TIMECODE

DIALOGUE

START TIMECODE 00.00.00 AT FIRST FRAME OF PICTURE

**TEASER**

00.10.18 CARTER (OS)- Looks like it was once an advanced civilization, sir.

00.14.02 DANIEL (OS)- No survivors.

00.16.00 O’NEILL (OS)- No bodies either.

00.17.18 DANIEL (OS)- Based on the overgrowth, I’m guessing this place was destroyed a long  
time ago.

00.30.09 CARTER (OS)- Faint energy readings definitely coming from here. Nothing dangerous  
as far as I can tell.

00.14.23 DANIEL (OS)- She’s perfectly preserved. This must be some sort of tomb or crypt of  
some kind.

01.23.23 CARTER- Or a science lab.

01.26.07 DANIEL- Why would you say that?

01.28.13 CARTER- Because these energy readings I'm getting seem to be coming from her.

**END TEASER**

**ACT 1**

02.56.12 TECHNICIAN- It's Colonel O'Neill, sir.

02.58.28 O'NEILL (FILTERED THROUGH VIDEO MONITOR)- General.

03.00.00 HAMMOND (OS)- Colonel. What do you have to report?

03.01.26 O'NEILL (FILTERED THROUGH VIDEO MONITOR)- Yeah, confirming initial Malp recon. Place is pretty much toast. However...

O'NEILL (OS CONT FILTERED THROUGH VIDEO MONITOR)- Carter did find something.

03.14.22 HAMMOND- Care to expand on that?

03.16.27 O'NEILL (OS FILTERED THROUGH VIDEO MONITOR)- She thinks it's a robot, sir.

- 03.19.11 CARTER (OS FILTERED THROUGH VIDEO MONITOR)- Sir...  
CARTER (CONT FILTERED THROUGH VIDEO MONITOR)- I'm positive this is some sort of artificial lifeform, but I can't be sure of anything more than that under these conditions. Request permission to bring it back to the SGC for...  
CARTER (OS CONT FILTERED THROUGH VIDEO MONITOR)- further evaluation, sir.
- 03.30.16 HAMMOND- Can you assure me that will be safe?
- 03.32.28 CARTER (FILTERED THROUGH VIDEO MONITOR)- Well, it appears to be inactive at the moment, sir. I'm getting only very faint energy readings. I believe we can isolate it safely...  
CARTER (OS CONT FILTERED THROUGH VIDEO MONITOR)- and I definitely think this is worth examining.
- 03.41.09 DANIEL (OS FILTERED THROUGH VIDEO MONITOR)- Uh, it...  
DANIEL (CONT FILTERED THROUGH VIDEO MONITOR)- also may be the last remnants of this civilization and the key to finding out exactly what happened here, sir.
- 03.47.25 HAMMOND- Very well. Bring it through.
- 03.49.28 DANIEL (FILTERED THROUGH VIDEO MONITOR)- Thank you.

03.50.25 CARTER (OS FILTERED THROUGH VIDEO MONITOR)- Thank you.

03.52.12 DANIEL (OS FILTERED THROUGH VIDEO MONITOR)- Out, sir.

04.12.08 CARTER- Hey, Janet.

04.13.05 FRAISER- Hey. How's the new toy?

04.14.29 CARTER- Amazing. This is more advanced than any android we've encountered  
before. Check...  
CARTER (OS CONT)- this out.

04.27.06 FRAISER (OS)- That some sort of nano-technology?

04.29.03 CARTER (OS)- They seem to be some sort of self-repair mechanism.

04.32.11 FRAISER- Yeah, but they're inactive.

04.34.15 CARTER- They seem to deactivate when disconnected from it – or, her. According to  
the ultrasonic scan, the power system is centered here.  
CARTER (OS CONT)- There seems to be some sort of mechanism...  
CARTER (CONT)- to access it from the outside.  
CARTER (OS CONT)- And I was just about to try to...

- 04.56.11            FRAISER- Wow.
- 05.03.11            DANIEL (OS)- The Greeks...  
DANIEL (CONT)- Romans, Babylonians, Chinese – they all envisioned synthetic  
                         beings that took on human shape and behavior long before the words robot or  
                         android...  
DANIEL (OS CONT)- were ever uttered.
- 05.11.21            O’NEILL (OS)- Yeah, so?
- 05.12.29            DANIEL- So even in Earth’s earliest civilizations, it’s been our nature to seek  
                         immortality through the creation of vessels for our consciousness.
- 05.19.12            O’NEILL- Vessels?
- 05.21.11            HAMMOND- Colonel O’Neill, Dr. Jackson. Major Carter and I were just discussing  
                         whether or not to activate the robot.
- 05.27.06            DANIEL- You can?
- 05.28.13            CARTER- I think I’ve found a way to recharge the unit’s main power cell. Now, prior to  
                         this, it’s been operating on less than one percent capacity. I’m hoping that that  
                         was enough to maintain the memory systems, assuming it had any to begin  
                         with, of course.

05.40.19 O'NEILL- Of course. Why do you want to do this again?

05.43.07 CARTER- Well, sir, this, this is an incredibly advanced piece of technology.

CARTER (OS CONT)- Given enough time, I might eventually be able to figure out how  
some of its functions work. The...

CARTER (CONT)- neurological system seems to be as complex as a human brain.

05.57.24 O'NEILL- So?

06.00.15 CARTER- So, I'm hoping that the robot will be able to help me understand itself, sir.

06.39.02 O'NEILL- Now what?

06.41.12 CARTER- I don't know. The power cell should be fully charged. As far as I can tell,  
there isn't an on switch.

CARTER (OS)- It's possible the power was depleted for too long.

06.55.05 O'NEILL- Why don't you kiss her?

07.00.04 ROBOT- (INHALING DEEPLY)

07.05.20 CARTER- There's a pulse.

07.07.05 DANIEL- It has a heartbeat?

07.09.10 O'NEILL- It has a heart?

07.10.27 CARTER (OS)- It's designed to create a very realistic illusion of...  
CARTER (CONT)- humanity.

07.17.03 ROBOT (BREATHING DEEPLY)- Where am I?

07.21.26 DANIEL- Uh, you're in a special facility on the planet Earth. My name is, is Daniel  
Jackson. This is Major Samantha Carter and this is Jack O'Neill.

07.28.27 O'NEILL- Hi.

07.32.13 ROBOT- My name is Reese. Where's my father?

07.38.11 DANIEL- We're not sure.

DANIEL (OS CONT)- Uh...

DANIEL (CONT)- please just let me explain.

07.45.08 REESE- Don't hurt me.

07.46.10 DANIEL- No one wants to hurt you.

07.50.25 REESE- How did I get here?

07.52.17 DANIEL- Um, we found you on your planet. We brought you here through the Stargate.

07.58.02 REESE- What is that?

07.59.18 CARTER (OS)- Well, there was one on your planet.

CARTER (CONT)- It's a device that can be used to travel great distances through space.

08.04.27 DANIEL- We can tell you more about it later.

08.08.28 REESE- Why did you bring me here?

08.11.23 DANIEL- Well, I suppose there's no easy way to tell you this, but the civilization on your planet was destroyed.

08.19.22 REESE- How?

08.21.19 DANIEL- We don't know.

08.23.02 O'NEILL- We were sort of hoping you could tell us.

08.28.05 REESE (ABOUT TO CRY)- I, uh...I was asleep.

08.33.11 DANIEL- Yes, we, we found you that way.

08.35.18 REESE- What about my father?

08.39.01 DANIEL- Well, as far as we could tell, you were the only survivor. You don't know  
anything about what happened?

08.53.27 REESE- My father knew there was danger.

REESE (OS CONT) - He told me to go to sleep. He said he would...

REESE (CONT)- wake me when the danger went away.

09.04.08 DANIEL- We're very sorry.

09.08.22 REESE- What do you want?

09.11.06 DANIEL- Well, we want to understand.

09.15.28 REESE- What?

09.17.03 DANIEL- Your planet and its history.

09.19.20 CARTER- You.

09.21.25 REESE- What about me?

09.23.07 CARTER- Well, I'd really like to know more about how you work. Your systems, how they function.

09.33.21 REESE- I'm like you.

09.35.03 CARTER- Uh...not exactly. At least as far as I can tell.

09.41.20 REESE- How are we different?

09.42.22 DANIEL- Can I have a, can I have a word?

09.45.02 CARTER- Yeah.

09.46.20 DANIEL- W-we're just gonna step outside for a minute. Will you be okay? We'll be right back.

09.59.08 O'NEILL- Excuse me.

10.09.23 DANIEL- I don't think she knows she's a robot.

10.13.19 O'NEILL- Okay, how is that possible?

10.15.15 DANIEL- Well, the last time your consciousness was copied into a robot, you didn't figure it out right away.

10.20.27 CARTER- Okay, what are you suggesting?

10.22.15 DANIEL (OS)- I'm just saying that maybe we should avoid...

DANIEL (CONT)- slapping her in the face with the reality of her existence just moments after telling her her planet was destroyed.

10.29.15 O'NEILL- Why? It's a machine.

10.35.01 DANIEL- She just found out her father is dead.

10.37.28 O'NEILL- It's a machine.

10.39.22 CARTER- He's right. It's not like it ever had a real father.

10.43.10 DANIEL- Well, maybe not. Maybe it's her creator. Or, maybe we're talking to the stored consciousness of a real human being who once did have a real father. And I think our past experience should be telling us to be careful about deciding what is and what isn't a lifeform.

10.56.01 CARTER- Okay, I agree. All I'm saying is, if she really doesn't know what she is, she has a right to.

11.01.12 DANIEL- Okay, maybe we should wait awhile. I mean, she did seem pretty upset.

11.07.23 O'NEILL- For a machine.

11.09.20 DANIEL- We don't know what kind of psychological effect it will have.

11.12.24 CARTER- Psychological?

11.13.28 DANIEL (OS)- Whether her behavior...

DANIEL (CONT)- is a result of sophisticated programming or not, I think the best way to find out about her and what she knows is by dealing with her on her own terms. At least for now.

11.27.00 O'NEILL- Couldn't hurt.

11.34.21 CARTER- It doesn't make any sense.

11.36.04 O'NEILL- Which part?

11.37.13 CARTER- Well, why would somebody attack and destroy an entire civilization but leave one piece of incredibly advanced technology intact?

11.45.09 O'NEILL- Isn't that what he's trying to figure out?

11.47.04 CARTER- But what I'm saying is maybe there's something on the planet that we missed.

- 11.53.07 O'NEILL- I'll go back.
- 11.58.14 REESE (FILTERED THROUGH ISOLATION ROOM GLASS)- Is the rest of your planet like this place?
- 12.01.14 DANIEL (FILTERED THROUGH ISOLATION ROOM GLASS)- No, it's very different.
- 12.04.29 REESE (FILTERED THROUGH ISOLATION ROOM GLASS)- What's it like?
- 12.07.22 DANIEL (OS)- Well, there's lots of varying climates, different kinds of landscapes, big oceans, uh, wide range of civilizations, and...  
DANIEL (CONT)- each is home to a lot of different kinds of people.
- 12.18.08 REESE- It sounds beautiful.
- 12.20.11 DANIEL- Much of it is.
- 12.25.01 REESE- Can I see it?
- 12.27.03 DANIEL- Mm, soon.
- 12.29.19 REESE- Why not now?

- 12.31.12 DANIEL (OS)- Well, because we still...  
DANIEL (CONT)- have more to talk about, Reese.
- 12.34.14 REESE- I know, but, you know, we've been talking for so long now.
- 12.38.13 DANIEL (OS)- I know, but...  
DANIEL (CONT)- uh, you must know a lot more than what we've already talked about.
- 12.57.16 REESE- I do know a lot. (GIVING A LITTLE GIGGLE)
- 13.01.06 DANIEL- What can you tell me about the danger that came to your planet?
- 13.25.15 O'NEILL (OS)- Well, this may have turned out to be...  
O'NEILL (CONT)- one colossal waste of time. You boys...  
O'NEILL (OS CONT)- find anything?
- 13.32.05 SG3 LEADER- Uh, just lots of debris.
- 13.34.20 O'NEILL- I think our work is done here.
- 13.36.25 SG3 LEADER (OS)- Colonel, you said to look for anything...  
SG3 LEADER (CONT)- uncharacteristic of the indigenous technology, right?
- 13.42.27 O'NEILL- I would never say anything like that, Major.

13.46.19 SG3 LEADER- Right. Well, Major Carter said not to ignore anything, however insignificant it may seem.

13.53.05 O'NEILL- What d'ya got?

13.54.09 SG3 LEADER- Well, I'm sure it's nothing, sir. But we found a bunch of these scattered around. I've never seen anything like them before. You know what they are?

14.15.28 O'NEILL- Oh, yeah.

**END OF ACT ONE**

**ACT TWO**

14.29.17 CARTER- No energy readings. I'd say these blocks are dead. Probably been on the planet since it was destroyed.

14.36.28 HAMMOND- Replicators were the cause of the destruction?

14.39.20 TEAL'C- The first evidence of the replicators in this galaxy.

14.42.24 DANIEL- It must've been a long time ago.

- 14.45.03 CARTER (OS)- Something still doesn't fit.  
CARTER (CONT)- I mean, the replicators we know go after advanced technology.  
Why would they eat everything on the planet and leave Reese alone?
- 14.55.25 TEAL'C- Perhaps she has some means of defending herself against the replicators.
- 14.59.00 DANIEL- She was asleep.
- 15.00.20 CARTER- It's possible that she's giving off some kind of signal or, or frequency that  
repels them. Uh...  
CARTER (OS CONT)- maybe not even by design, but by coincidence.
- 15.07.29 O'NEIL- Bug-spray?
- 15.09.14 TEAL'C- If that is the case, then Reese herself may be the key to helping us and the  
Asgard in our fight against the replicators.
- 15.14.22 CARTER- Yep, maybe. But we're still a long way from determining that.
- 15.18.19 HAMMOND- Dr. Jackson, what have you learned?
- 15.20.21 DANIEL- Well, actually, not much, sir. She's kind of hard to pin down in a  
conversation. Her attention wanders. It's like she has the mind of a child.

- 15.35.11 O'NEILL- What?
- 15.39.07 DANIEL- I'm not sure, but she may not be telling me everything she knows about what happened.
- 15.43.02 HAMMOND- You think she's deliberately hiding something?
- 15.45.14 DANIEL- I get that feeling.
- 15.47.14 HAMMOND- Why would someone create a robot with the mind of a child?
- 15.51.02 CARTER- Well, like Daniel suggested. It could be a transferred consciousness. Or, it could be that the creator intended for her to be emotionally mature, but just couldn't get the programming right.
- 16.01.13 HAMMOND (OS)- If Dr. Jackson's right...  
HAMMOND (CONT)- and she is hiding something, we should proceed very carefully with any further interactions.
- 16.07.15 CARTER- Sir, I think it's time that we told Reese the truth. Daniel, maybe if she's forced to confront the fact that she's an artificial lifeform, it could change any preprogrammed priorities that she's adhering to.

16.32.01 REESE (GIGGLING)  
REESE (OS CONT)- (GIGGLING)  
REESE (CONT)- I'm so happy you're here!

16.35.00 DANIEL- What's that?

16.36.03 REESE- Oh, I made it. Do you like it?

16.38.28 DANIEL- Uh, it's very nice. How did you make this?

16.41.21 REESE- I'm so tired of this room, Daniel. Can I please go outside?

16.45.18 DANIEL- Um, sit down for a minute, Reese. We need to talk.

16.54.20 REESE- No.

16.55.17 DANIEL (OS)- Look, this is just gonna take a minute...  
DANIEL (CONT)- so just please...  
DANIEL (OS CONT)- sit down.

16.58.07 REESE- No, I don't want to talk anymore, Daniel. I want to have fun. Don't you ever  
have...  
REESE (OS CONT)- fun?

- 17.01.26 DANIEL- Not as much as I'd like to. Would you please sit down? This is very important. Sit.
- 17.05.14 REESE- Then can we have some fun?
- 17.06.04 DANIEL- Yes.
- 17.06.15 REESE- Promise?
- 17.07.00 DANIEL- Yes. Okay, um, Reese, you know that there are different kinds of people, right?
- 17.15.21 REESE- Of course.
- 17.17.11 DANIEL- In fact, there are many different kinds of lifeforms.
- 17.21.26 REESE- This is boring.
- 17.24.03 O'NEILL- I'm starting to identify with this girl more and more.
- 17.28.03 DANIEL- Reese, I know that you think that we're the same, but we're not.
- 17.31.23 REESE- My father always said I was special. (GIVING A LITTLE LAUGH)

17.34.01 DANIEL- You are. You are very special. But despite the fact that you and I look very much the same, we're very different.

17.42.27 REESE- Well, that's obvious.

17.44.25 DANIEL- I mean on the inside.

17.48.06 REESE- How?

17.53.08 DANIEL- Well (CLEARING THROAT), I'm flesh and blood. You are a machine. A very, very sophisticated machine.

DANIEL (OS CONT)- Uh, more of a, a computer really.

18.13.09 REESE- I'm alive.

18.14.18 DANIEL- Yes, you are. Just not like me.

DANIEL (OS CONT)- Even though you were created to be very human-like, you are not human.

18.22.18 REESE- Yes, I am.

18.28.00 DANIEL- No, you're not, Reese. Okay, I can prove that to you.

18.31.12 REESE (OS)- No!

18.31.22 DANIEL (OS)- (GASPING)

18.38.12 REESE (OS FILTERED THROUGH ISOLATION ROOM GLASS)- I want to leave you!

Let me...

REESE (CONT FILTERED THROUGH ISOLATION ROOM GLASS)- out! Let me out!

Now!

18.45.11 O'NEILL- Hey, that went well.

18.48.09 CARTER- Maybe she has some sort of programming that prevents her from  
acknowledging she's anything but human.

18.53.07 O'NEILL- Robot denial?

18.56.14 DANIEL- Looks that way.

18.57.28 O'NEILL- Has it occurred to anyone that this thing may have been laying around that  
planet for, oh, quite some time, and that maybe it's broken? Or perhaps, it  
never worked right in the first place?

19.11.07 CARTER- So you think we should just shut her down?

19.12.27 O'NEILL- Oh, I don't know. Let's ask the man who just had his head cracked open.

19.17.12 DANIEL- I don't think she meant to hurt me. I just don't think she liked what I was saying.

19.20.13 O'NEILL- I don't like most of what you say. I try to resist the urge to shove you through a wall.

19.26.14 CARTER (OS)- Somehow Reese managed to...  
CARTER (CONT)- survive a massive attack from replicators. There has to be more that we can learn from her, sir.

19.44.21 REESE- Finally! (GIGGLING)

19.47.03 DANIEL- (GROANING)

19.48.16 REESE (GIGGLING)- Do you forgive me? You know I didn't mean to hurt you, right?

19.54.03 DANIEL- I know.

19.55.03 REESE- Good. I forgive you, too.

19.57.24 DANIEL- Wh-wh-what? What?

20.00.20 REESE- For attacking me.

20.03.10 DANIEL- I didn't attack you, Reese.

20.07.04 REESE- It doesn't matter. Let's forget it.

20.08.28 DANIEL- No, no, I think we should talk about this.

20.10.27 REESE- No, please, Daniel, I'm so bored. I just want to get out of here. I want to see  
your world. Why are you all so afraid of me?

20.20.12 DANIEL- No one's afraid of you.

20.21.29 REESE- I won't do anything bad. I promise.

20.23.10 DANIEL- I know.

20.27.04 REESE- I made you something.

20.28.25 DANIEL- Yeah?

20.29.21 REESE (OS)- Remember when you said...

REESE (CONT)- you wished that you could have more fun?

20.32.26 DANIEL- Yeah.

20.56.07 REESE- Don't be afraid. It's just a toy.

**END OF ACT TWO**

**ACT THREE**

21.11.06 CARTER (OS)- Sir, that glass is supposed to be acid-resistant, but it hasn't been tested against replicator spray.

21.19.11 O'NEILL- Why are we keeping this thing anyway? We know what they can do.

21.23.02 CARTER (OS)- She...

CARTER (CONT)- made it. She can control it.

21.24.25 DANIEL- Yes, but how did she make it?

21.26.11 CARTER- Well, I think I have a pretty good idea.

CARTER (OS CONT)- Nano-technology.

CARTER (CONT)- The nanobots that she uses for self-repair are apparently able to re-order matter on a microscopic level.

CARTER (OS CONT)- She understands their construction...

CARTER (CONT)- completely. She should know how to defeat them.

22.01.21 HAMMOND- Will she tell us?

22.03.08 DANIEL- Well, that's the problem.

22.04.27 O'NEILL- What?

22.06.05 DANIEL- She's not talking.

22.07.29 O'NEILL- We make her talk.

22.09.07 DANIEL- I think she was offended because I didn't appreciate her present very much.

22.12.17 CARTER- But this is so far beyond my understanding. I recommend that we contact  
the Asgard. Maybe they can help.

22.19.17 HAMMOND- Agreed. I'll send SG-2 to try and make contact.  
HAMMOND (OS CONT)- In the meantime, see what...  
HAMMOND- else you can learn.

22.25.09 CARTER- Yes, sir.

22.44.14 DANIEL- Reese, we need to talk.

22.47.27 O'NEILL (FILTERED THROUGH MONITOR)- Tell us what you know about the  
replicators.

22.50.29 REESE (OS FILTERED THROUGH MONITOR)- Replicators?

22.52.16 O'NEILL (FILTERED THROUGH MONITOR)- Yeah.

O'NEILL (OS CONT FILTERED THROUGH MONITOR)- It's what we call them,  
because that's what they do.

22.57.11 REESE (OS)- It's just a toy.

REESE (CONT)- It won't hurt you.

23.00.17 O'NEILL- A toy? There are millions of those things floating around in space,  
destroying everything they touch.

23.08.17 REESE- I don't know what you mean.

23.10.14 O'NEILL- They destroyed your planet and, please, don't tell me you don't remember,  
because I think you do.

23.15.02 REESE- No, you want to destroy me!

23.19.17 CARTER- Easy.

23.20.02 DANIEL (OS FILTERED THROUGH MONITOR)- No one wants to hurt you.

23.21.05 O'NEILL (OS FILTERED THROUGH MONITOR)- Just...

O'NEILL (CONT)- tell us what happened.

23.29.23 REESE (ON THE VERGE OF TEARS)- It wasn't my fault.

REESE (OS FILTERED THROUGH MONITOR, ON THE VERGE OF TEARS)- The people on my planet were afraid. They wanted to destroy my...

REESE (CONT FILTERED THROUGH MONITOR, ON THE VERGE OF TEARS)- toys. They wanted to destroy me.

REESE (CONT, ON THE VERGE OF TEARS)- They said that my father made me wrong. They, they thought that I was bad.

23.48.14 DANIEL- What did you do?

23.51.18 REESE- I taught my toys to make more of themselves.

REESE (OS CONT)- And I, I, I taught them...

REESE (CONT)- to defend themselves and me, in case anyone ever tried to destroy us.

24.04.21 O'NEILL- Well, you taught them well.

24.07.02 DANIEL- When your toys started to attack your world, why didn't you stop them?

24.10.17 REESE (ON THE VERGE OF TEARS)- I tried, but I couldn't. They wouldn't listen to me anymore.

24.23.16 DANIEL- Why did you go to sleep?

24.31.04 REESE (ON THE VERGE OF TEARS)- They killed everyone. They killed my father.

And then they went away.

REESE (OS CONT, ON THE VERGE OF TEARS)- I was alone.

REESE (CONT ON, THE VERGE OF TEARS)- I was sad. You don't like me anymore.

You think I'm bad.

24.55.03 O'NEILL- Actually, we want you to help us.

24.57.21 DANIEL (OS)- Reese, the replicators have become a problem for a...

DANIEL (CONT)- lot of different worlds. We need to know how to stop them.

25.02.12 REESE- You want to destroy them.

25.04.12 O'NEILL- Yes.

25.05.09 DANIEL (OS)- They're bad.

DANIEL (CONT)- And they have to be stopped.

25.07.14 REESE- You want to destroy me!

25.08.26 DANIEL- No.

- 25.09.04 REESE (OS)- Yes, you do!  
REESE (CONT)- You think that my father made me wrong! You hate me! (GASPING,  
SIGHING)
- 25.44.26 HAMMOND- SG-2 has been unable to contact the Asgard from the K'tau Hall of  
Wisdom.
- 25.50.00 O'NEILL- Nothing?
- 25.51.18 CARTER (OS)- I hope they're okay.
- 25.53.14 HAMMOND- It would be unfortunate if the Asgard lost their...  
HAMMOND (OS CONT)- battle with the replicators at a time when we...  
HAMMOND (CONT)- may have the key to stopping them in our midst.
- 26.00.17 O'NEILL- Oh, I wouldn't count the little fellers out just yet, sir.
- 26.03.09 CARTER- Sir, this robot is far beyond our understanding.  
CARTER (OS CONT)- I mean, we may be able to use our weapons to fight the  
replicators, but...  
CARTER (CONT)- without the Asgard's help, I don't think we're gonna be able to  
figure out how to use Reese to defeat them on a grand scale.
- 26.15.18 HAMMOND- The robot's unwilling to cooperate?

- 26.17.23 O'NEILL- Completely clammed up, sir.
- 26.19.27 DANIEL- She thinks we don't like her. Apparently, her impression is that the people of her world thought that she was poorly constructed and wanted her and her toys eliminated.
- 26.27.15 O'NEILL- Which would make them far smarter than we are.
- 26.31.12 CARTER (OS)- It seems whoever made Reese, made a critical error.  
CARTER (CONT)- He made her smart enough to build the replicators, and yet emotionally immature.
- 26.38.12 DANIEL- She's just trying to defend herself. She really is just a kid who unwillingly taught her toys to become a weapon of destruction.
- 26.45.11 O'NEILL- Maybe. She's been lying to us from the start.
- 26.50.13 HAMMOND (OS)- Major, it sounds to me like we're over our heads...  
HAMMOND (CONT)- here. Until we successfully contact the Asgard, I am ordering you to shut the robot down.
- 27.01.23 O'NEILL- Well, that's not going to be pretty.
- 27.03.25 HAMMOND- Do whatever's necessary.

27.41.00 SF 1- The cameras in isolation room one are off-line, and I can't seem to get them back.

27.45.02 SF 2- We got it. The cameras are down.

28.00.18 SF 3 (OS)- They're in here!

28.08.00 SF 2 AND SF 3 (OS)- (YELLING AND SCREAMING)

**END OF ACT THREE**

**ACT FOUR**

28.35.06 SF 3- They're still alive. A medical team's on the way.

28.37.06 DANIEL- Where is she?

28.38.02 SF 3- The door was open and the prisoner was gone when I arrived, sir.

28.42.17 CARTER- Replicators.

28.45.07 O'NEILL- O'Neill for Hammond.  
O'NEILL (OS CONT)- Yeah, sir, we may have a replicator...  
O'NEILL (CONT)- situation down here. I suggest sealing the base and doing a clean sweep.  
O'NEILL (OS CONT)- Yes, sir.  
O'NEILL (CONT)- And we also have a robot on the loose.

29.00.03 CARTER- Sir, we have to preserve her in one piece.

29.02.28 O'NEILL- And we'd like it in one piece, if possible. Yes, sir. Alright, how did this happen?

29.10.23 TEAL'C (OS)- The room has been cleared of any substance...  
TEAL'C (CONT)- that may have been used to create another replicator.

29.15.16 CARTER- She must have made enough blocks for the two of them...  
CARTER (OS CONT)- the first time. That one could have made more.  
CARTER (CONT)- There could be hundreds by now. They've already breached the power system, sir. Initiating computer lockdown.

30.07.20 HAMMOND- Is this really gonna stop any replicators from assessing the dialing...  
HAMMOND (OS CONT)- computer?

30.10.29 CARTER- I doubt it, sir, but it might buy us a little time.

- 30.15.17 VOICE (OS FILTERED THROUGH RADIO)- Major Carter. Security has been breached on level 28. Replicators have been spotted heading towards the control room.
- 30.21.26 CARTER- Roger that.  
CARTER (OS)- Suggest retreating until...  
CARTER (CONT)- back-up arrives, sir. Sir... She's sealed herself in the gateroom.  
She's got a lot of replicators with her.
- 31.23.16 DANIEL- She's probably trying to go home.
- 31.25.04 O'NEILL- Well, let's let her.
- 31.26.11 CARTER- Sir, we can't just let her leave.
- 31.28.08 O'NEILL- We'll tell the Asgard where she is.
- 31.30.10 DANIEL- Well, I'm only guessing she's trying to go home. I mean, if she thinks we're gonna destroy her, she could be going anywhere.
- 31.34.15 CARTER (OS)- We can't just let her leave with the replicators.  
CARTER (CONT)- She lost control of them once, it could happen again.
- 31.38.27 O'NEILL- So we'll toss in a nuke in behind her.

31.42.14 DANIEL- I'd like to try and stop her first.

31.45.28 O'NEILL- How?

31.47.15 DANIEL- Maybe get her trust back.

31.50.16 O'NEILL- Then what?

31.51.20 DANIEL (OS)- Then, then, then I don't know. I'm just...

DANIEL (CONT)- making this up as I go.

31.55.04 CARTER- If you could somehow manage to get close enough to her, you might be able to remove her power chip.

31.59.26 TEAL'C- What of the replicators?

32.01.05 CARTER- These aren't the same replicators that we're used to dealing with. Right now, she's controlling them.

CARTER (OS CONT)- If Daniel can shut her down, the replicators might just cease to operate.

CARTER (CONT)- Look, they exist to protect Reese. If she's eliminated, they have no protocol upon which to act.

- 32.15.23           TEAL’C- They may attack Daniel Jackson in order to exact revenge and to restore their leader’s power.
- 32.19.21           DANIEL- Yeah, well, that’s where you guys will come in.
- 32.22.15           HAMMOND- I’m willing to give you a chance, Dr. Jackson.
- 32.24.29           O’NEILL (OS)- General, with all due respect...  
O’NEILL (CONT)- I think it’s a bad idea.
- 32.29.24           HAMMOND- I hope not, Colonel.
- 32.58.16           DANIEL (FILTERED THROUGH MONITOR)- Reese, please let me in. I just want to talk to you.
- 33.16.10           REESE- Activate the Stargate.
- 33.18.02           DANIEL- No. No, I don’t want you to go.
- 33.23.26           REESE- You hate me.
- 33.25.26           DANIEL- No, I don’t. No one does.
- 33.28.17           REESE- They’re afraid of me.

33.34.26 DANIEL- They don't understand you, Reese.

33.37.11 REESE- I never meant to hurt anyone.

33.39.01 DANIEL- I know. Please stay.

33.42.15 REESE (OS)- It's too late now.

REESE (CONT)- I've accessed your computer system. I'll figure it out for myself.

33.51.13 DANIEL- Reese, I don't want you to go.

33.57.15 REESE- Why not?

34.01.07 DANIEL- I want to be your friend.

34.08.20 REESE- I've never had a friend.

34.10.16 DANIEL- I'll be your friend.

DANIEL (OS CONT)- Your toys may be a...

DANIEL (CONT)- lot of fun, but they're not human, like us.

34.21.12 REESE- They protect me.

34.23.24 DANIEL- I'll protect you.

34.26.28 REESE- You promise?

34.27.27 DANIEL- I promise. No one will hurt you. Come on...Show you my world?

34.41.23 REESE- Really?

34.42.16 DANIEL- Yeah. (GROANING IN PAIN)

34.51.23 REESE- You're...

REESE (OS CONT)- trying to disable me!

34.53.21 DANIEL- No!

34.54.07 REESE- Yes. You're lying. Lying...

REESE (OS CONT)- is bad!

34.57.07 DANIEL- (GROANING IN PAIN)

35.00.04 REESE- None of you will ever hurt me!

**END OF ACT FOUR**

**ACT FIVE**

- 35.14.26 CARTER- Sir, Daniel's in trouble. Replicators have evacuated the gateroom. We're not sure where they went. All the cameras are down.
- 35.21.00 O'NEILL- Yeah, roger that. We're going in.
- 35.36.25 HAMMOND- Major, I won't let the replicators escape this base. We have to set the self-destruct.
- 35.42.21 CARTER- The replicators have taken over the main computer, sir. We'll have to cut the system access and set the device locally.
- 36.12.03 DANIEL- Reese, please listen to me...
- 36.28.10 REESE (SCREAMING)- Make them stop!
- 36.32.25 HAMMOND- On a three count – three, two, one! Clear.
- 36.57.28 CARTER- Sir, we're getting ready to set the self-destruct.
- 37.04.20 O'NEILL- I can't hear you!

36.10.18 HAMMOND- On my mark – three, two...

HAMMOND (OS CONT)- one, turn!

37.18.11 CARTER- Sir, we've set the self-destruct. You have less than five minutes to tell us to  
override. Do you copy?

37.23.21 O'NEILL- Roger that!

37.38.25 CARTER- Thank you. Sir!

37.45.07 REESE- Make them stop!

37.47.09 DANIEL- I can't. You can.

37.49.22 REESE- No, you'll kill me!

37.51.16 DANIEL- No, no one wants that. We just don't want you to destroy our world the way  
you destroyed yours.

37.55.12 REESE- I didn't do it!

37.56.26 DANIEL (OS)- Yes, you did!

DANIEL (CONT)- You created the replicators. You told them to replicate at all costs.

They destroyed your world and you let them!

38.04.23 REESE (CRYING)- It wasn't my fault!

38.06.16 DANIEL (OS)- You could've stopped them before there were...

DANIEL (CONT)- too many. You could stop them now before you lose control.

38.11.29 REESE (CRYING/SCREAMING)- No!

38.14.20 HAMMOND- Cease fire! What's it doing?

38.21.22 CARTER- I'm not sure. It's like it doesn't know what to do.

38.40.01 REESE- (GASPING)

38.43.18 DANIEL- Reese! You're father made you wrong!

38.46.12 REESE- NO!

38.47.04 DANIEL (OS)- Yes!

DANIEL (CONT)- You destroyed your world.

38.52.12 REESE (CRYING)- I didn't mean to.

38.58.02 DANIEL- I know. But now you're gonna destroy mine, too.

- 39.01.16 REESE (CRYING)- I don't want to.
- 39.05.26 DANIEL- I know. That's why you have to stop now.
- 39.09.12 REESE- (CRYING)
- 39.11.25 DANIEL- No one will hurt you. We may be able to fix you.
- 39.15.29 REESE (CRYING)- How?
- 39.21.11 DANIEL- Just shut off your toys. Go to sleep. We'll find a way.
- 39.24.23 REESE (CRYING)- I don't believe you.
- 39.44.18 CARTER- Colonel, I think Reese is losing control. At least one of the replicators has started to act on its own.
- 39.58.13 DANIEL- I will wake you up myself. I promise. I'm your friend. I don't want you to die.
- 40.10.23 REESE- I don't want you to die, either.
- 40.20.01 TEAL'C- O'Neill!
- 40.54.18 CARTER (OS FILTERED THROUGH RADIO)- What's happening in there?

40.58.05           TEAL’C- The replicators appear to have been disabled.

41.26.26           O’NEILL- The robot has been neutralized.

41.30.12           HAMMOND- Abort the self-destruct.

41.42.23           DANIEL- You stupid son of a bitch.

41.46.24           O’NEILL- Hey. You’re welcome.

41.51.12           DANIEL- You didn’t have to shoot her.

41.53.04           O’NEILL- Yes, I did.

41.56.04           DANIEL- She was shutting them down.

41.58.19           O’NEILL- I had no way of knowing that. Neither did you.

42.03.25           DANIEL- They didn’t stop because you shot her. They stopped because she told them  
                          to.

42.07.29           O’NEILL- Carter said she was losing control. Now if just one of those damn things got  
                          out of this base, developed its own personality, we would be royally screwed!

42.16.07 DANIEL- You just killed the only chance we'll ever have of stopping them.

42.21.13 O'NEILL- Look, I'm sorry. But this is the way it had to go down. And you know it. All units, this is SG1-niner. Commence sweep. I want every one of those damn things outta here.

**FADE TO BLACK. BEGIN END CREDITS.**
