STARGATE SG-1

"A Matter of Time"

Episode #8918

Running Time 44.19

CONTINUITY SCRIPT PREPARED BY: CASABLANCA CONTINUITY
ph. (310) 397-7741

TIMECODE

DIALOGUE

START MEASURING 00.00.00 AT FIRST FRAME PICTURE

01.07.13 WATTS (SLOWED DOWN)-Come on! (beat) It's right on top
 of us!

01.19.00 MAJOR BOYD (SLOWED DOWN)-Dial home, Captain! That's an
 order!

01.40.13 WATTS (SLOWED DOWN)-We're not gonna make it, sir!

01.43.21 MAJOR BOYD (SLOWED DOWN)-We'll make it! Dial now!

01.59.13 O'NEILL-Look, I know I should know this by now. I swear,
 it'll be the last time I ask. But these wormholes
 we go through, they're not always there, right?

02.11.16 CARTER-No, sir. They can only form between two open
 gates.

02.15.09 O'NEILL-What's with the worm part? The worm thing...?
 I, I don't get that.

02.21.17 CARTER-That's just a metaphor.

02.24.14 O'NEILL-Right. I knew that.

02.29.20 CARTER-Imagine the galaxy is an apple. We burrow our way through the apple like a worm, crossing from one side to the other, instead of going around the outside.

02.42.09 O'NEILL-Okay.

02.44.12 CARTER-Now, of course the diameter of the apple is just a two-dimensional representation of space/time, and...
CARTER (OS CONT)-well, the hole isn't really a hole per se, but an interdimensional...
CARTER (CONT)-conduit... Colonel?

02.56.12 O'NEILL-Okay... I'll be all right.

03.03.13 CARTER-Okay.

03.09.02 SIMMONS-We've got an unscheduled incoming traveler.

03.15.04 ELECTRONIC FEMALE VOICE (VO FILTERED)-Closing the Iris.

03.21.09 SIMMONS-We're getting a signal.

03.25.02 O'NEILL-Who have we got out there?

03.26.23 SIMMONS-SG teams four, six and ten are the only units presently off-world, sir.

03.31.13 O'NEILL-Daniel's with six, isn't he?

03.32.24 CARTER-Yeah. He's on a dig on PX3-808.

03.35.25 SIMMONS-The computer can't identify the signal. It's not a G.D.O. transmission.

03.39.24 CARTER-Let me hear it, Lieutenant.

03.42.14 SCREEN READS:
ANALYZING
SIGNAL

03.50.02 CARTER-Intermittent RF pulses, low frequency...

03.53.26 GENERAL HAMMOND-What have we got.

03.55.18 O'NEILL-Don't know, sir. Some kind of signal.

03.58.03 CARTER (OS)-There's a repeating pattern.
CARTER (CONT)-Lieutenant, run it through the computer again, and play it a lot faster.

04.04.06 SIMMONS-I'm trying two hundred percent...

04.05.13 SCREEN READS:
 REPROCESSING
 FREQUENCY BOOST 200%

04.09.10 CARTER-Go six...

04.12.18 SCREEN READS:
 SIGNAL
 ANALYZED

04.14.06 SCREEN READS:
 ACCEPT
 SIGNAL
 RECOGNIZED

04.15.19 SIMMONS-The computer now recognizes the signal... as SG-
 10's Iris code.

04.20.00 O'NEILL-That's Henry Boyd's team.

04.24.03 GENERAL HAMMOND-Why would their code be coming through so
 slowly?

04.27.06 CARTER-I have no idea, sir, but if we don't open the
Iris...

04.30.00 O'NEILL-The next thud we hear will be Henry Boyd's team.

04.34.20 GENERAL HAMMOND-Do it.

04.49.00 O'NEILL-C'mon, Hank... the door's open.

05.00.26 GENERAL HAMMOND-What happened?

05.02.04 CARTER-I don't know, sir.

05.03.21 O'NEILL-General... SG-1 would like the rescue mission.

05.07.11 GENERAL HAMMOND-Not yet, Colonel.

05.08.27 O'NEILL-Hank would do the same for us.

05.10.24 GENERAL HAMMOND-I know he would. If and when I gave the
order. In the meantime, I want a probe on the ramp
and ready to go...

GENERAL HAMMOND (OS CONT)-ASAP. Colonel, have units SG-1
and 3 geared up and standing by.

06.37.17 GENERAL HAMMOND (OS)-SG-10 was on a routine
exploratory...

GENERAL HAMMOND (CONT)-mission of P3W-451.

06.41.16 CARTER-It's a binary system. We just discovered it.

06.44.16 TEAL'C-Were there any indications of enemy attack?

06.46.11 GENERAL HAMMOND-None. The one thing Major Boyd's team
reported was that whatever indigenous life there may
have been on 451 recently became extinct. They were
trying to determine the cause. (beat) In the event
I authorize this mission, SG-3 will back you up.

07.04.02 O'NEILL-In the event, sir?

07.06.00 SIMMONS-Chevron three, encoded.

07.07.22 GENERAL HAMMOND-Let's see what pictures the probe sends
back, make a proper threat determination.

07.12.13 O'NEILL-General --

07.13.00 GENERAL HAMMOND (overlapping)-You could gate into an
ambush, for all we know.

07.15.16 O'NEILL-I recommended Major Boyd for this command. Now,
if he's in trouble, I want to go in.

07.20.18 GENERAL HAMMOND-I'm aware of that, Colonel.

07.21.27 SIMMONS (OS)-Chevron four, encoded.

07.23.21 O'NEILL-Yes, sir.

07.30.25 SIMMONS-Chevron five, encoded.

07.32.27 TEAL'C-Major Boyd is a capable warrior, O'Neill. You
trained him well.

07.39.07 O'NEILL-Yeah.

07.43.19 SIMMONS (OS)-Chevron six, encoded.

07.54.13 SIMMONS (OS)-Chevron...
SIMMONS (CONT)-seven, locked.

08.00.18 ELECTRONIC FEMALE VOICE (VO FILTERED)-Locate the MALP
transport...

08.04.18 SOLDIER TWO-Yes, sir.

08.09.06 SCREEN READS:
 MOLECULAR
 DECONSTRUCTION
 IN PROGRESS

08.13.12 ELECTRONIC FEMALE VOICE (VO FILTERED)-Reaching Stargate
 P3W-451 in five seconds... four... three... two...
 now...

08.21.22 SCREEN READS:
 M.A.L.P.
 SIGNAL
 UPLINKED

08.28.23 GENERAL HAMMOND-I don't understand. It's just...

08.30.21 O'NEILL-Red, sir.

08.33.04 GENERAL HAMMOND-Are we receiving telemetry?

08.34.26 SIMMONS-Yessir, but at an even slower rate than before.

- 08.38.11 CARTER-There is an image here. Input the video feed into
the computer, but compensate for...
CARTER (OS CONT)-a longer light wavelength.
CARTER (CONT)-Step it up in twenty millimicron
increments.
- 08.47.04 GENERAL HAMMOND-Captain?
- 08.48.03 CARTER-Sir, it's possible that the image we're receiving
from the probe has red shifted: Distorted toward
the infra red end...
CARTER (OS CONT)-of the spectrum.
- 08.55.25 GENERAL HAMMOND-Why?
- 08.57.09 TEAL'C-The same reason their codes came through so
slowly.
- 09.00.04 CARTER (OS)-Yeah.
CARTER (CONT)-Whatever that is.
- 09.04.18 SIMMONS-It's working.
- 09.17.27 O'NEILL-What the hell's going on, Hank?
- 09.21.11 TEAL'C-Is something pursuing them?

09.23.05 GENERAL HAMMOND-See if you can play back the video transmission in real time. We need to find out --

09.27.00 SIMMONS-This is all we've received so far, sir. Eleven frames of digital picture in the last six minutes.

09.34.20 CARTER-That represents a fraction of a second.

09.36.12 TEAL'C-Perhaps a malfunction.

09.37.20 O'NEILL-No. The picture tells us everything we need to know. That team is in trouble. Probably under attack. Permission to go in, sir?

09.46.16 CARTER-Negative, sir.

09.48.24 O'NEILL-What do you mean, negative?

09.52.04 CARTER-I'm sorry, Colonel. With all due respect. But if I'm right, we can't help them. (beat) Now, the camera may still respond to commands. See if you can tilt up and...

CARTER (OS CONT)-give us a wider image.

CARTER (CONT)-I think I know what Major Boyd seems so afraid of.

10.14.26 CARTER-There! Isolate that area, and digitally enhance.

10.27.15 GENERAL HAMMOND-What am I looking at?

10.29.03 O'NEILL-That's a black hole, sir.

10.31.04 CARTER (OS)-A newly formed one, by the looks of it.

CARTER (CONT)-P3W-451 was orbitting its companion star.

The orbit's probably pulling them closer and closer.

10.40.14 GENERAL HAMMOND-Why don't they just gate out of there?

10.42.14 CARTER-They're trying to, sir. But the closer you get to
a black hole...

10.45.16 O'NEILL-Time slows down.

10.49.24 TEAL'C-It almost appears to stand still.

10.52.14 CARTER (OS)-From our perspective, yes.

CARTER (CONT)-But you have to remember that time is

relative. As far as SG-10 is concerned, only a few
seconds have passed. They're still trying to save
themselves.

11.01.20 GENERAL HAMMOND-What will happen to them?

- 11.02.21 CARTER (OS)-Well, sir...
CARTER (CONT)-The time dilation is a result of the...
CARTER (OS CONT)-intense gravity, which is directly...
CARTER (CONT)-proportional to their proximity to the --
- 11.08.09 GENERAL HAMMOND (overlapping)-Captain...!
- 11.12.01 CARTER-Sorry, sir. (beat) Their bodies will be pulled
apart by increasing tidal forces.
- 11.23.28 TEAL'C (OS)-They did manage to activate...
TEAL'C (CONT)-the Stargate once.
- 11.26.12 CARTER-Yeah. But from their perspective, it couldn't
have been open for more than a second.
- 11.30.02 GENERAL HAMMOND-There's nothing we can do to save them?
- 11.33.00 O'NEILL-They've had it, sir.
- 11.34.27 GENERAL HAMMOND-You know that for a fact, Colonel?
- 11.36.16 O'NEILL-No sir, I don't. But have a look at Major Boyd's
face. What does that say to you?
- 11.47.14 GENERAL HAMMOND-Very well. Disengage the Stargate.

11.51.00 CARTER-Sir... (beat) By some fluke of Stargate
technology, we are witnessing something that the
laws of physics say we can't possibly witness.

11.59.11 O'NEILL-We are witnessing good men dying in slow motion,
Captain.

12.07.17 CARTER-You're right, sir.

12.12.00 GENERAL HAMMOND-Shut it down.

SHUTDOWN
SEQUENCE
INCOMPLETE
CANNOT DISENGAGE

12.21.27 SIMMONS-Sir, it won't disengage.

12.25.19 GENERAL HAMMOND-Try again.

12.26.20 SIMMONS (OS)-I already have, sir. Twice.
SIMMONS (CONT)-It won't shut down.

12.42.28 COMMANDER (OS)-Go! Go! Move! Move! (unintelligible)
Stay here!

- 13.00.17 CROMWELL-Sergeant, how long have you been out of contact with this facility?
- 13.04.06 SF (OS)-Comin' on four hours ago, sir.
SF (CONT)-But it was funky for a while before that.
- 13.09.25 CROMWELL-Is that proper military terminology? What exactly does "funky" mean, Sergeant?
- 13.14.27 SF-Everyone was talking real slow, like when the battery's down on your Walkman.
- 13.19.27 CROMWELL-Uh huh. Will that shaft take me directly to sub-level twenty eight?
- 13.25.22 SF-Yes, sir, but...
SF (OS CONT)-I don't know how you're gonna get down there.
SF (CONT)-It's...
- 13.28.24 CROMWELL (OS)-Not to worry.
CROMWELL (CONT)-We brought our transportation.
Gentlemen, back it up! Bring it! Clear!

- 13.48.17 GENERAL HAMMOND (INTO PHONE)-This is Major General Hammond. I have an urgent matter to discuss with the President.
- 14.03.04 CARTER (INTO HEADPHONE)-Sergeant, try disconnecting the superconductive interface...
- 14.06.25 SILER (ON HEADPHONE FILTERED)-Already tried that,...
SILER (CONT)-Captain. It's stuck.
- 14.09.16 CARTER-Teal'c, Siler...
CARTER (OS CONT)-could use a hand.
- 14.10.26 TEAL'C-I will assist.
- 14.19.09 GENERAL HAMMOND-Captain Carter...
- 14.20.13 CARTER-General, I was just on my way to report, sir. The capacitors should have fully discharged by now, but somehow the gate is drawing power directly.
- 14.27.17 GENERAL HAMMOND-Isn't there supposed to be a theoretical time limit to how long a wormhole can be maintained?
- 14.31.21 CARTER-Yes, sir. We just passed it.

- 14.33.28 GENERAL HAMMOND-Well then, how is this possible?
- 14.35.17 CARTER-Well, I'm guessing that because time is passing more slowly on P3W-451, relative to Earth, we're experiencing a paradox the Stargate was never designed for.
- 14.51.00 GENERAL HAMMOND-Why in God's name is it doing that?
- 14.55.03 CARTER-I have no idea, sir.
- 14.57.02 O'NEILL-It started just after you got on line with the President, sir.
- 15.00.17 GENERAL HAMMOND-I never got through to the President.
- 15.02.12 SIMMONS (OS)-Beg your pardon, sir.
SIMMONS (CONT)-It seems we've lost communication below sub-level 24.
- 15.07.14 GENERAL HAMMOND-Where is the nearest secure phone above that?
- 15.09.08 SIMMONS (OS)-Norad, sir.
SIMMONS (CONT)-Main level.

- 15.11.14 GENERAL HAMMOND-I won't be gone long. In the meantime,
Colonel...
- 15.13.12 O'NEILL-Understood, sir. (beat) Carter, what would
happen if we just pulled the plug?
- 15.34.05 O'NEILL (INTO HEADSET)-Okay, Carter. We've reached the
main power vault.
- 15.37.20 CARTER (VO OVER HEADSET FILTERED)-We'll isolate the
capacitors first.
- 15.41.21 SIMMONS-Panel six.
- 15.42.27 CARTER (INTO HEADSET)-Colonel, pull breakers ninety
through ninety four on panel six...
- 15.47.27 O'NEILL (INTO HEADSET)-Roger that. Stand by.
- 15.55.05 CARTER (INTO MIC FILTERED)-Stand clear, people. I...
CARTER (OS CONT INTO MIC FILTERED)-have no idea what this
is gonna do.
- 16.00.13 TEAL'C-We must vacate this area.

- 16.06.27 O'NEILL (INTO HEADSET)-All right, we're kinda shortin'
out up here.
- 16.09.20 CARTER (INTO HEADSET)-The main breaker...?
- 16.10.17 SIMMONS-It'll overload.
- 16.11.21 CARTER-We gotta do it. Colonel...
CARTER (VO CONT ON HEADSET FILTERED)-pull the main
breaker.
- 16.18.21 O'NEILL-On three, two, one...!
- 16.39.02 CARTER (INTO HEADSET)-Colonel, are you all right?!
- 16.41.14 SIMMONS (INTO MIC FILTERED)-Medical emergency to gate
room!
- 16.45.02 CARTER (VO OVER HEADSET FILTERED)-Colonel, are you all
right?
- 16.53.21 O'NEILL (INTO HEADSET)-Siler's hurt. Did it work?
- 16.56.23 CARTER (INTO HEADSET)-Negative, sir. Even with the power
cut, it won't shut down.

- 17.00.21 O'NEILL (INTO HEADSET)-How is that possible?
- 17.02.11 CARTER (INTO HEADSET)-It must be deriving its energy from the black hole itself. (TO SIMMONS) Get a Med team to the main power vault. We gotta get those fires out!
- 17.09.04 SIMMONS (INTO PHONE)-Med team to the main power vault!
- 17.11.00 ELECTRONIC FEMALE VOICE (VO FILTERED)-The MALP is now on emergency internal power.
- 17.19.23 CARTER-Help's on the way.
- 17.24.10 TEAL'C-Do not concern yourself with my energy.
- 17.26.24 CARTER-You're badly burned, Teal'c. Even for you.
- 17.34.23 TEAL'C-The Stargate...
- 17.55.13 CARTER-Lieutenant, close the Iris!
- 17.57.07 SIMMONS (OS ON INTERCOM FILTERED)-It's an outgoing wormhole.
- SIMMONS (CONT ON INTERCOM FILTERED)-Nothing can come through this way.

- 18.00.11 CARTER-Except for the black hole's gravity! Now close it! That's an order!
- 18.04.03 SIMMONS (ON INTERCOM FILTERED)-Close the Iris.
- 18.19.00 MAJOR DAVIS-Hold your fire! It's the General!
- 18.20.15 GENERAL HAMMOND-What the hell is going on? Who are you?
- 18.22.18 MAJOR DAVIS-Major Davis, sir. I'm with the office of the Joint Chiefs. If you'll come with me, please.
- 18.25.19 GENERAL HAMMOND-What are these men doing in my facility?
- 18.28.00 MAJOR DAVIS-We were under the impression there had been an alien incursion, sir. A Special Forces...
MAJOR DAVIS (OS CONT)-team had already been sent down before we understood what was going on. If it's all right...
MAJOR DAVIS (CONT)-with you, sir, I'd like to brief you on the way to your aircraft. Time is of the essence.
- 18.38.08 GENERAL HAMMOND-We've got an emergency situation, Major! I'm not going anywhere until I talk to the President.

- 18.43.02 MAJOR DAVIS-He wants to see you personally, sir. Your aircraft is standing by on the tarmac. It is urgent that we leave immediately.
- 18.51.00 GENERAL HAMMOND-Lead the way.
- 19.00.07 CROMWELL-Freeze! Up against the wall! Move! Move! Tags...! Doctor Fraiser...
- 19.10.14 DR. FRAISER-Yeah, and who the hell are you? Put that down!
- 19.12.28 CROMWELL-Colonel Frank Cromwell, Air Force Special Operations. Five hours ago, all contact was lost with this facility. I am here to find out why.
- 19.20.22 DR. FRAISER (OS)-Colonel, I have been...
DR. FRAISER (CONT)-called to a medical emergency.
- 19.23.11 CROMWELL-My superiors have reason to believe the SGC has been overrun by alien hostiles.
- 19.27.15 DR. FRAISER-All I can say is they've been misinformed.

- 19.29.14 CROMWELL-Well, from what I have read about what goes on in this place, Dr. Fraiser, hell, you could be one of 'em, for all I know. Move out! Take the six!
- 19.49.06 MAJOR DAVIS-We've been hoping that someone such as yourself would come back up and confirm our hypothesis.
- 19.53.25 GENERAL HAMMOND-Which is...?
- 19.54.26 MAJOR DAVIS (OS)-We now know...
MAJOR DAVIS (CONT)-that the SGC is experiencing what we call time dilation. Time is quite literally passing slower within the facility than it is topside.
- 20.03.05 GENERAL HAMMOND-Well, that would explain the communications problems.
- 20.05.21 MAJOR DAVIS-Yes, sir. We also know that there are only two things according to relativity...
MAJOR DAVIS (OS CONT)-that can cause this effect: velocities...
MAJOR DAVIS (CONT)-near the speed of light, or extreme gravity.

- 20.13.25 GENERAL HAMMOND-Approximately ten minutes ago, we
 established a wormhole to a planet at...
 GENERAL HAMMOND (OS CONT)-or very near the event
 horizon...
 GENERAL HAMMOND (CONT)-of a black hole.
- 20.22.08 MAJOR DAVIS (OS)-Since time is more or less at a
 standstill...
 MAJOR DAVIS (CONT)-on the other side, you've been unable
 to disengage the Stargate. (beat) That was our
 hypothesis, sir. Keep in mind we've had a few more
 hours than you've had to...
 MAJOR DAVIS (OS CONT)-think about this.
 MAJOR DAVIS (CONT)-They'll be conferencing you with...
 MAJOR DAVIS (OS CONT)-the President aboard the aircraft,
 sir.
- 20.37.10 GENERAL HAMMOND-Thank you, Major.
- 20.38.16 MAJOR DAVIS-Good luck, sir.
- 21.04.23 O'NEILL-Siler took a pretty good hit. How you doing,
 Teal'c?
- 21.09.15 TEAL'C-I suffered simple electrical burns, O'Neill.
 Nothing more.

21.12.20 CARTER-He'll be out of commission for a few days.

21.19.09 O'NEILL-Carter...?

21.20.26 CARTER-Gravity waves. Colonel, I assume that the
wormhole itself would insulate us from the black
hole's gravitational field, but it...
CARTER (OS CONT)-seems that our space/time has begun to
warp, just like on P3W-451...

21.31.00 O'NEILL-Will you stop that!

21.33.21 CARTER-We're in trouble, sir.

21.35.22 O'NEILL-Thank you. Think of something.

21.43.00 CARTER-Yes, sir.

21.50.01 DR. FRAISER-Colonel!

21.52.04 CROMWELL-Clear!

21.57.27 O'NEILL-Cromwell?

21.59.24 DR. FRAISER-You know this guy, sir?

22.01.18 O'NEILL-Oh, yeah. Go. Go on... (beat) Been a while...

22.12.17 CROMWELL-Yeah. Five hours. You've got everybody pretty worried upstairs. Where's the General?

22.20.20 O'NEILL-What's the five hours?

22.22.00 CROMWELL-That's how long this facility has been out of contact with the outside world. The Pentagon suspects alien hostiles.

22.30.09 O'NEILL-And they sent you?

22.44.03 CROMWELL-So, this is the Stargate? What's the problem?

22.50.12 O'NEILL-Well, we gated to a...
O'NEILL (OS CONT)-planet that's being sucked up by a black hole.
O'NEILL (CONT)-Very bad. Very dangerous.

22.58.22 CROMWELL-Why is that?

23.02.13 O'NEILL-Things tend to get sucked in.

23.07.28 CARTER-I took the liberty of closing the Iris, sir.

- 23.11.10 O'NEILL-Captain Carter, Colonel Cromwell. (beat) He's
come to rescue us. (beat) But I wouldn't count on
it.
- 23.19.06 CROMWELL (OS)-The Pentagon was concerned you were under
alien attack...
CROMWELL (CONT)-when they lost contact.
- 23.22.25 CARTER-How long ago was that?
- 23.24.09 CROMWELL-A little over five hours ago. Why?
- 23.27.10 CARTER-My watch reads thirteen thirty hours. What does
your say?
- 23.30.16 CROMWELL-You're running slow, Captain. It's almost
nineteen hundred.
- 23.33.03 CARTER-Dammit! Colonel, I have to get off this level.
- 23.36.01 SIMMONS (OS OVER INTERCOM FILTERED SLOWED DOWN)-Captain
Carter?
- 23.39.13 CARTER (INTO MIC FILTERED)-What have you got, Lieutenant?

23.42.17 SIMMONS (ON INTERCOM FILTERED SLOWED DOWN)-The field is expanding. (beat) I'm reading over seven "G"'s at the Iris.

23.50.00 CARTER (INTO MIC FILTERED)-Keep your distance, Lieutenant. (TO O'NEILL) Sir...

 CARTER (OS CONT)-For some reason...

 CARTER (CONT)-the warping of our space/time seems to be an advance of the gravitational field, rather than as a result of it. It's probably a lensing effect, generated by the Stargate itself, but I can't be sure.

24.06.26 CROMWELL-Don't even pretend you understood that.

24.10.09 CARTER (OS)-The point is, sirs,...

 CARTER (CONT)-time is passing more slowly down here than it is outside the mountain.

24.14.20 CROMWELL-Time is time.

24.15.21 CARTER-No, sir. Not according to relativity. Now, with the intense gravity field of something like a black hole, time actually slows down.

24.22.00 CROMWELL-We are not in a black hole.

24.24.07 O'NEILL-Not yet.

24.25.16 CARTER-But we are connected to its gravitational field
through the Stargate.

CARTER (OS CONT)-And it's expanding in this direction
like a...

CARTER (CONT)-bubble slowly extending outward. That's
why I have to leave, sir. I have to contact the
Pentagon and try to find a solution before the
gravity field extends...

CARTER (OS CONT)-beyond the gate room.

24.41.20 GENERAL HAMMOND (OS)-I just came from there myself,...

GENERAL HAMMOND (CONT)-Captain. Colonel Cromwell, I
believe.

24.46.08 CROMWELL-General Hammond.

24.48.09 O'NEILL-You just came from Washington, sir?

24.50.01 GENERAL HAMMOND-There and back again. After someone upstairs managed to explain...

GENERAL HAMMOND (OS CONT)-what was going on to me, we called an all-night session with the President and the Joint Chiefs.

GENERAL HAMMOND (CONT)-I've been gone nearly eighteen hours.

25.03.03 O'NEILL-I thought you were on the phone.

25.05.17 CARTER-That means the time dilation is getting worse as the field expands.

25.08.15 GENERAL HAMMOND (OS)-That's the consensus. We've set up a command post...

GENERAL HAMMOND (CONT)-directly above, right on top of the mountain, to monitor the expansion.

25.15.01 CARTER-Well, I have to get up there.

25.16.24 GENERAL HAMMOND (OS)-The experts we consulted believe we're going to...

GENERAL HAMMOND (CONT)-have to commence an autodestruct sequence to destroy the Stargate itself.

25.23.12 O'NEILL-Sweet...

- 25.24.19 GENERAL HAMMOND (OS)-They assure me that the gravity field now...
- GENERAL HAMMOND (CONT)-present around the gate will help to contain the blast within the mountain, and pose no threat to the civilian population.
- 25.34.12 CARTER-With all due respect, sir, I don't think so.
- 25.37.04 GENERAL HAMMOND (OS)-If we don't...
- GENERAL HAMMOND (CONT)-try, we lose the planet. Right through that...
- 25.42.12 CARTER-We may well succeed in destroying the base, sir, but leave the gate and the wormhole intact. What happens to the planet then?
- 25.48.20 GENERAL HAMMOND-Orders have been given at the highest level, Captain. It is our duty to carry out those orders.
- 25.53.09 CARTER-But, sir...

- 25.54.05 GENERAL HAMMOND (OS)-The decision has been made, Captain.
Don't...
- GENERAL HAMMOND (CONT)-forget, those people up there have
been working on this a lot longer than you have.
It's what they came up with.
- 26.01.08 CARTER-Yes, sir.
- 26.02.17 GENERAL HAMMOND (OS)-I'm ordering the complete evacuation
of the SGC, effective as of...
- GENERAL HAMMOND (CONT)-right now. I'll need two
volunteers to stay behind in order to give our
personnel a head start.
- 26.12.07 O'NEILL-I'll stay, sir.
- 26.13.10 CROMWELL-Me too, sir.
- 26.17.25 O'NEILL-Anyone else?
- 26.22.01 CROMWELL-Looks like you're stuck with me, Jack.

- 26.25.14 GENERAL HAMMOND-Done. It takes two officers to initiate the countdown. (INTO MIC FILTERED) Attention! This is General Hammond. All personnel are ordered to evacuate this...
- GENERAL HAMMOND (OS CONT INTO MIC FILTERED)-facility immediately.
- GENERAL HAMMOND (VO CONT OVER INTERCOM FILTERED)-Repeat... All personnel report to the main level immediately. That is all.
- 26.45.23 DR. FRAISER-Okay... Let's do this. On my count... three, two, one! Easy. Watch his chest. Move him out. Let's go.
- 27.00.03 GENERAL HAMMOND-Wait five minutes, then start the countdown. Good luck.
- 27.03.17 O'NEILL-Thank you, sir.
- 27.04.12 CARTER-Make sure you give yourself enough time to get out, sir.
- 27.07.28 O'NEILL-Time... right.
- 27.28.11 SF (OS)-Stand by.

27.30.05 SOLDIER (OS)-Yes, sir.

27.30.26 SF (OS)-General...
SF (CONT)-We were getting worried.

27.33.16 GENERAL HAMMOND-How long have I been gone?

27.34.22 SF-Twenty two hours, sir. General Cohen's waiting for
 you in the command post.

27.37.17 GENERAL HAMMOND-Thank you, Sergeant. (TO CARTER) By my
 reckoning, I was gone twenty minutes.

27.41.06 CARTER-Well, sir, accounting for time spent coming and
 going, I would guess time within the SGC facility
 has slowed to an average of about 600 percent below
 normal. When you ordered Colonel O'Neill to wait
 five minutes, you were really telling him to wait
 six hours, maybe more.

27.55.05 GENERAL HAMMOND-Captain, relativity gives me a headache.

28.06.07 CROMWELL-Who's this?

28.08.07 O'NEILL-Henry Boyd.
O'NEILL (OS CONT)-A good officer. Smart. (beat) Kind of reminds me of Carter a little. This was their mission as a team.

28.24.07 CROMWELL-He looks scared to death.

28.26.16 O'NEILL-He's on a planet that's about to be swallowed up by a black hole. And he knows it.

28.44.18 CARTER-Thank you. (beat) Uh... no. Thank you.

29.04.07 TEAL'C-Perhaps with rest the answers will come.

29.06.10 CARTER-Hey, Teal'c. You know anything about quantum gravity?

29.15.08 TEAL'C-Nothing.

29.17.16 CARTER-Apparently, neither do I.

29.21.04 TEAL'C (OS)-What do these equations represent?

29.22.24 CARTER (OS)-Probably a life's work.
CARTER (CONT)-I don't have that much time, unfortunately.

- 29.35.27 TEAL'C-How may I be of assistance?
- 29.40.23 CARTER-We're experiencing a time dilation in a radius...
CARTER (OS CONT)-wider than the gate room itself.
CARTER (CONT)-Most of the SGC, in fact, and it's
 expanding...
CARTER (OS CONT)-But it's all happening in advance of the
 gravity field that's causing it.
CARTER (CONT)-Now, according to everything I thought I
 knew about relativity, that is just not possible.
- 29.57.19 TEAL'C-Yet it is so.
- 29.58.20 CARTER (OS)-Right.
CARTER (CONT)-If it wasn't, we'd all be pulled apart by
 now. You know, they're proceeding with a plan that
 makes assumptions about gravity and space/time with
 absolutely no regard for the fact that it completely
 contradicts our observations.
- 30.15.01 TEAL'C-I see.
- 30.16.16 CARTER-in other words, Teal'c, they don't really know
 what the hell is going on, so they're just gonna
 blow it up. (beat) There doesn't seem to be a damn
 thing we can do about it.

- 30.36.19 O'NEILL-Let's get set up. (beat) The computer needs your authorization code before it'll accept the command. Go ahead and enter it.
- 30.58.02 CROMWELL-Maybe now you know how it feels.
- 31.01.10 O'NEILL-You done?
- 31.04.09 CROMWELL-Roger that.
- 31.06.02 O'NEILL-When the time comes, hit the enter key on my mark, and then run like hell.
- 31.15.02 CROMWELL-Got it.
- 31.22.25 O'NEILL-Two minutes.
- 31.37.14 CARTER-The gravity field extends to the blast doors of the control room now, sir. That's not good.
- 31.42.12 GENERAL HAMMOND-I take it you still believe our plan isn't going to work.

- 31.47.07 CARTER-To be honest, sir, I'm afraid that the gravity field will dampen the effects of the explosion.
- CARTER (OS CONT)-We'll lose the SGC, but the wormhole will be intact.
- CARTER (CONT)-What's left of the mountain will collapse into the wormhole, and six months after that the state of Colorado... Six months after that... At least Daniel will live out there...
- 32.06.09 GENERAL HAMMOND-If you're wrong -- and for once I hope you are -- we can restart the SGC with the second Stargate at Nellis, and in time, we --
- 32.12.19 CARTER-Wait a minute.
- CARTER (OS CONT)-Sir, that's it.
- CARTER (CONT)-We do use a bomb. But we focus the energy of the blast.
- CARTER (OS CONT)-When Colonel O'Neill and I were sent to the...
- CARTER (CONT)-Antarctic gate, it was because we were under enemy fire.
- 32.26.20 GENERAL HAMMOND-It caused an energy surge.

- 32.28.07 CARTER-Yes, and that surge caused the wormhole to jump from one destination to another. (beat) If we can channel enough energy in the direction of our Stargate, it should cut the connection to the black hole, and cause the matter stream to jump to any gate along the way.
- 32.14.03 GENERAL HAMMOND-Leaving our Stargate connected to some other world?
- 32.46.27 CARTER-Yes, sir. But then all we have to do is shut it down.
- CARTER (OS CONT)-Sir, we have to stop...
- CARTER (CONT)-Colonel O'Neill.
- 33.03.15 O'NEILL-One minute...
- 33.10.13 CROMWELL-Maybe the last one. (beat) We used to be friends, Jack.
- 33.28.07 O'NEILL-Yep.
- 33.30.01 CROMWELL (OS)-I was sick to my stomach when I found out you were still alive.
- CROMWELL (CONT)-I wanted to go back for you.

- 33.37.27 O'NEILL-Why don't we just do this and get the hell out of here, all right?
- 33.41.07 CROMWELL-Somebody dropped a dime on the incursion.
CROMWELL (OS CONT)-You got hit. You went down.
CROMWELL (CONT)-I made a judgement call to save the rest of the team...
- 33.47.25 O'NEILL-And I saw you take off. And then I saw four months of my life disappear in some stinkin' Iraqi prison!
- 33.54.16 CROMWELL-I thought you were dead!
- 33.55.18 O'NEILL-You thought wrong!! (beat) What do you want?!
You want me to forgive you?! Is that it?!
- 34.07.15 CROMWELL-Yeah. I guess I do.
- 34.12.15 O'NEILL-Well, that's tough. What happened to "Nobody gets left behind"?
- 34.17.22 CROMWELL-Well, what about him?
- 34.21.02 O'NEILL-That is a totally different scenario.

- 34.23.04 CROMWELL-That is the same damn thing, Jack!
- 34.40.08 CARTER-Don't activate the autodestruct, sir. It won't work. I have another idea...
- 35.03.15 CARTER-The G suits should help you withstand the higher gravity on the way down.
- 35.08.02 CROMWELL-What's this bomb we're delivering?
- 35.09.08 CARTER-It's a shaped charge. We want to focus the explosive force toward the wormhole, hopefully with enough energy to cause it to jump. Like what happened to us in Antarctica.
- 35.17.01 O'NEILL-Right.
- 35.18.15 CROMWELL-Where is it?
- 35.19.14 CARTER (OS)-They're modifying the warhead yield to my calculations, then...
CARTER (CONT)-it's being flown in from Travis.
- 35.23.12 CROMWELL-How long's all that gonna take?

35.25.05 CARTER-Well, sir, with any luck, about five more minutes.
Relatively...

35.30.02 O'NEILL (overlapping)-Relatively speaking.

35.31.01 CARTER (overlapping)-...speaking...

35.36.21 SILER-Any time you're ready, sirs.
SILER (OS CONT)-I don't know how much longer that Iris...
SILER (CONT)-is gonna hold.

35.40.22 CARTER-We have to wait for the bomb.

35.54.12 O'NEILL-You got better quick.

35.56.05 TEAL'C-It has in fact been several days.

35.59.00 O'NEILL-Yeah. I knew that.

36.01.04 CARTER-Everyone who doesn't have to be here should go
topside.

36.06.21 O'NEILL (OS)-Cromwell...

36.14.05 TEAL'C-Cannot the bomb be detonated by remote?

- 36.17.02 CARTER-It has to be set a certain distance from the gate,
and at an exact angle. The timer can't be set until
they're in position because of the variance in time
dilation.
- 36.24.19 CROMWELL-Man, she is --
- 36.25.24 O'NEILL (overlapping)-Way smarter than we are. I know.
- 37.16.15 CROMWELL-Just like old times, huh, Jack?
- 37.18.22 O'NEILL-Oh, yeah. Black holes... wormholes... old times.
- 37.31.08 SIMMONS-Sir...
- 37.32.19 GENERAL HAMMOND-Thank you, Lieutenant.
- 37.34.26 SIMMONS-Do you think they'll be able to shut it down,
sir?
- 37.38.13 GENERAL HAMMOND-We'll know sometime tomorrow.
- 38.08.07 O'NEILL-Oh yeah... yeah... We're pullin' some G's now.
- 38.12.13 CROMWELL-I feel like I put on a couple hundred pounds.

38.15.19 O'NEILL-I wasn't gonna say anything.

38.23.06 TEAL'C-They appear to be moving very slowly.

38.25.19 CARTER-Only from our perspective.

38.28.13 SILER-Uh... Captain...

38.37.06 CARTER (ECHO FX)-Colonel, look out!! Colonel!!

38.43.27 CROMWELL-Did you hear that?

38.48.00 O'NEILL-Look out!!

38.58.20 CROMWELL-Are you all right?

38.59.27 O'NEILL-This is close enough! Set the timer! Twenty
seconds!

39.03.20 CROMWELL-We won't make it out!

39.04.28 O'NEILL-Twenty seconds!

39.24.19 CROMWELL-Set!!

39.26.00 O'NEILL-Do it!!

39.42.05 CROMWELL-I've got you!

39.42.10 O'NEILL-Get up there and arm that damn bomb!

39.45.11 CROMWELL-I've got you! Just climb!

39.46.20 O'NEILL (overlapping)-Arm the damn bomb!

39.48.04 CROMWELL (overlapping)-Climb!

40.49.20 CARTER (OS)-Teal'c, pull him up!!

41.48.23 DANIEL-Hey, Jack. Did I miss anything.

41.53.03 O'NEILL-I made it.

41.55.21 GENERAL HAMMOND-We all made it, thanks to you and Captain
Carter.

42.01.10 O'NEILL-How?

42.03.07 CARTER-Teal'c managed to pull you far enough away from
the bomb before it went off.

42.08.19 O'NEILL-Thanks.

42.11.01 TEAL'C-You are welcome.

42.12.20 CARTER (OS)-The majority of the blast energy went right
 where it was supposed to.

CARTER (CONT)-The wormhole jumped to P2A-870, and once it
 did that, we just shut it off.

42.20.20 O'NEILL-Good thinking, Captain.

42.23.17 CARTER-Thank you, sir.

42.25.09 GENERAL HAMMOND-A new trinium-strengthened Iris is being
 installed right now. We should be back in business
 in no time.

42.32.18 O'NEILL-What day is it?

42.37.19 DANIEL-Well, this might be a little difficult to accept,
 but since you reported for duty yesterday, two weeks
 have actually gone by.

42.46.13 O'NEILL-Two weeks...? Think I'll sleep in.

42.56.19 GENERAL HAMMOND-You do that.

43.01.28 FADE TO END CREDITS.
