TIMECODE DIALOGUE

START TIMECODE 00.00.00 AT FIRST FRAME OF PICTURE

TEASER

00.09.13 CARTER – The MALP readings indicate a very low UV level. All other indications suggest a positive environment.

O'NEILL – Sounds good.

DANIEL – It's going to take us two weeks to get the Enkarans...

DANIEL (OS CONT) – fully...

DANIEL (CONT) – transplanted.

TEAL'C – If the planet proves...

TEAL'C (OS CONT) - to be...

TEAL'C (CONT) - suitable.

DANIEL (OS) – It better be. They're running out of time.

00.36.00 TECHNICIAN – Chevron Seven won't engage...

00.44.27 TECHNICIAN (CONT) - I don't understand it. The diagnostic shows no problems.

00.52.22 CARTER (FILTERED) – Sir, this is gonna take awhile...

1.02.28 CARTER (OS) – It looks like there was an ener--

01.04.06 CARTER (CONT) –gy spike in our power log about eight...

01.05.26 CARTER (OS CONT) – minutes before we first tried dialing out.

DANIEL – Uh, correct me if I'm wrong, but isn't that something we've seen before
when another gate is being used on Earth?

01.12.16 O'NEILL – Like when Maybourne's NID guys had the other gate?

01.15.23 TEAL'C – There is no longer a second Stargate on Earth.

01.18.16 HAMMOND (OS) – Ours was destroyed along with Thor's ship.

CARTER (OS) – But if there was another gate, and its use was re--

01.22.13 CARTER (CONT) –sponsible for the energy spike, there might be a corresponding
seismic tremor, like when the gate was found in Antarctica.

01.29.09 TECHNICIAN (OS) – I've...

01.29.12 TECHNICIAN (OS CONT) – got something.

01.34.03 CARTER (OS) – There was a minor seismic event...

CARTER (CONT) – that matches the time in our power log exactly.

01.42.21 O'NEILL – Is that Siberia?

01.45.09 CARTER – Yes sir. There’s only one explanation I can think of.

01.49.09 DANIEL – The Russians have a Stargate?

ACT ONE

02.59.15 HAMMOND (OS) – The Russians recovered the Stargate from the bottom of the ocean.

O’NEILL (OS) – I thought we swept that entire area.

HAMMOND – We’re talking about hundreds of square miles, Colonel. The Russian Navy was on alert because they picked up Thor’s ship on satellite. They must’ve got lucky and beat us to it.

03.15.00 CARTER – And they’re admitting it?

03.17.00 HAMMOND – We didn’t give them much choice, Major. The Pentagon said we had the evidence that...

03.22.03 HAMMOND (OS CONT) – could prove it.

DANIEL (OS) – Obviously they’ve figured out how it works.

03.23.02 CARTER – It took us years.

HAMMOND (OS) – Apparently...

03.27.15 HAMMOND (CONT) – the Russians know quite a bit about the SGC.

03.30.20 O'NEILL – How?

03.31.11 HAMMOND – They didn't say. How they got it open isn't the issue right now either.

The problem is, it won't close.

03.38.15 DANIEL – Well that doesn't make any sense. I mean, shouldn't it eventually shut
down on its own?

TEAL'C (OS) – The...

03.42.10 TEAL'C (CONT) - Goa'uld themselves have not been able to sustain a wormhole for
longer than thirty-eight minutes.

03.46.02 O'NEILL – What about another black hole planet?

CARTER (OS) – We would detect the gravitational...

03.49.05 CARTER (CONT) – anomaly, sir.

03.50.24 HAMMOND (OS) – The Russian government is divid--

03.52.09 HAMMOND (CONT) –ed on how to deal with the situation. It seems the Russian President didn't support setting up a Stargate program in the first place. Until we called, they were planning on bombing the facility...

04.02.15 HAMMOND (OS CONT) – and covering the whole thing up.

O'NEILL – And now?

04.05.02 HAMMOND – One of the Russian scientists involved in starting the program convinced them to send in a team to assess the situation and determine if it can be resolved in another way.

04.15.10 CARTER – Who's the scientist?

04.16.15 HAMMOND – Dr. Svetlana Markov.

04.19.12 CARTER – Wow, I, I know her work. She's brilliant.

04.22.08 HAMMOND – And she knows about you, too, Major. To that end, she's convinced Moscow to let SG1 be the team that goes to Si--

04.29.23 HAMMOND (OS CONT) –beria.

O'NEILL – You're kidding.

HAMMOND (OS) – Jack, I'm thankful...

- 05.45.07 SVETLANA – Yes. And Dr. Daniel...
- 05.48.28 SVETLANA (OS CONT) – Jackson, and Teal'c.
- 05.52.07 CARTER – How do you know about the SGC?
- 05.54.05 SVETLANA – I have read extensive files on all of you.
- 05.57.03 O'NEILL – The question was, how?
- 05.59.10 SVETLANA – I learned to read English at the age of six. Not difficult.
- 06.04.09 O'NEILL – Russian humor.
- 06.06.13 SVETLANA – I will tell you what I can on the way...
- 06.29.29 SVETLANA (OS CONT) - I was first contacted shortly after Russian satellites picked
up what we believed was an alien spaceship entering the atmosphere.
- 06.38.26 O'NEILL – Alien spaceship, huh?
- SVETLANA (OS) – About two months ago...
- 06.42.00 SVETLANA (CONT) – It disintegrated during entry and crashed in the Pacific...
- 06.46.02 SVETLANA (OS CONT) – The Stargate was recovered after an extensive sweep of
the ocean floor...

06.50.12 SVETLANA (CONT) – During that search one of our Fox-trot submarines went missing. You may be familiar with the incident.

06.57.16 O'NEILL – Not a clue.

07.01.08 SVETLANA – I was assigned to the program as chief science officer, second in command to Colonel Sokalov...

07.07.17 SVETLANA (OS CONT) – We've been in operation for thirty-seven days...

07.10.22 SVETLANA (CONT) – albeit, against the wishes of certain very powerful people in the government.

07.16.20 CARTER – What did they want to do?

SVETLANA – They threatened to expose the existence of your program.

07.23.11 O'NEILL – To what end?

07.25.00 SVETLANA – To get the U.S. to share the technology you have attained.

07.30.12 CARTER – So what stopped them?

SVETLANA (OS) – We...

07.31.24 SVETLANA – activated our gate. I convinced the military that we could benefit from our own program more than we could trust you.

07.41.26 O'NEILL – Ah.

07.43.08 DANIEL – How did you activate?

07.46.23 SVETLANA – We have a dialing device.

07.50.09 DANIEL – A DHD. You found the one from Giza.

07.54.06 SVETLANA (OS) – It was confiscated from the Germans after the second World War.

CARTER – Well now...

07.59.12 CARTER (CONT) - I understand how you can send your people through and get them
to return to your gate instead of ours.

08.04.11 O'NEILL – That makes one of us.

08.07.01 SVETLANA – Our gate superseded yours as long as the dialing device was
connected...

08.12.03 SVETLANA (OS CONT) – We only kept it...

08.13.02 SVETLANA (OS CONT) – connected when we were using it to...

08.14.21 SVETLANA (CONT) – prevent any crossover. It required precise timing, but it worked.

08.19.21 O'NEILL – Til now.

SVETLANA (OS) – As for the current situation...

- 08.23.15 SVETLANA (CONT) – I really don't know what has happened. There has been no contact with the base since yesterday at twelve hundred hours.
- 08.31.29 CO-PILOT (OS) – Sir, we have a visual and target runway...
- 08.35.09 CO-PILOT (OS CONT) – It appears to be iced over and there's no response from the control tower.
- 08.39.03 SVETLANA – We're going to have to jump.
- 08.42.21 DANIEL – Out of the plane?
- 08.47.15 SVETLANA – I'm going with or without you, Colonel.
- 08.52.11 O'NEILL – I suppose you expect my male bravado to kick in right about now.
- 08.56.08 SVETLANA – I've read your file.
- 08.57.23 O'NEILL – No mention of bravado, eh?
- 09.01.25 SVETLANA – There are forty-seven people down there who may need our help.
- 09.06.05 O'NEILL – Look, you don't have to tell me what's at stake here. We've got seven teams off world who can't get home until we fix what you screwed up...
- 09.25.28 O'NEILL (CONT) – Stu...

- 09.28.10 O'NEILL (CONT) – Gear 'em up. For a jump.
- 09.41.18 TEAL'C – I do not understand, O'Neill.
- 09.43.15 O'NEILL – It's called a parachute.
- 09.45.25 CARTER – It slows your descent after you jump out of the plane.
- 09.48.29 TEAL'C – This device seems to be poorly designed to provide such a function.
- 09.52.23 O'NEILL – It opens after you jump. Don't worry about it, I've done it hundreds of times.
- 10.00.05 SVETLANA – I assume you brought gas masks.
- 10.03.23 O'NEILL – Yeah. We thought somebody should be prepared.
- 10.10.20 SVETLANA – Is he always like this?
- 10.13.02 CARTER – Actually, this is quite charming.
- 10.33.15 CO-PILOT (OS) – Gear's away, sir.

10.39.16 O'NEILL – It's easy. Just jump, and pull this.

TEAL'C – This does not seem wise, O'Neill.

O'NEILL – I said it was easy, not wise.

10.48.20 SVETLANA – If we get separated, we'll rendezvous at the base.

11.03.06 TEAL'C – This does not seem wise.

11.22.01 O'NEILL (OS) - Teal'c? Daniel? Come in. There's been no response on the radios.

SVETLANA (OS) – Their signals may be blocked. If, if they are already inside...

11.46.02 SVETLANA (OS CONT) – Up there.

O'NEILL (OS) - Teal'c, Daniel, do you read?

TEAL'C (OS FILTERED) – I am here.

O'NEILL (OS) – Where?

TEAL'C (OS FILTERED) – In the facility.

DANIEL (OS FILTERED) – Yeah, I'm here, too.

O'NEILL (OS) – Where?

DANIEL (OS FILTERED) – Well I don't know exactly. Where are you?

O'NEILL (OS) – We just got inside. Hang tight.

12.13.20 CARTER (OS) – I’m picking up trace amounts of chlorine.

O’NEILL (OS) – Yeah?

CARTER (OS) – Nothing dangerous at these levels, sir.

O’NEILL (OS) – Like what is this place?

CARTER (OS) – It obviously wasn’t built specifically for your Stargate program.

SVETLANA (OS) – It was an experimental power station.

CARTER (OS) – Experimental?

SVETLANA (OS) – All that I am allowed to say is that it was decommissioned two years ago.

O’NEILL (OS) – Oh please.

CARTER (OS) – Are there lights?

SVETLANA (OS) – The power seems to have been diverted from all non-essential base functions. This way to the main control center.

12.59.09 O'NEILL (OS) – Daniel? Is that you?

13.01.11 DANIEL (OS FILTERED) – I don't know. I'm heading down a long corridor.

13.04.16 O'NEILL (OS) - Which one?

13.08.22 DANIEL (OS) – This one.

13.14.18 SVETLANA (OS) – This way.

13.16.19 DANIEL (OS) – Actually you might want to see this first.

13.29.08 TEAL'C (OS) – These three were shot. I am unaware how these others died.

SVETLANA (OS) – These doors lead to the Stargate...

14.16.02 SVETLANA (OS CONT) – They're all dead.

ACT TWO

14.39.14 SVETLANA (OS) – I knew this [unintelligible]...

15.03.24 SVETLANA (CONT) – It's safe.

15.12.10 TEAL'C – The air is indeed clean.

15.26.26 CARTER – You okay?

15.28.00 SVETLANA – I knew these men and women, Major. Some of them quite well.

15.37.27 O'NEILL – So what happened here?

15.39.19 SVETLANA – Colonel Sokalov enacted the extreme measures protocol.

15.44.08 DANIEL – What's that?

SVETLANA (OS) – The Stargate room...

15.47.01 SVETLANA (CONT) – is sealed and Substance 35 is released throughout...

15.50.03 SVETLANA (OS CONT) – the base.

CARTER – Nerve gas.

O'NEILL – Nerve ga--

15.54.11 O'NEILL (OS CONT) –ass?

SVETLANA – It's okay, Colonel. It's a non-persistent gas. It...

15.58.08 SVETLANA (OS CONT) – evaporates after three hours. According to the computer
the protocol was enacted...

16.03.19 SVETLANA (OS CONT) – yesterday.

TEAL'C – For what reason?

16.06.28 SVETLANA – The computer log doesn't say.

16.09.28 O'NEILL – Alright, people were shootin' each other around here before they got gassed and I wanna know why?

16.14.12 DANIEL – We'll see what we can find out.

SVETLANA (OS) – This is a list of all personnel assigned to the base. They should all be wearing I.D. tags.

16.32.07 O'NEILL – So, what about the gate?

SVETLANA (OS) – It's an outgoing wormhole...

16.37.10 SVETLANA (CONT) – but, that doesn't make sense. The EM protocol cuts off the dialing device. If the protocol was enacted yesterday, where has the outgoing wormhole been drawing its power f--

16.54.00 SVETLANA (OS CONT) –rom since then?

CARTER – We've seen one draw power from the source at the destination.

- 16.58.23 SVETLANA – Of course. The Black Hole Incident.
- 17.04.03 O'NEILL – Is there anything you don't know?
- 17.06.19 SVETLANA – What were they doing?...
- 17.27.11 SVETLANA (CONT) – It's gone!
- 17.31.00 O'NEILL – If I ask what, and you say it's classified, I'm gonna shoot you.
- 17.37.00 SVETLANA – The seventh address we successfully dialed lead to a Stargate/entirely submerged under water...
- 17.44.19 SVETLANA (OS CONT) – We sent a reconnaissance dr--
- 17.46.06 SVETLANA (OS CONT) –one and found the dialing device, so it was de--
- 17.49.11 SVETLANA (CONT) –cided that the manned mini-submarine would go next. A sample of the water was retrieved. It seemed to have unbelievable properties.
- 18.00.06 CARTER – Like what?
- 18.01.23 SVETLANA – It was spontaneously emitting energy in the form of heat. If this liquid turned out to be an abundant, clean energy...
- 18.10.25 SVETLANA (OS CONT) – source—
- CARTER – Uh, that doesn't seem possible.
- SVETLANA (OS) – I was called away to...

18.14.03 SVETLANA (CONT) – Moscow before I could perform any significant analysis.

18.17.19 CARTER – So now you're saying the water sample is gone?

18.20.24 SVETLANA – Yes. There was a sealed container being kept in this containment vessel.

18.27.06 CARTER – And the Stargate is dialed into the water planet now?

18.31.17 SVETLANA – Apparently, but, that doesn't make sense. They were supposed to continue on to the next two planets on our planned sequence and not revisit the water planet until I got back.

18.44.11 CARTER – Let's confirm it. Do you have another reconnaissance drone?

SVETLANA (OS) – We left the first one there. All we have to do is reactivate the receiver.

19.01.08 O'NEILL (OS FILTERED) – Daniel, Teal'c.

DANIEL – Uh, what's up?

O'NEILL (OS FILTERED) – Head back to the Control Room. Dr. Markov thinks you might want to see this.

- 19.14.01 TEAL'C (OS) – Thus far we have accounted for 28 of the 47 numbers on the list.
- DANIEL (OS) – Six of them were dressed as civilians, not...
- 19.19.00 DANIEL (CONT) – soldiers. They were all shot, and there was no apparent reason
 why.
- 19.23.07 SVETLANA – They were the scientists working in the lab.
- 19.26.01 O'NEILL – So the guys experimenting on that water gave the soldiers reason to shoot
 'em.
- 19.30.15 SVETLANA – So it seems.
- 19.32.28 DANIEL – What water?
- 19.34.20 CARTER – It was a sample brought back from the planet where the Stargate is
 submerged.
- 19.38.12 SVETLANA – I thought you might be interested, Doctor...
- 19.40.09 SVETLANA (CONT) – Jackson. We found some unusual ruins from an obviously
 extinct civilization on the ocean's floor...
- 19.48.02 SVETLANA (OS CONT) – Decoding signals from the reconnaissance drone.
- 19.54.07 DANIEL – Can you get closer?

19.57.02 SVETLANA – The drone is malfunctioning. I can only pan and tilt.

20.10.07 TEAL'C – Why would those men proceed through the Stargate knowing they will
drown on the other side?

20.20.01 CARTER – Can you shut off the drone--

20.21.01 CARTER (OS CONT) –'s transmitter from here?

SVETLANA – Why?

20.23.23 CARTER – Well even though the wormhole only allows matter to travel one way, we
are able to send radio signals back and forth.

20.29.13 SVETLANA – You think the drone's radio transmitter is what's keeping the gate open?

20.33.05 CARTER – That gate won't close if the drone is aiming a strong enough signal directly
into the event horizon.

20.37.11 SVETLANA – And the energy being emitted by the water has allowed the gate to stay
open...

20.41.10 SVETLANA (OS CONT) – this long.

CARTER – Exactly. But it's a combination of factors, but all we have to do is shut off
the drone.

20.49.27 SVETLANA (OS) – It’s not responding to my command...

20.52.06 SVETLANA (CONT) - I can’t shut it down.

20.55.10 CARTER – How long before its batteries die?

20.57.03 SVETLANA – The drone is nuclear powered.

21.00.29 O’NEILL – A nuclear powered drone?

21.03.01 SVETLANA – We built several of them. We thought we might want to leave them on
other planets for long-term observation.

21.09.22 CARTER – How long-term?

21.14.08 SVETLANA – Ten years...

21.22.23 SVETLANA (OS CONT) – It will be simple to...

SVETLANA (CONT) – deactivate the drone from the other side.

CARTER – Once it stops transmitting its signal the wormhole should close.

DANIEL – I’d like to get a closer look at those ruins.

21.33.02 O’NEILL – How many people does that thing hold?

21.35.02 SVETLANA – Three.

21.35.28 O'NEILL – Oh, dang. I've never been in a submarine before.

22.07.00 DANIEL – Spacious. Roomy. Very nice...

22.12.09 DANIEL (OS CONT) – So exactly...

DANIEL (CONT) – how much air do we have in this thing?

SVETLANA – Over a day's worth. We won't need more than an hour...

22.28.04 SVETLANA (CONT FILTERED) – Colonel, can you hear us?

O'NEILL – Yeah I read you.

22.31.28 SVETLANA (FILTERED) – Pressurizing and proceeding through the gate.

22.58.09 O'NEILL – Good luck.

23.00.13 CARTER (FILTERED) – Thank you.

ACT THREE

23.28.26 CARTER (OS) – Wow.

23.30.15 SVETLANA (OS) – It is...

23.31.08 SVETLANA (CONT) – quite beautiful.

DANIEL – What?

23.33.25 SVETLANA – The rapid pressurization might cause your ears to block. As you might notice, there...

23.40.08 SVETLANA (OS CONT) – is no plant or animal life.

23.43.15 DANIEL – Doesn't appear to be any plant or a--

23.44.23 DANIEL (CONT) –nimal life.

CARTER – Colonel, do you read?

23.49.20 O'NEILL – Yeah.

DANIEL (OS) – We're...

23.50.29 DANIEL (CONT) - counting five bodies on this side.

23.53.20 TEAL'C – Which means there could be several personnel unaccounted for.

O'NEILL – Alright, we'll have another look around.

24.01.07 SVETLANA (FILTERED) – We're capturing the drone. Once it is inside the con--

24.04.23 SVETLANA (OS CONT FILTERED) –tainment tank, we can deactivate it, and if Major Carter is right...

24.09.27 SVETLANA (CONT FILTERED) – the gate will shut off. Ending transmission. Over and out.

24.25.00 O'NEILL – So let's have that look around.

24.54.19 SVETLANA – I'm glad you were right, Major.

CARTER (OS) – Well it still doesn't...

24.57.21 CARTER (CONT) – explain why your soldiers started shooting the scientists who were experimenting on the water.

25.02.07 SVETLANA – Or why those men were either forced through the gate, or felt compelled to go through on their own, knowing they would die.

25.11.25 DANIEL – Well the existence of the ruins suggests the planet wasn't always completely submerged. Maybe there's some clues down there.

25.17.21 SVETLANA – Let's have a look.

CARTER – Something wrong?

25.26.29 SVETLANA – The controls are getting heavy...

25.30.04 SVETLANA (OS CONT) – I haven’t touched the power yet we’re slowing down.

CARTER – Strong current?

25.34.17 SVETLANA – It’s possible. I’m pushing it to full power.

25.49.07 DANIEL – What’s that smell?

25.51.29 SVETLANA – We’ve completely stopped.

25.55.07 DANIEL (OS) – Uh...

DANIEL (CONT) - fire.

25.56.02 SVETLANA (OS) – Extinguisher.

26.11.09 DANIEL – It’s out. We’re okay...

26.21.24 DANIEL (CONT) - Can you fix it?

SVETLANA – Yes.

26.38.10 DANIEL – What?

26.40.03 CARTER – If it was a strong current it should be pushing us backwards now.

26.43.20 DANIEL – But it’s not.

26.45.01 CARTER – No. We’re completely stationary. It’s like we’re stuck in the mud.

26.51.10 DANIEL – Without the mud.

27.14.20 O’NEILL – What’s that smell?...

28.24.07 O’NEILL (CONT) – Holy frozen bad guys.

28.38.27 DANIEL – How’s it going?

SVETLANA – I think I can fix it.

DANIEL – Uh, wait. Five minutes ago you said you definitely could fix it. And now you just think you can?

SVETLANA – What do you want to hear?...

28.50.15 SVETLANA (OS CONT) – I don’t understand why this happened.

28.53.16 DANIEL – Well given the obvious solid craftsmanship that went into this thing I don’t see how this possibly could have happened.

28.58.00 SVETLANA (OS) – If you’re implying that everything Russian-made is of poor quality,
actually, the...

SVETLANA (CONT) – sub...

SVETLANA (OS CONT) – is Swiss.

29.05.10 DANIEL – So they occasionally catch fire but they keep perfect time...

29.12.09 DANIEL (CONT) – Sorry. I think I’ve been hanging around Jack O’Neill too much.

SVETLANA – There was nothing impeding us. This shouldn’t have happened.

CARTER (OS) – Well here’s something else that shouldn’t be happening. The outside
pressure is increasing.

SVETLANA – What?...

29.36.20 SVETLANA (OS CONT) – The gauge must be malfunctioning.

29.38.23 DANIEL – But it’s Swiss.

CARTER (OS) – Ou--

29.40.08 CARTER (OS) —ur depth is constant, and pressure should be relative to depth.

29.44.22 DANIEL – And if it keeps increasing?

29.48.15 SVETLANA – The sub will implode.

ACT FOUR

30.14.10 TEAL'C – We know how the Russians acquired their information.

30.25.17 O'NEILL – Solid. Woah! Woah ho.

30.31.06 TEAL'C – Do not humans usually die when they are frozen?

30.34.20 O'NEILL – Usually. They usually don't breathe when they're dead, either.

30.48.11 DANIEL (OS) – So Svetlana...

DANIEL (CONT) – Could you go over exactly what happened...

DANIEL (OS CONT) – the last time you were here?

SVETLANA – We came through the Stargate just as we did this time. We took the
 sub straight to the dialing device and re-dialed Earth. The gate opened and we
 headed thr--

31.04.28 SVETLANA (OS CONT) –ough.

DANIEL – That's it?

31.08.11 SVETLANA – We collected the water sample just before heading back through the
 event horizon.

31.13.15 CARTER – No trouble?

31.15.21 SVETLANA – We had to push the engines a little harder to get through the gate, but I suspected it was some kind of intuitive counter-measure intended to keep the water from flowing through the gate.

31.26.16 CARTER – It’s possible. But my research indicates that the gate actually has the ability to use density, molecular structure, and the force being exerted on the event horizon to determine whether something...

31.36.21 CARTER (OS CONT) – is actually trying to pass through.

SVETLANA – I know. That’s where I got the idea.

31.59.15 O’NEILL – Maybourne?

32.05.10 TEAL’C – His heart is beating. Albeit slowly...

32.11.03 TEAL’C (CONT) – He is getting warmer, O’Neill.

32.15.01 O’NEILL – Maybourne! You hear me?

32.55.00 CARTER – We’re not goin’ anywhere, are we?

33.04.17 DANIEL – What’re you doing?

SVETLANA (OS) – Pu--

- 33.06.03 SVETLANA (CONT) --shing the engines harder will only burn them out again. Next
time I may not...
- 33.10.05 SVETLANA (OS CONT) – be able to fix them.
- DANIEL – And if we stay here we'll run out of air.
- 33.14.05 SVETLANA – If the pressure keeps increasing at the current rate, the sub will implode
long before we run out of air.
- 33.20.22 DANIEL – Or that.
- 33.24.14 CARTER – I figure we have maybe an hour.
- 33.27.16 SVETLANA (OS) - I a—
SVETLANA (CONT) --gree. The front bubble will be most susceptible. It will be the
first to go.
- 33.34.11 DANIEL – Uh, could we stop agreeing on how we're gonna die and start doing
something about it?
- 33.53.06 O'NEILL – Alright, that's far enough. Maybourne. Maybourne, stop! Move again and
I'll shoot. Damn!
- 34.32.02 MAYBOURNE – Jack. The freezer.

- 34.35.17 O'NEILL – What?
- 34.36.17 MAYBOURNE – Move if you wanna live. Shoot me...
- 34.39.17 MAYBOURNE (OS CONT) – if you want to. We're dead if we don't move now.
- 34.46.05 O'NEILL - Teal'c.
- 34.54.05 O'NEILL (OS) – What are you doing?
- MAYBOURNE (OS) – It's too late for him. Jack! You...
- 34.57.04 MAYBOURNE (CONT) – open that door and we're both dead, I swear...
- 34.59.16 MAYBOURNE (OS CONT) – You can't help him.
- O'NEILL – Get the hell outta my way...
- 35.11.08 O'NEILL (CONT) – What the hell's goin' on here?
- 35.18.20 DANIEL (OS) – You said it's like we're being held here.
- 35.20.19 CARTER – Like something is squeezing the sub.
- 35.23.03 SVETLANA – There's only water out there.
- 35.26.09 DANIEL – What if it's not water?

35.31.14 CARTER – Exactly what tests did you run on the sample when you brought it back?

35.34.25 SVETLANA – As I said, we had begun preliminary analysis. It was being kept in a sealed con--

35.40.13 SVETLANA (OS CONT) –tainer. It hadn't even been opened yet when I went away.

CARTER – How did you know it was giving off energy?

35.46.15 SVETLANA – The container maintained a temperature several degrees above room temperature.

35.52.15 CARTER – And you never performed a chemical analysis?

SVETLANA (OS) – I...

35.54.28 SVETLANA – insisted the proper controls be set up. They were supposed to wait until I got back.

36.03.09 CARTER – But they didn't.

36.05.01 SVETLANA – Colonel Sokalov was under a lot of pressure to prove that the money being spent was going to be worth it.

36.11.20 DANIEL – So we don't know that's actually water out there.

36.20.29 MAYBOURNE – It’s alive.

36.27.06 O’NEILL – What?

MAYBOURNE (OS) – The water...

36.31.02 MAYBOURNE (CONT) – When they exposed it to the air and started chemical analysis it just evaporated. Turned into vapor.

36.37.09 O’NEILL – You were there?

MAYBOURNE (OS) – We inhaled it...

36.40.16 MAYBOURNE (CONT) – Didn’t give us a choice.

O’NEILL (OS) – Who’s us?

MAYBOURNE – Scientists in the lab. I knew what was going on but I, I couldn’t control myself. They wanted to go back through the Stargate.

36.53.02 O’NEILL – Who’s they?

36.54.29 MAYBOURNE – Life forms. In the water. Countless numbers of microscopic organisms. Intelligent life forms.

37.05.23 O’NEILL – Are you trying to tell me this water thinks?

- 37.08.19 MAYBOURNE – We were killing them. They forced us to try and take ‘em back through the gate. The...
- 37.12.16 MAYBOURNE (OS) – soldiers tried to stop us. There was shooting. If an infected man was killed...
- 37.16.07 MAYBOURNE (CONT) – the fluid came out of him and more were infected. It was chaos...
- 37.20.00 MAYBOURNE (OS CONT) – One of the infected soldiers managed to get to the DHD and get the gate open. That’s when the...
- 37.23.11 MAYBOURNE (CONT) – base commander enacted the EM protocol to stop it. The infected men started running through the gate, trying to escape the gas.
- 37.32.24 O’NEILL – Why didn’t you?
- MAYBOURNE (OS) – I was cut off from the gate room...
- 37.38.03 MAYBOURNE (CONT) – I think the liquid organisms inside me knew the only way to keep themselves alive was to escape the gas and freeze themselves. They forced me in here.
- 37.49.13 O’NEILL – You were frozen solid when we found you.
- 37.51.18 MAYBOURNE – They kept me alive.
- 37.53.10 O’NEILL – How do you know all this?

37.54.14 MAYBOURNE – I don't know how, exactly. I just knew. They must've communicated it to me.

37.59.14 O'NEILL – This is the stuff that's in Teal'c now. How do we get it out? Come on, Maybourne, it came out of you.

38.09.05 MAYBOURNE – They needed to go back. You wouldn't let me go. I guess they thought Teal'c could get 'em home.

38.30.27 DANIEL – What if it's a life form?

SVETLANA – That is pure assumption.

38.34.01 DANIEL – It would certainly explain everything.

38.36.19 CARTER – After you collected the sample you said you experienced resistance trying to go back...

38.40.10 CARTER (OS CONT) – through the gate.

DANIEL – It wasn't the gate causing the resistance. It was the life form trying to prevent you from leaving.

38.44.20 CARTER – And now it's perceiving us as some kind of threat.

ACT FIVE

39.02.29 O'NEILL (OS) - Teal'cl...

O'NEILL (CONT) - Teal'cl...

39.09.08 O'NEILL (OS CONT) – Fight it!...

O'NEILL (CONT) – Fight it!

39.28.21 SVETLANA – It's all we've got.

CARTER (OS) – The pressure...

CARTER (CONT) – alone—

40.03.20 CARTER – Daniel?

40.14.28 SVETLANA (OS) – What are you doing? What's he doing?

CARTER (OS) – Daniel.

DANIEL (OS) – I think it just wants to understand.

40.22.10 SVETLANA – What?

40.24.25 DANIEL – Us.

41.30.04 O'NEILL (OS) - Teal'c?

TEAL'C – They had no wish to kill me, O'Neill. They only want to travel home.

41.38.16 O'NEILL – That's good. You alright?

41.44.05 TEAL'C – I will be.

41.47.27 O'NEILL – Okay, I think we should duck...

42.08.05 O'NEILL (CONT) – Ahh. That had to hurt. Did--

42.20.01 O'NEILL (CONT) –n't you guys leave here in a submarine?

42.29.15 CARTER – We, uh—

42.30.29 DANIEL – Last thing I remember we were being pulled into the—

42.36.28 CARTER – Not really sure what happened, sir.

42.43.29 O'NEILL – Here's a thought. We just exchanged hostages. It's just a thought.
