TIMECODE DIALOGUE

START TIMECODE 00.00.00 AT FIRST FRAME OF PICTURE

00.15.28 O'NEILL (OS)-So, Laira, when's the big show start?

00.19.08 LAIRA-Soon. Be patient,

00.21.25 O'NEILL-Oh, I'm patient. I'm nothing if not patient. When's it start?

00.26.19 LAIRA-Is he always like this?

00.28.03 TEAL'C-Quite frequently.

00.29.28 O'NEILL-Thank you, Teal'c.

00.32.08 DANIEL (OS)-Laira, we haven't seen anything...

DANIEL (CONT)-you could call fire rain these past few nights – How come you're sure
it's gonna fall tonight?

00.37.147 LAIRA-It begins this night each year.

00.39.25 CARTER-Whoa... The same night every year? That doesn't make sense. I mean,
unless the planet's orbit travels through a debris field, like an asteroid belt, in
which case –

00.48.05 O'NEILL (OS INTERRUPTING)-Please,...

O'NEILL (CONT)-don't suck the fun out of this.

00.52.17 CARTER-Sorry, sir.

00.54.00 LAIRA (OS)-When I was a child,...

LAIRA (CONT)-my father told me that the fire rain was the tears of our ancestors
longing to be reunited.

01.05.26 DANIEL (OS)-A falling star.

DANIEL (CONT)-That's what we call fire rain where we come from.

DANIEL (OS CONT)-In our culture you're supposed to, uh...

DANIEL (CONT)-make a wish.

01.16.02 TEAL'C-On Chulak we call it *Tal pat ryne*.

01.18.08 DANIEL-Which means, uh, falling star.

01.24.03 LAIRA-What do you think, Jack? Was it worth the effort?

01.26.23 O'NEILL (OS)-Oh yeah.

O'NEILL (CONT)-Yeah, I'm a huge fan of fireworks.

01.39.18 Whoa.

01.47.01 Carter, how close was that?

01.51.07 CARTER-Close, sir.

01.52.26 DANIEL-How big?

01.54.00 CARTER-Big.

01.55.05 DANIEL-Thought so.

01.56.14 CARTER-I was rather concerned for a minute there, sir.

02.01.24 LAIRA-I don't understand.

02.03.06 CARTER (OS)-Laira, that's what we call...

CARTER (CONT)-a near miss. If that meteor had struck the ground instead of
bouncing off the atmosphere --

02.08.24 O'NEILL (OS INTERRUPTING)-This...

O'NEILL (CONT)-is an annual event?

02.11.04 LAIRA (OS)-Yes.

LAIRA (CONT)-Though it grows more spectacular every year.

LAIRA (OS CONT)-By tomorrow evening,...

LAIRA (CONT)-the entire sky --

02.22.26 What's wrong?

02.25.29 CARTER-I'll make some more observations tonight, sir.

02.28.25 DANIEL-I'm gonna check the geological record in the morning.

02.32.23 O'NEILL-I'll... make a wish.

02.43.10 FADE TO BLACK. BEGIN OPENING CREDIT SEQUENCE

04.12.10 CARTER-See this bright dot? It represents your world, Edora.

CARTER (OS CONT)-Now, it orbits your sun in a big circle, like this, and it crosses
through an asteroid belt up here at its widest point. Now, as you pass...

CARTER (CONT)-through the millions of tiny rocks and particles, some of them burn
up in Edora's atmosphere.

04.27.01 LAIRA-As fire rain.

04.27.27 CARTER-Exactly. The problem is, the asteroid belt isn't uniform,...

CARTER (OS CONT)-so certain orbits in certain years must pass through a denser
debris field.

CARTER (CONT)-Can you ever remember the fire rain striking the ground?

- 04.39.07 LAIRA-Not in my lifetime – nor in my father’s – but there is a tale of the ancestor’s,
that on the second day of the fire rain,...
- LAIRA (OS CONT)-there was a distant thunder,...
- LAIRA (CONT)-and the horizon burned as though the sun never set.
- 04.52.19 CARTER-How long ago was that?
- 04.54.02 LAIRA-Many, many years ago.
- 04.57.07 O’NEILL-Mornin’, campers.
- O’NEILL (OS CONT)-Who’s goin’ on Daniel’s...
- O’NEILL (CONT)-little geology field trip?
- 05.02.18 LAIRA (OS)-Garan.
- 05.08.22 Garan can show you the way to the caves.
- LAIRA (CONT)-He and a young girl go there from time to time, though I don’t know
why.
- 05.14.02 GARAN (OS)-Mother.
- 05.17.01 LAIRA (OS)-Fair day, and be well.

- 05.22.12 CARTER (OS)-Sir, I'd like to go...
CARTER (CONT)-to Earth and input the data I collected from last night's observations
into the basis mainframe.
- 05.28.05 O'NEILL-Go ahead.
- 05.30.24 CARTER-Fair day, Laira.
- 05.32.05 LAIRA (OS)-Fair day.
- 05.36.14 LAIRA (CONT)-I'm sure you want to discuss the treaty... between our two worlds.
- 05.43.23 O'NEILL-Sure, we could do that.
- 05.50.09 DANIEL (OS)-I figure the decay rate differential...
DANIEL (CONT)-between the layers of naquada is about a hundred and fifty years,
give or take, so –
- 05.56.22 GARAN-What's naquada?
- 05.57.21 TEAL'C-A mineral substance.
- 06.00.10 DANIEL (OS)-You see, the further down these striations we go, the further back into
Edora's past we travel. You see, these layers are different. They represent
naquada dust thrown out by impact events.

06.13.08 GARAN-Cool.

06.17.14 Uh, J-Jack says that.

06.20.23 DANIEL-Yes, he does. I'm not really sure that, uh, "cool" applies to this. You see, something like this happened on my world millions of years ago and nearly wiped out all life.

06.33.15 NAYTHA-That's what's gonna happen here?

06.35.02 DANIEL-Well, we only know that it has happened,...

 DANIEL (OS CONT)-uh, in varying degrees of destruction every...

 DANIEL (CONT)-hundred and fifty years or so.

06.41.06 TEAL'C (OS)-And it appears that is precisely the amount of time...

 TEAL'C (CONT)-since the last impact.

 TEAL'C (OS CONT)-I see no...

 TEAL'C (CONT)-reason to withhold the truth from these people, Daniel Jackson.

06.52.03 GARAN-Is there anything we can do to stop it?

06.55.02 DANIEL-No.

- 07.02.27 CARTER-According to the...
CARTER (OS CONT)-observations I made last night, the...
CARTER (CONT)-near miss we experienced was just the first of hundreds of car size
asteroids directly in the path of Edora – P5C 768. The night sky is full of them.
- 07.15.01 HAMMOND-We can't evacuate an entire planet, Major.
- 07.17.09 CARTER (OS)-As far as we know, these are the only...
CARTER (CONT)-descendants of a people brought to Edora by the Goa'uld
thousands of years ago. There may be only a small number of strikes locally. If
that's the case we can send them home in a few days. If not, we'd be saving
the last of a people, sir.
- 07.49.28 LAIRA-Paynan, this is Jack.
- 07.55.17 PAYNAN (OS)-They say you've come through the stone ring. Hard thing to ask a man
to believe.
- 08.02.05 O'NEILL-I know what you mean. Any luck?
- 08.10.14 PAYNAN-There's nothing more than meets the eye here. Our fields, those few
buildings,...
PAYNAN (OS CONT)-our children. What we have,...
PAYNAN (CONT)-we need.

- 08.20.24 O'NEILL-We're only interested in fair trades.
- 08.36.06 LAIRA-Many of my people are most curious to know what it is we have that you could possibly want.
- 08.42.16 O'NEILL-Well, you remember how excited Carter got the day we got here?
- 08.46.08 LAIRA-Something in our soil.
- 08.47.18 O'NEILL-That's a mineral called naquada. We don't have it on Earth. It's, you know, it's very important to us.
- 08.54.01 LAIRA-Why?
- 08.56.03 O'NEILL-It's powerful.
- 08.54.14 LAIRA-And in return for taking this naquada from our soil?
- 09.03.28 O'NEILL-Well, there are a lot of things we could help you out with. Medicine, technology, education. We'd become friends.
- 09.12.00 LAIRA-We're already friends.
- 09.14.13 O'NEILL-Closer friends?

- 09.17.03 LAIRA-My mother taught me to be wary of men wishing to be closer friends.
- 09.21.12 O'NEILL-Well, if you'd like, I'll negotiate this treaty with your mother. That way there'd
be no conflict of interest –
- 09.30.12 LAIRA-I've never seen the fire rain in the light of day.
- 09.40.07 O'NEILL (INTO RADIO)-Anybody else see that?
- 09.41.22 CARTER (INTO RADIO)-This is Carter, sir. I did. I think it's just the beginning, sir.
- 09.50.04 DANIEL (OS)-Look at this.
DANIEL (CONT)-It's a cooking utensil. Which probably means at some point a
number of people spent time here.
- 10.01.25 TEAL'C-Perhaps this cave provided a means for a small number of Edorans to survive
the last meteor bombardment.
- 10.08.12 GARAN-The ancestors.
- 10.10.10 O'NEILL (VO THRU RADIO FILTERED)-Teal'c, Daniel – back to the village ASAP.
- 10.13.07 TEAL'C (INTO RADIO)-Understood, O'Neill.

- 10.17.02 O'NEILL-Folks, we think the fire rain is gonna start hitting the ground pretty soon.
O'NEILL (OS CONT)-As a precaution we'd like to take you all back to our planet...
O'NEILL (CONT)-till the threath is over.
- 10.24.20 PAYNAN (OS OVERLAPPING)-There is...
PAYNAN (CONT)-no threat.
- 10.26.10 CARTER (OS)-If just one big meteor lands within a few miles of here,...
CARTER (CONT)-the resulting explosion could wipe out the entire village.
- 10.32.05 PAYNAN (OS)-Year after year...
PAYNAN (CONT)-the fire rain comes, goes, and harms no one. Do you not see what
they are...
PAYNAN (OS CONT)-doing? They want us gone so they can...
PAYNAN (CONT)-claim our lands for themselves.
- 10.40.17 DANIEL-That's not true.
- 10.41.27 PAYNAN-If you go with them, you will never see your lands again.
- 10.47.17 O'NEILL-Oh, for crying out loud. There's always one like you in a crowd.
O'NEILL (OS CONT)-You want to stay,...
O'NEILL (CONT)-stay!

- 10.53.04 LAIRA-I have come to know these travelers. And though their world seems far, it is only a step away.
LAIRA (OS CONT)-I will take that step, in good faith.
LAIRA (CONT)-If you wish to follow, join us at the stone ring. And if you do not, may the ancestors protect you.
- 11.10.29 DANIEL-You need only take what you can carry. There'll be plenty of food and water where we're going.
- 11.22.05 O'NEILL (OS)-Alright, folks,...
O'NEILL (CONT)-train's leavin'. Let's move!
- 11.26.18 LAIRA (OS)-Garan,...
LAIRA (CONT)-don't forget the prayer chain that your father gave you.
LAIRA (OS CONT)-Garan?
LAIRA (CONT)-Oh, no.
- 11.42.09 LAIRA (OS)-Have you seen Garan?
- 11.44.18 O'NEILL (OS)-Daniel, Teal'c –
O'NEILL (CONT)-Did Garan come back with you?
- 11.49.13 TEAL'C-He should be here, O'Neill.

- 11.51.09 DANIEL-The caves. We were talking about how previous generations of survivors must've gone back there.
- 11.56.21 O'NEILL-Alright, you three go, get these people out of here. We'll find the kids and catch up.
- 12.00.21 CARTER (OS)-Sir –
- 12.01.27 O'NEILL-Go!
- 12.12.06 TECHNICIAN-SG-1's code, sir.
- 12.14.05 HAMMOND-Here they come. people. Doctor, stand by to receive refugees.
- 12.18.11 DR. FRAISER-Yes, sir.
- 12.30.26 DANIEL-Don't be afraid. The others'll be waiting for you on the other side.
- 12.34.18 CARTER (INTO RADIO)-Sir, this is Carter. We've begun the evacuation. What's your ETA? Colonel, we're getting multiple strikes now, please respond.
CARTER (CONT)-Nothing.
- 12.57.24 TEAL'C-That is the last of them. The rest wish to remain behind.

- 13.00.19 CARTER-How many?
- 13.01.14 TEAL'C-Approximately one third of the village.
- 13.03.03 DANIEL-What?
- 13.04.10 CARTER-Why don't you go through to let the Edorans know that everything's alright.
We'll be on your six.
CARTER (INTO RADIO)-Colonel, please respond.
- 13.15.13 LAIRA (OS)-Garan. Naytha.
- 13.16.27 GARAN (OS)-Mother, this is where the ancestors...
GARAN (CONT)-survived. We brought food and, and some water.
- 13.21.09 O'NEILL (OVERLAPPING)-Garan – try this my way.
- 13.31.22 CARTER-It's getting too dangerous, Teal'c.
- 13.33.27 TEAL'C-I will remain until O'Neill returns.
- 13.36.04 CARTER-He can dial home when he gets here.
- 14.01.16 TECHNICIAN-We're losing wormhole stability.

- 14.20.23 CARTER (OS)-Colonel O'Neill...
- CARTER (CONT)-went to help some villagers. We waited till the last possible moment, sir.
- 14.24.21 HAMMOND-I know you did. We almost lost you.
- 14.26.18 TEAL'C-General Hammond, I wish to return immediately with a search party.
- 14.29.05 CARTER-You can't Teal'c. That last hit was right on top of the gate. You'd be walking into a firestorm.
- 14.33.03 TEAL'C-I am willing to take that risk.
- 14.34.19 HAMMOND-I'm not willing to let you.
- 14.35.29 CARTER (OS)-We could wait twenty four hours...
- CARTER (CONT)-and sent a MALP through, sir.
- 14.38.20 HAMMOND (OS)-Major Carter's right. If it's safe by tomorrow, you'll all go.
- 14.56.06 O'NEILL (OS)-Carter, Teal'c.
- 15.16.14 O'NEILL-It's still pretty hot out there. We should stay put.

15.24.21 O'NEILL (OS CONT)-There's good news.
O'NEILL (CONT)-It's raining. Should put out some of the fires.

15.29.22 LAIRA-Could you see the village?

15.32.27 O'NEILL-No.

15.37.08 Garan, we had a plan

15.41.11 GARAN-Daniel said there's nothing you could do.

15.43.25 NAYTHA-We were afraid.

15.53.06 O'NEILL-Me, too.

16.13.23 TECHNICIAN-Chevron six encoded

16.24.19 TECHNICIAN-Chevron seven...

16.30.00 locked.

16.35.22 Wormhole established.

16.37.18 CARTER-Thank God.

16.38.21 TECHNICIAN (OS)-Standing by for...
TECHNICIAN (CONT)-MALP deployment, sir.

- 16.41.01 HAMMOND-Send it through.
- 16.48.26 TECHNICIAN-The MALP should reach Edora in four,...
- TECHNICIAN (OS CONT)-three, two...
- TECHNICIAN (CONT)-one. We should be receiving telemetry now, sir.
- 07.13.14 TECHNICIAN-No signal.
- 17.14.26 TECHNICIAN #2 (OS)-Environmental reports no telemetry.
- 17.17.14 FEMALE TECHNICIAN (OS)-Communications no telemetry.
- 17.20.19 CARTER-Then the MALP must have been destroyed as soon as it reached the other
 side. There's no other explanation.
- 17.26.28 HAMMOND-Shut it down.
- 17.31.20 HAMMOND (OS)-Until you can provide me...
- HAMMOND (CONT)-with answers to this problem, the rescue mission is scrubbed.
- HAMMOND (OS CONT)-Inform our visitors they'll be staying with us...
- HAMMOND (CONT)-until we can make a proper assessment of our situation.
- 17.40.28 DR. FRAISER-Yes, sir.
- 18.16.20 LAIRA-Paynan?

08.20.20 PAYNAN-Laira

18.24.28 LAIRA-It is alright.

18.26.15 PAYNAN-One struck Talmar's home.
PAYNAN (OS CONT)-Three families were inside.
PAYNAN (CONT)-We are all that are left.

18.38.12 LAIRA-Why did you stay?

18.40.18 PAYNAN-On the third day we could take no more. We fled to the stone ring, where it
 used to be.

18.52.16 O'NEILL-Used to be?

19.29.27 LAIRA-It's gone.

19.38.22 I'll never see my people again. They can never come home.

19.46.22 O'NEILL-No.

19.51.00 LAIRA-And you?

20.27.24 LAIRA-Thanks be to the ancestors that we live and have a roof to shield our heads.
 Thanks be to the ancestors that we have food to sustain and nourish us.

21.54.00 CARTER (OS)-So it's possible that...
CARTER (CONT)-the molten naquada hardened just above the event horizon.

21.58.10 DANIEL-Like an iris.

22.00.09 CARTER-Yeah.

22.04.08 HAMMOND-Sergeant, shut it down.

22.06.00 TECHNICIAN-Yes, sir.

22.09.09 HAMMOND-That was our last shot, people, and I'm calling this one. As of right now
I'm officially declaring him missing in action.

22.15.18 TEAL'C-General Hammond, perhaps the door can be reached by another means.

22.17.23 DANIEL-That's right. The Tok'ra could send a ship.

22.19.12 CARTER (OS)-Or the...
CARTER (CONT)- Tollen.

22.20.13 DANIEL (OS)-Let me at least...
DANIEL (CONT)-contact those of our allies that are capable of interstellar travel, see if
they're willing to help.

- 22.26.29 HAMMOND-Very well, Doctor.
- 23.09.15 LAIRA-I thought you might like a clean workshirt. My husband never wore it. I made it
 for him just before he died.
- 23.18.27 O'NEILL-There's a chance the Stargate is just buried –
- 23.20.17 LAIRA (OS OVERLAPPING)-We have to rebuild...
 LAIRA (CONT)-before the harvest, and there are very few of us now.
- 23.51.07 HAMMOND (OS)-Wormhole physics –...
 HAMMOND (CONT)-a field, Major, that you pioneered, – states that under these
 conditions ordinary matter won't even re-integrate on the other side. There's no
 way to overcome that.
- 24.01.11 CARTER-I think there is, sir. And I'm not the one who thought of it. Sokar did.
- 24.05.15 HAMMOND-Sokar?
- 24.06.04 CARTER (OS)-Yes, sir,...
 CARTER (CONT)-when he tried to breath the iris by bombarding it with a particle
 beam. Subatomic particles, barely small enough to re-integrate, produced
 energy as they decayed.

- 24.15.19 HAMMOND-Which caused the iris to heat up.
- 24.16.29 CARTER (OS)-Exactly.
CARTER (CONT)-Now, if we could do the same thing, we could melt the hardened
 naquada barrier just above the event horizon and create a pocket of super
 heated gas.
- 24.25.01 HAMMOND-Then what?
- 24.25.21 CARTER (OS)-Well, then all we have to do is open the gate again, sir.
CARTER (CONT)-The unstable vortex it normally generates would then be allowed to
 expand into that pocket and create an even larger cavern.
CARTER (OS CONT)-One person...
CARTER (CONT)-might be able to go through, sir, and dig it out.
- 24.41.09 HAMMOND-I think we can safely assume Teal'c would volunteer. But –
- 24.45.15 CARTER (INTERRUPTING)-We don't have a particle beam generator, sir. We'd have
 to build one.
- 24.57.03 HAMMOND-Then you'd better get started.
- 25.13.19 GARAN-You, uh, missed evening meal. Brought you something.

25.18.05 O'NEILL-Wasn't hungry.

25.20.20 GARAN-Well, you gotta be. You worked all day in the fields.

25.27.08 O'NEILL-I got a couple of hours of good light left.

25.31.10 GARAN-I'm sorry.

25.35.04 O'NEILL-For what?

25.36.28 GARAN-You can't go home.

GARAN (OS CONT)-It's my fault.

25.41.06 O'NEILL-No it's not.

26.04.01 DR. FRAISER-You working through the night again?

26.05.26 CARTER-Yeah. Lot of work to do. Thank you.

26.09.08 DR. FRAISER-Look, Sam, there's not doubt you are going to solve this – but you have
to accept the fact that it's going to take time.

26.16.06 CARTER-Yeah, well, if I think that way it could take months.

- 26.20.15 DR. FRAISER-Daniel says the Tollen could have a ship in the vicinity of Edora
sometime early next year.
- 26.26.20 CARTER-He shouldn't have to wait that long.
- 26.30.15 DR. FRAISER-You miss him.
- 26.30.10 CARTER-Yeah.
- 26.38.13 DR. FRAISER-Is this a problem?
- 26.40.02 CARTER-No. No, of course not.
- 26.45.04 DR. FRAISER-Okay. Goodnight.
- 26.48.09 CARTER-G'night.
- 27.31.11 LAIRA-Many of us fear the fire rain will come again. Do you?
- 27.35.28 O'NEILL-No. If Daniel was right, and he always is, it'll be another hundred and fifty
years before that happens again. It's a long time. I was just kinda wondering
which direction home was.
- 27.58.04 LAIRA-This way.

- 28.00.19 O'NEILL-No, I meant --
- 28.01.13 LAIRA (INTERRUPTING)-I know what you meant. Come. I'd like your company.
- 28.12.15 O'NEILL-I don't even like my company right now.
- 28.15.16 LAIRA-You will again. Loss is that way. I mourned my husband for a hundred days. I never left my house. I never spoke to anyone.
- 28.32.26 O'NEILL-After that?
- 28.34.29 LAIRA-I left my house. And I spoke to people. Walk with me.
- 29.06.05 NARRATIVE TITLE-Three months later.
- 29.35.18 LAIRA-You left this at home.
- 29.37.11 O'NEILL (OS)-Oh, yeah, yeah.
- 29.48.03 LAIRA-Paynan has invited you to evening supper.
- 29.51.03 O'NEILL-Why? He doesn't even like me.
- 29.53.13 LAIRA-He's very grateful for all the help you've given him in rebuilding his home.

29.58.00 O'NEILL-I just hammered a few nails. Well, actually, I made the nails first and then I
hammered them, but –

30.04.03 LAIRA-Still, you've worked very hard. Thank you.

30.07.01 O'NEILL-Anything I can do.

30.09.18 LAIRA-There is something.

30.12.06 O'NEILL (OS)-Yeah.

O'NEILL (CONT)-What?

30.15.23 LAIRA-No, it's too soon.

30.17.19 O'NEILL (OS)-No, c'mon,...

O'NEILL (CONT)-don't...do that. What?

30.22.10 LAIRA-You'll know when the time comes.

30.26.08 O'NEILL-I need a little help here. A hint.

30.39.22 LAIRA-Does that help?

30.42.17 O'NEILL-A little.

- 31.01.22 CARTER (FILTERED THRU LOUDSPEAKER)-Initiating beam firing sequence... now!
- 31.14.25 CARTER-Particle beam is operating at a hundred and twelve percent of predicted efficiency.
- 31.18.10 HAMMOND-How long will the beam have to be maintained?
- 31.20.10 CARTER (OS)-The longer the better, sir.
CARTER (CONT)-The important thing will be to dial again as quickly as possible as soon as it shuts down.
- 31.40.29 PAYNAN-So, what'd'ya think?
- 31.43.23 O'NEILL-Absolute rot gut. More, please.
- 32.10.16 O'NEILL-What just happened?
- 32.12.10 LAIRA-The ancestors guided him to the one they wish him betrothed.
- 32.19.09 O'NEILL-He was peeking. What?

- 32.57.20 TECHNICIAN (OS)-MALP should be arriving at the Edora...
TECHNICIAN (CONT)-gate in three, two, one.
TECHNICIAN (OS CONT)-Receiving telemetry. No, wait, wait – we've lost it. There's
 no signal.
- 33.12.22 HAMMOND-What's happened?
- 33.13.17 TECHNICIAN (OS)-Transmission...
TECHNICIAN (CONT)-interrupt at the source.
- 33.15.09 CARTER-Play back the visual.
- 33.18.22 CARTER (OS CONT)-Whoa, there. See?
- 33.23.15 TEAL'C-The gate is horizontal as you thought, Major Carter.
- 33.26.01 CARTER-And the MALP just slipped back through the even horizon. It means the
 vortex will have dug part...
CARTER (OS CONT)-way to the surface. Teal'c, you'll need to secure...
CARTER (CONT)-yourself above the event horizon as soon as you're on the other
 side. And you'll have to carry everything you need.
- 33.37.00 TEAL'C-I understand.

33.39.11 HAMMOND-I hope you do, son. Because if you fail to dig your way to the surface, this
will be a one way trip.

33.59.24 O'NEILL-Garan?

34.01.01 LAIRA-Just us.

34.05.15 O'NEILL (WHISPER)-Oh.

34.09.16 O'NEILL (CONT)-Well, apparently I should expect a massive headache tomorrow, so I
should get a headstart.

34.25.12 LAIRA-Do you remember when I told you there was something you could do for me?

34.36.17 I want you to give me a child.

34.41.26 O'NEILL-A child?

34.44.27 LAIRA-I wanted to be patient. I wanted to wait until you had let go of the life you left
behind,...

LAIRA (OS CONT)-until you knew that you belonged with us.

LAIRA (CONT)-Tonight, I see it in your eyes.

35.05.22 O'NEILL-Laira...you should know ... a part of me is never gonna let go of what I left
behind.

- 35.17.13 LAIRA-Oh, well – that’s not the part I want.
- 36.03.09 O’NEILL-Crap.
- 36.20.24 PAYNAN-She is a fine woman.
- 36.26.02 O’NEILL-Yes, she is.
- 36.28.23 PAYNAN-Took you long enough to see that. I was afraid you were going blind.
- 36.32.26 O’NEILL (OS)-No,....
O’NEILL (CONT)-if I’ve gone blind, it’s from whatever we were drinking last night.
- 36.46.24 PAYNAN-Tolka. Has a bite to it.
- 36.51.12 O’NEILL (OS)-Hm, yeah.
- 37.09.00 TEAL’C (OS)-General Hammond,....
TEAL’C (CONT)-I’ve secured myself on the other side.
- 37.13.27 HAMMOND-Understood, Teal’c.
- 37.16.01 TEAL’C-I will begin immediately.

37.30.04 O'NEILL-Going somewhere with that stuff?

37.32.29 LAIRA-I just thought you might not need these things anymore.

37.35.02 O'NEILL-Well, hang on, some of that's pretty good, the jacket is, uh --

37.38.14 LAIRA-Does it remind you of home?

37.46.15 O'NEILL-Toss it.

37.48.21 LAIRA-Are you sure?

37.52.16 O'NEILL-Yeah.

38.16.04 DANIEL-What's your progress, Teal'c?

38.21.12 TEAL'C-It is most difficult, Daniel Jackson.

38.25.04 CARTER-The gate will shut down automatically in sixty seconds. At that point...

CARTER (OS CONT)-we won't be able to open it again from this side. The vortex
would...

CARTER (CONT)-vaporize everything within the cavern.

- 38.34.21 HAMMOND-You'll have a maximum of four hours of oxygen once we're cut off.
HAMMOND (VO FILTERED)-If you haven't reached the surface by that time, –
- 38.41.05 TEAL'C-Then you may want to wish me Rel tora ke.
- 38.46.14 DANIEL-Good luck, Teal'c.
- 39.01.13 CARTER (VO FILTERED)-Fifteen seconds till shut down.
39.06.06 Ten seconds till shut down. Five seconds.
- 39.27.05 O'NEILL-Curling. Big, where my grandfather's from, in Northern Minnesota. Throw a
big, round, kind of slab of rock down this slab of ice and you sweep... What?
- 39.49.15 LAIRA-When I was taking your things away today, I thought I heard a sound come
from this.
- 39.58.16 Perhaps a voice.
- 40.14.18 O'NEILL-This is Colonel Jack O'Neill. Come in.
- 40.20.00 TEAL'C (OS)-O'Neill.
- 40.20.28 O'NEILL-Teal'c, where the hell are you?
- 40.23.01 TEAL'C-Attempting to reach the surface. Little oxygen remains, O'Neill.

40.27.23 O'NEILL-I got you on R.D.F signal.

40.33.22 I'm right on top of you.

41.11.26 O'NEILL (OS ECHO)-Teal'c!
O'NEILL (CONT)-You are one, stubborn son of a bitch!

41.37.04 CARTER-So when the third MALP sent back just a few seconds of telemetry, we knew
the gate was horizon-...tal...
CARTER (OS CONT)-and—
CARTER (CONT)-Is he alright?

41.48.13 DANIEL (OS)-He's fine.
DANIEL (CONT)-I just don't think he was expecting to go home again.

41.57.17 LAIRA-You must be very happy to be going home.

42.01.00 O'NEILL-No, I'm not.

42.03.08 LAIRA (OS)-You don't have to.

42.07.07 O'NEILL-Come with me.

42.09.22 LAIRA-I belong here.

42.14.15 O'NEILL-Well, I'll come back. Soon. We still have that treaty to talk about.

42.22.28 LAIRA (OS)-Of course.

LAIRA (CONT)-Our two worlds are going to be friends.

42.33.06 LAIRA (OS CONT)-Closer friends.

42.41.04 LAIRA (OS)-Fair day, and be well.

43.01.27 FADE TO BLACK. BEGIN END CREDITS

44.19.00 LAST FRAME PICTURE.
