01.25

LAST FRAME OF PICTURE.
