TIMECODE

DIALOGUE

START MEASURING 00.00.00 AT FIRST FRAME PICTURE

00.27.14 CARTER-UAV is a go for launch, sir.

00.31.11 GENERAL HAMMOND-Launch.

00.36.07 O'NEILL-That never gets old. I love that.

00.38.16 TECHNICIAN-UAV will arrive at PJ2-445 in three... two...
one...

00.46.08 CARTER-Automatic Terrain Radar System is functioning.
You know, if this new technology works out, sir,
it's going to be able to do a lot more long range
reconnaissance.

00.55.04 O'NEILL-Cool.

00.58.11 CARTER-Sensors are indicating sporadic spots of heat.

01.06.00 GENERAL HAMMOND (OS)-What are they?

01.07.16 CARTER-When we were there yesterday, sir, we didn't get this far from the Gate. They could be anything -- air vents, warm water springs...

01.13.18 O'NEILL-Perhaps life forms?

01.17.04 CARTER (OS)-Motion detectors don't indicate...
CARTER (CONT)-...any movement, sir.

01.20.28 TECHNICIAN (OS)-We're losing signal.

01.21.25 CARTER-What? That shouldn't be happening. Switching to manual control.

01.32.25 O'NEILL-Come on, Captain. Pull it up.

01.35.06 CARTER-I can't, sir.

01.39.19 TECHNICIAN-We have lost signal. Trying to re-establish.

01.41.28 CARTER-This doesn't make any sense.
CARTER (OS CONT)-This UAV was specially designed...
CARTER (CONT)-...for exactly this kind of radio control.

01.48.07 GENERAL HAMMOND-What was that it crashed into?

01.51.12 CARTER-I'm no Botanist, sir, but it looked like some sort
of plant life.

01.54.17 TECHNICIAN-We have visual contact re-established.

02.01.09 O'NEILL-We didn't need that UAV, did we, sir?

02.05.12 CARTER (OS)-Uh, I need the...
CARTER (CONT)-...flight recorder, sir, to determine...
CARTER (OS CONT)-...why the controls failed.
CARTER (CONT)-Estimated distance from the Gate is ten
miles.

02.14.19 O'NEILL-Aiey. Six hours there and back.

02.31.20 CARTER-That would confirm the presence of life forms on
PJ2-445.

02.46.11 O'NEILL-Well, I guess that changes the priority of this
mission, eh, sir?

04.12.10 DANIEL-Deja vu.

04.13.21 TEAL'C-I am unfamiliar with that term.

04.16.03 DANIEL-Um, it means "I feel like I've been here before."

05.06.16 O'NEILL-Think we call you alien 'cause you're from
Chulak?

05.17.20 O'NEILL-Kinda weird, huh? Captain, why don't you start
--

05.22.21 CARTER (overlapping)-Sir, plant life on Earth accounts
for more than 80 percent of our medicinal resources.
We should really check it out.

05.28.15 O'NEILL-Check it out.

05.32.07 DANIEL (OS)-These other ones must not be quite full-
grown, I guess.

05.38.06 O'NEILL-Bless.

05.40.03 DANIEL-Oh boy.

05.43.09 TEAL'C-The UAV was dragged in that direction.

05.49.17 O'NEILL-And that direction it is.

06.06.21 DANIEL-Dwellings.

06.08.18 O'NEILL-Lots of 'em.

06.27.27 DANIEL-Jack...?

06.29.12 O'NEILL-Yeah? What?

06.44.15 DANIEL-Hi. (beat) Well, I guess that was the wrong
thing to say.

07.12.00 O'NEILL (OS)-What do you think, Daniel?
O'NEILL (CONT)-Are they friendly spirits?

07.17.08 DANIEL-I guess we should go find out.

08.21.26 DANIEL-Hello. I'm Daniel Jackson. (beat) Try smiling.

08.46.04 O'NEILL-This is bizarre.

08.53.10 CARTER-Uh, Daniel...?

09.04.02 DANIEL-Keep smiling. Don't move.

09.07.10 TEAL'C-I am not fond of this.

09.08.24 O'NEILL-Me neither.

09.10.05 DANIEL-They just want to see what we feel like. (beat)
Oh, hey... wait...!

09.19.14 O'NEILL-What?

09.20.09 DANIEL-One of them got my knife.

09.21.26 CARTER-I got it. (TO ALIEN) Hey there. Hi. Th-that's
not for you. It's very dangerous. Could I have it
back, please?

09.40.02 CARTER-Ahh!

09.54.14 DANIEL-It-it's just a sneeze.

09.57.09 O'NEILL-Carter, how's your hand?

09.59.18 CARTER-It'll be all right, sir.

10.00.19 TEAL'C-I have never before encountered such a species.

10.04.06 DANIEL-I'm gonna try and communicate again.

10.07.00 O'NEILL-Want some company?

10.08.27 DANIEL-I think it'd be less intimidating if I go alone.

10.11.09 O'NEILL-All right. Find out what you can about the UAV,
huh?

10.14.07 DANIEL-Okay.

10.53.23 DANIEL-So...? (beat) Daniel.
DANIEL (OS CONT)-You don't...
DANIEL (CONT)-You don't speak at all, do you? (beat)
Okay...

12.07.24 DANIEL-Thank you.

12.25.21 O'NEILL-You gotta wonder what they're talking about in
there.

12.51.18 DANIEL (OS)-Well, they're not naked. They're covered
with something.
DANIEL (CONT)-Look, it's, uh, it's some sort of body
paint that hardens into a second skin when it dries.
DANIEL (OS CONT)-Well, I have to admit,...
DANIEL (CONT)-...this is one of the stranger cultures
I've ever seen. As far as I can tell they're
communal, but there's very little sign of actual
social communication.
DANIEL (OS CONT)-I haven't seen any tools or any...
DANIEL (CONT)-...signs of a functional civilization.

13.14.21 O'NEILL-So they're a little less evolved than we are?

13.17.27 DANIEL-Well, we don't want to jump to any conclusions.
Remember the Nox.

13.21.10 CARTER-And they did build these... homes.

13.24.16 O'NEILL-That's a kind appraisal. (beat) What about the
UAV?

13.32.01 DANIEL-Well, I've tried everything I know about
rudimentary communication, and to be honest, I've
had more successful conversations with dogs.

13.40.18 O'NEILL-So...?

13.41.21 DANIEL-So they're probably a little less evolved than we
are.

13.57.17 DANIEL-Yes!
DANIEL (OS CONT)-Yes! The...
DANIEL (CONT)-The-the-the -- Yes, thank you!
DANIEL (OS CONT)-This, this is a major breakthrough.
DANIEL (CONT)-I'm sorry. It's this, uh.... (beat) This
is nothing to worry about.

14.27.00 DANIEL-Of course, I could be wrong.

- 14.35.01 CARTER-I can't find a pulse, but I don't know if that means anything. He's still breathing.
- 14.40.04 O'NEILL (OS)-Captain...
O'NEILL (CONT)-Why don't we back off for now, huh?
- 14.46.28 DANIEL-I really hope this isn't because I sneezed on him.
- 14.49.26 TEAL'C-This one appeared to have lubricant from the UAV on his hands. Perhaps that is what has made him ill.
- 14.55.21 O'NEILL-Could be their national pasttime, for all we know. Maybe they've got low blood sugar --
- 15.07.07 CARTER-They're singing.
- 15.08.22 O'NEILL-Is that what that is?
- 15.10.06 DANIEL-Well, some Native American, as well as African and Aboriginal tribes believe that music and chants have medicinal powers.
- 15.18.25 CARTER-The sound is incredible.

- 15.26.11 DANIEL-Well, I guess it didn't work quite like they hoped.
- 15.51.18 TEAL'C-O'Neill... Should we not leave now?
- 15.56.15 DANIEL-What?
- 15.57.24 TEAL'C-Our presence here might make more of them ill.
- 16.00.00 CARTER (OS)-I was wondering the...
CARTER (CONT)-...same thing, Daniel. What it we're causing this?
- 16.05.19 DANIEL-Well, look at them! I-I don't think...
DANIEL (OS CONT)-...they know what's happening, much less how to help themselves.
- 16.10.10 O'NEILL-We don't even know what's happening, much less how to help them.
- 16.16.27 DANIEL-Well, whatever it is, it's turning into an epidemic.
- 16.30.15 DR. FRAISER (THROUGH MASK FILTERED)-Now this is a house call. Let's go.

- 16.37.12 O'NEILL-Straight away, boys.
- 16.52.07 DR. FRAISER (THROUGH MASK FILTERED)-Captain Carter...
- 16.53.03 CARTER-Doctor Fraiser...
- 16.54.02 DR. FRAISER (THROUGH MASK FILTERED)-What's the situation?
- 16.55.07 CARTER-Well, we're up to 14 afflicted. They seem to just double over in pain and then pass out. From there they remain unconscious. We've introduced a number of foreign substances that could be responsible.
- 17.05.24 DR. FRAISER (THROUGH MASK FILTERED)-Okay. Let's set up over here.
- 17.08.25 O'NEILL-And the UAV ran into that plant thing I showed you.
- 17.12.26 DANIEL-I've been sneezing like crazy ever...
DANIEL (OS CONT)-...since we got here.
- 17.15.18 CARTER (OS)-And I cut...
CARTER (CONT)-...my hand, and one of the aliens could have come in contact with my blood.

- 17.19.24 TEAL'C-One of the aliens had lubricant from the UAV on his hands.
- 17.22.11 DR. FRAISER (THROUGH MASK FILTERED)-Okay, look... The fact is, it could be somebody's aftershave. Now, how are they gonna react if I wanna run some tests?
- 17.28.28 DANIEL-The behavior of the group indicates serious agitation and concern. This is obviously unusual to them. (beat) They worried, but so far they've been very passive and willing...
- DANIEL (OS CONT)-...to let us try to help.
- 17.44.24 DR. FRAISER-Your tests are all clean.
- 17.46.06 DANIEL-What about them?
- 17.47.20 DR. FRAISER-Well, I'm pretty limited here. I mean, they may look similar to us, but they are definitely very different.
- 17.53.12 O'NEILL (OS)-You don't know what's...
- O'NEILL (CONT)-...wrong, do you?

17.55.17 DR. FRAISER (OS)-No.
DR. FRAISER (CONT)-I recommend we take one of them back to Earth where I can run more extensive tests. Under Level Two quarrantine conditions, it should be perfectly safe.

18.05.03 DANIEL-I'd like to stay.

18.06.11 O'NEILL-What for?

18.07.25 DANIEL (OS)-To keep trying to communicate with them.
DANIEL (CONT)-Reassure them that we're trying to help.

18.12.03 DR. FRAISER-I don't see any danger, sir.

18.15.05 O'NEILL-We're not making things worse by being here?

18.17.13 DR. FRAISER-No. I think the damage is probably already done.
DR. FRAISER (OS CONT)-Quarrantine the sick in case this problem is contagious amongst them. I also suggest you check...
DR. FRAISER (CONT)-...out the other villages in the distance. If this illness is present there, it just may rule us out as the origin.

18.32.09 O'NEILL-Okay. Carter, you go back with Dr. Fraiser, report to General Hammond, get your hand looked at. (beat) Daniel, Teal'c and I'll stick around.

19.06.26 DANIEL-It's okay. (beat) Everything's gonna be fine.

19.55.00 NURSE-On three...

19.55.09 CARTER-It's all right. You're gonna be okay.

19.57.07 DR. FRAISER-Get this out of here. Give me the stethoscope when you're done.

20.05.22 CARTER-When he first got sick, they all gathered around him and started making this incredible sound. It was like music.

20.19.22 TEAL'C-Do you not believe we are responsible, O'Neill?

20.22.06 O'NEILL-Yes, I believe we are not. We should check it out either way.

20.30.24 TEAL'C-It is possible one of the aliens from the village we visited went to warn others, and spread the disease.

20.35.20 O'NEILL-Yeah, I guess... Whoa!

20.42.01 TEAL'C-Are you all right, O'Neill?

20.43.24 O'NEILL-I'm fine. Look... Teal'c... I know this might be
tough for you, but would you mind if we just walked
without talkng for a while?

20.59.11 TEAL'C-Do you feel an illness?

20.02.18 O'NEILL-A little headache. I'll be fine.

21.15.01 CARTER-How's it going?

21.16.13 DR. FRAISER-Nothing conclusive yet. I'm just about to
do...
DR. FRAISER (OS CONT)-...an ultra sound, see if I can get
a clear picture of their internal organs.
DR. FRAISER (CONT)-Maybe I'll try another way.

21.51.01 DR. FRAISER (OS)-There are a number of...
DR. FRAISER (CONT)-...common elements in their blood --
red and white cells,...
DR. FRAISER (OS CONT)-...glucose, protein...

21.56.22 CARTER-But you're working with a human frame of reference
 on the test results.

21.59.09 DR. FRAISER-Exactly. I mean, how am I supposed to know
 what's normal...

 DR. FRAISER (OS CONT)-...for these guys?

22.06.26 CARTER-Uh... That's not exactly normal, is it?

22.11.15 DR. FRAISER (OS)-Not from any anatomy I've learned. Look
 at this.

22.50.00 DANIEL-Whoa. What, uh, what just happened?

23.07.20 DANIEL-Right. (beat) Good impression.

23.14.04 O'NEILL-What's up?

23.15.07 DANIEL-Uh, the plant. Or at...

 DANIEL (OS CONT)-...least it was.

23.19.19 O'NEILL-What?

23.21.06 DANIEL-Well, it had grown to over six feet tall, and when I came up to it, it just shrank back into the ground. (beat) I'm gonna back up again, see if it, see if it does it again...

23.40.27 O'NEILL-Witness if you will... squat.

23.46.26 DANIEL-Well, you, you saw it too... See! Just... like that.

23.55.10 TEAL'C-Many aliens in the nearby villages are ill.

24.02.16 DANIEL-Okay. What are we gonna do?

24.05.06 O'NEILL-How should I know?

24.06.18 DANIEL-Well, we need to do something.

24.08.17 O'NEILL (OS)-I agree with you.
O'NEILL (CONT)-But I haven't had the brilliant revelations you seem to have had.

24.13.02 DANIEL-Well, maybe you could try coming up with something better than inappropriate sarcasm.

24.17.07 O'NEILL-You want sarcasm? Nice to meet you. (beat)
What's he smiling at?

24.32.16 TEAL'C-He appears to be bothered by the tone you have
taken towards each other.
TEAL'C (OS CONT)-As am I.

24.40.26 O'NEILL-Uh, Teal'c... Why don't you head back to the
Gate, get a message to General Hammond, let him know
what's going on here.

24.48.00 TEAL'C-And the two of you will be fine?

24.50.01 O'NEILL-Yeah, yeah. We'll be fine. I'm gonna stick
around and work on this quarrantine thing with plant
boy here.

25.33.28 GENERAL HAMMOND-We just got a report from Teal'c. The
sick now number over...
GENERAL HAMMOND (OS CONT)-...a hundred. And that's only
among...
GENERAL HAMMOND (CONT)-...the aliens that they could
count. The disease does not appear to be local to
the village you encountered.

25.45.23 DR. FRAISER (OS)-The, uh...
DR. FRAISER (CONT)-...muscle that I've identified as the
alien's heart is beating more and more erratically.

25.50.13 GENERAL HAMMOND-So whatever he's got is going to kill
him?

25.54.14 DR. FRAISER-I don't know how much longer I can keep this
one alive, sir. I'm afraid to administer drugs...
DR. FRAISER (OS CONT)-...because it could make him worse.

26.01.01 CARTER-Sir, if you don't mind... What are you thinking?

26.03.12 GENERAL HAMMOND-Captain, I am thinking that the
unfortunate reality is that this scenario was not
totally unexpected.

26.10.27 DR. FRAISER-Actually, sir, the surprising thing is it
hasn't happened more often. We think it may be
because there are so many transplanted humans from
Earth on other planets, that most of the contagions
we carry...
DR. FRAISER (OS CONT)-...are already out there.

26.21.05 CARTER-Yeah, well, not in this case.

26.23.03 GENERAL HAMMOND (OS)-Unfortunately, there's only so much
time and so many...
GENERAL HAMMOND (CONT)-...resources that this facility
can devote to this situation --

26.28.27 DR. FRAISER-Sir, I didn't say it was hopeless.

26.30.24 CARTER-They didn't ask for this.
CARTER (OS CONT)-I mean, they're...
CARTER (CONT)-...clearly unable to help themselves. We
can't just keep trampling through the galaxy with no
regard for the damage...
CARTER (OS CONT)-...that we can do.

26.43.04 DR. FRAISER-Sir, we need more time.

26.44.24 CARTER-A lot more time.

26.48.00 GENERAL HAMMOND-How much time you've got is not up to me.

26.51.14 CARTER-Sir?

26.53.04 GENERAL HAMMOND-You said it yourself, Doctor. They are
dying.

27.04.09 O'NEILL (OS)-Ah-ah-ah, get back, come on...! Fine...
O'NEILL (CONT)-Knock yourself out. Go ahead. Go play in
the street. Don't forget your sunblock. Why aren't
you helping me?

27.18.00 DANIEL-Oh, it's no use. They don't understand. They
wanna... be with each other.

27.22.04 O'NEILL-Well, we're not gonna stand around doing nothing.

27.24.00 DANIEL-We're not doing nothing.

27.26.06 O'NEILL-You're videotaping a plant.

27.28.07 DANIEL-Well, I think this might be important.

27.31.02 O'NEILL-Well, I think you might be losing what's left of
your mind.

27.36.24 DANIEL-What's that supposed to mean?

27.38.26 O'NEILL-It means that on a good day, you can be a little
flakey.

27.43.01 DANIEL-And on a good day, you can be a little ignorant
and condescending.

- 27.47.09 O'NEILL-Not condescending. You're obviously misreading a basic philosophical difference of opinion on how to handle a crisis.
- 27.54.14 DANIEL-Oh, please! We have a difference on just about everything!
- 27.58.09 O'NEILL-Give me an example.
- 28.00.08 DANIEL-I don't know... Pick something! How, how about, how about mythology?
- 28.04.21 O'NEILL-Rumors, lies, fairy tales.
- 28.06.25 DANIEL-You see, see, see see see, see, see...! Mythology is one of the primary motivations...
DANIEL (OS CONT)-...for cultural development!
- 28.13.05 O'NEILL-Maybe it is! What's that got to do with filming a plant?!
- 28.16.06 DANIEL-Exactly!
- 28.17.08 O'NEILL-What does that mean?!
- 28.18.00 DANIEL-I don't know!

28.26.18 O'NEILL-Okay. What was that?

28.31.25 DANIEL-I don't know. I don't feel so good...

28.33.28 O'NEILL-I've got a headache.

28.36.06 DANIEL-Maybe we're getting whatever they have.

29.02.26 DANIEL-Getting worse?

29.05.07 O'NEILL-Yeah. Kinda.

29.14.24 O'NEILL-Hey, Teal'c.

29.20.06 TEAL'C-Doctor Frasier and Captain Carter have had little
success in healing...
TEAL'C (OS CONT)-...the alien.

29.24.01 O'NEILL-Well, I think Daniel and I are coming down with
something, too. (beat) How're you doing?

29.31.26 TEAL'C-I remain unaffected.

29.38.04 O'NEILL-I think we should probably go back and get
checked out, huh?

29.44.14 TEAL'C-I will remain.

29.51.16 O'NEILL-All right, Teal'c, if we're not back in twelve
 hours, come on home.

30.01.06 DANIEL-Would you do me a favor? Would you keep an eye on
 this plant thing for me?

30.09.21 TEAL'C-I will keep both of my eyes on it, Daniel Jackson.

30.17.04 DANIEL-Thank you.

30.39.00 O'NEILL-You gonna make this? Come on...

31.00.24 CARTER-Are you okay?

31.04.03 DANIEL-We started to feel sick.

31.07.03 CARTER-What kind of sick?

31.09.13 O'NEILL-Headaches. Brutal headaches.

31.14.09 DANIEL-But now I feel fine.

31.16.00 GENERAL HAMMOND-Colonel, are you okay?

31.17.15 O'NEILL-I'm feeling better, actually.

31.33.14 O'NEILL-Listen, I, uh...

31.34.20 DANIEL-No, no. Sorry. You were gonna say...?

31.41.11 O'NEILL-No, it's just that, uh... Well, you know...

31.48.00 DANIEL-Uh, no. I know, I know... You know that I...

31.53.19 O'NEILL-I know. It's obvious there's something --

31.58.03 DANIEL (overlapping)-...Something wrong with us...

32.00.20 O'NEILL-Physically.

32.02.00 DR. FRAISER-Well, there's nothing wrong with you.

32.03.33 DANIEL-What?!

32.05.20 DR. FRAISER (OS)-Well, I've run every...
DR. FRAISER (CONT)-...test I could, short of exploratory
brain surgery, and you are both in perfect health.

32.12.00 O'NEILL-Huh.

- 32.14.20 VOICE (VO ON INTERCOM FILTERED)-Doctor Fraiser to
Critical Care, stat.
- 32.36.20 CARTER-He's flat-lining.
- 32.27.26 DR. FRAISER-Normally, I'd defibrillate, but I don't know
what it'll do in this case. One milligram
Epinephrine. Start a Lidocaine IV. Go!
- 33.45.16 CARTER-He's stable, for now.
- 33.47.14 DANIEL-If he's gonna die, shouldn't we at least let him
be with his own kind?
- 34.13.24 O'NEILL-What are you looking for?
- 34.15.27 DANIEL-I don't know. Something. Anything.
- 34.30.15 O'NEILL-Daniel, we can't always expect things to go the
way we want them to.
- 34.37.04 DANIEL-To go the way that we want them to? I mean, one
wrong move, one false step, and a whole fragile
world gets wiped out? We are killing a whole race
of people here! How can I not care!?

35.00.21 O'NEILL-What?

35.04.18 DANIEL-My head hurts again.

35.21.13 DR. FRAISER-Well, your pupils look fine.

35.23.08 DANIEL-This is the strangest thing. I feel fine again.

35.26.10 DR. FRAISER-Okay. So then, when did this start?

35.29.07 DANIEL-Well, it was probably while I was watching the...
Excuse me.

35.41.08 DANIEL-There has to be something the camera recorded,
something we can't see.

35.48.15 CARTER-Or hear. Gimme the tape.

36.09.24 O'NEILL-Carter, what are you doing?

36.12.10 CARTER-I'm looking for something that we can't hear.

(beat) Here, in the long amplitude waves.

Isolating and amplifying. (beat) This was under everything that you recorded with the camera. The sound was present the entire time that we were on the planet. We just couldn't hear it.

- 36.41.13 O'NEILL-It's kind of annoying. Why don't you turn it down.
- 36.46.10 DR. FRAISER (OS)-Actually, it's...
DR. FRAISER (CONT)-...more than just annoying, sir. It's also responsible for...
DR. FRAISER (OS CONT)-...the symptoms you were describing.
- 36.50.23 DANIEL-It is?
- 36.51.21 DR. FRAISER-Long-term exposure to certain sounds have been documented to cause serious physical side effects. Your headaches, nausea, severe irritability... (beat) The longer you're exposed to it, the worse it gets.
- 37.03.12 CARTER-I'll bet this is what was interfering with the remote control on the UAV.
- 37.06.15 DANIEL-So this must be what's making the aliens sick?
- 37.08.20 DR. FRAISER-No. See, you felt better...
DR. FRAISER (OS CONT)-...when you got back here, but...
DR. FRAISER (CONT)-...the alien we brought here just keeps getting worse.

37.14.02 CARTER-And the sound that was causing your symptoms isn't
here on the base -- except on this tape.

37.18.14 DANIEL-So this isn't what's making the aliens sick?

37.21.03 TECHNICIAN-Colonel, incoming wormhole.

37.27.24 SCREEN READS:

37.28.24 TECHNICIAN (OS)-SG-1 code verified...

37.30.18 O'NEILL-Open the Iris.

37.52.14 O'NEILL-You all right?

37.54.00 TEAL'C-My condition is improving.

37.55.09 O'NEILL-Sit down.

- 38.00.00 DANIEL-Well, I guess Jaffa aren't completely impervious after all.
- 38.03.04 TEAL'C-What has led you to that assumption?
- 38.05.25 O'NEILL-Well, there's some kind of bad sound on that planet.
- 38.11.13 DANIEL (OS)-It's what made us sick. I guess it just...
DANIEL (CONT)-...took you a little longer to cave in.
- 38.14.13 TEAL'C-I believe it to be the organism that was somehow attacking me.
- 38.17.01 CARTER-What organism?
- 38.18.23 TEAL'C-I made a discovery while observing your plants, Daniel Jackson.
- 38.21.26 DANIEL-You saw them grow?
- 38.23.08 TEAL'C-Indeed. I saw several of them rise. When I approached, they retracted into the ground.
TEAL'C (OS CONT)-I removed the dirt from around the retracted plants.
TEAL'C (CONT)-It appears they are all connected.

38.36.16 CARTER-And you say it attacked you?

38.38.20 TEAL'C-As I drew near the organism, I became disoriented.
My head was overcome with great pain.
TEAL'C (OS CONT)-Movement became very difficult.

38.46.21 DANIEL-That's it.

38.50.16 O'NEILL-What? Where...
O'NEILL (OS CONT)-...you going?

38.58.00 DANIEL-Come on!

39.05.02 DANIEL-Did we record audio from the UAV's air run over
PJ2-445?

39.08.05 TECHNICIAN-Sure.

39.08.18 DANIEL-Do you have a tape?

39.09.22 TECHNICIAN-It's still in the hard drive data-bank.

39.11.12 CARTER-Okay. Run it through an audio spectrum analysis,
amplify the low end, and replay it through the
speakers. I think I know where you're going.

39.21.08 DANIEL-Now fast forward to after the UAV crashed. (beat)
When the UAV crashed on the planet, the sound
changed.

39.29.12 O'NEILL-The plant is making that sound?

39.31.21 CARTER-Sir, it's an alien organism on another planet.

39.34.17 O'NEILL-Good point.

39.36.04 DANIEL-We accidentally changed the sound the organism
naturally makes.

39.39.07 TEAL'C-Why would the sound change?

39.41.10 DANIEL-It's alive. We hurt it.

39.44.07 CARTER-Maybe the aliens are affected by the sound in
totally different ways than you were. They could
need the sound to be a certain frequency.

39.50.25 TEAL'C-For what reason?

39.51.27 CARTER-To live. They don't even have the same internal
organs that we do.

- 39.55.15 DR. FRAISER-The ultra sound... Do you remember the way
the alien reacted...
- DR. FRAISER (OS CONT)-...when I tried to do the ultra
sound? That...
- DR. FRAISER (CONT)-...organ that we couldn't identify
must be sound sensitive.
- 40.10.23 GENERAL HAMMOND-So this inaudible sound was making you
sick, but not in the same way that it was affecting
the aliens?
- GENERAL HAMMOND (OS CONT)-They need the sound to live,
but we...
- GENERAL HAMMOND (CONT)-...altered it by harming the
organism that makes the sound?
- 40.22.11 O'NEILL-Sounds right.
- 40.29.24 DR. FRAISER-His pulse is getting stronger.
- 40.52.07 CARTER-Frequency emitters are operational, sir.
Daniel... We should, uh, we should get out of here.
- 41.03.01 DANIEL-Well, don't you wanna stay and see if it works?

41.05.22 CARTER-Yeah. But we can watch from that ridge over there. I have a hunch, and I think we might be in the way.

41.25.13 DANIEL-Good-bye.

41.58.04 DANIEL-How much longer, you think?

42.00.07 CARTER-I don't know.

42.02.10 O'NEILL-Care to let us in on this hunch?

42.06.04 CARTER-Not yet, sir.

42.15.02 TEAL'C-There.

42.29.17 DANIEL-That was your hunch?

42.31.09 CARTER-I had a feeling that there was some sort of symbiotic...
CARTER (OS CONT)-...relationship between the aliens and the organism.
CARTER (CONT)-They probably don't even realize it.

42.37.26 DANIEL-How did you realize it?

42.41.05 O'NEILL-Captain?

42.46.28 CARTER-I, I talk to my plants, okay?

43.01.28 FADE TO END CREDITS.
