STARGATE SG 1G -- "FALLOUT" -- Production #257

TIMECODE DIALOGUE

START TIMECODE 01:00:00:00 AT FIRST FRAME OF PICTURE

TEASER

01:00:05:12 TECHNICIAN: We're receiving a signal, Sir. It's the Kelownans.

01:00:08:23 HAMMOND: Open the iris.

01:00:17:16 HAMMOND (O/S): Mr. Quinn.

01:00:22:05 HAMMOND (CONT'D): It's good to see you again.

01:00:24:00 JONAS (O/S): It's good to see you, too, Sir.

01:00:25:21 JONAS (CONT'D): I only wish it was under better circumstances.

01:00:29:28 JONAS (CONT'D): We need to talk.

01:00:33:06 JONAS: For the past several months, we've been analyzing the data on the crystal left behind by Thanos. It was the Goa'uld that occupied our planet 3,000 years ago. Now, our progress at first was very slow, but we recently made a major, major discovery. Uh, it turns out that Naquadria was not originally present.

01:01:00:09 CARTER: What do you mean?

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:01:02:16 JONAS: It's not native to our planet.

01:01:05:11 DANIEL: I don't understand. It exists in mineral deposits, underground.

01:01:08:14 JONAS: I know it does now, but we believe that those deposits were originally
made up...

01:01:14:07 JONAS (CONT'D O/S): Of ordinary Naquadah.

01:01:15:29 O'NEILL (O/S): I assume...

01:01:17:09 O'NEILL (CONT'D): This makes sense to you?

01:01:18:18 CARTER (O/S): Actually...

01:01:19:06 CARTER: No, it doesn't.

01:01:20:23 JONAS (O/S): We found a reference...

01:01:22:15 JONAS (CONT'D): To a process the Goa'uld discovered which allowed them to
convert raw Naquadah into Naquadria while it's still in the ground.

01:01:28:14 JONAS (CONT'D O/S): Now, somehow it started a chain reaction...

01:01:31:27 JONAS (CONT'D): Which has continued on down through the veins, getting
deeper and deeper and deeper, and we believe that the process is
ongoing.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:01:37:27 CARTER (O/S): Are you saying that, at this very moment...

01:01:40:21 CARTER (CONT'D): There are deposits of Naquadah on your planet that are
being transformed into Naquadria?

01:01:44:16 JONAS (O/S): Yes.

01:01:46:17 JONAS (CONT'D): One very large one in particular. We only recently discovered it
because it's so many miles beneath the surface of our planet...

01:01:51:20 JONAS (CONT'D O/S): But as the conversion process...

01:01:54:02 JONAS (CONT'D): Goes deeper, the heat and pressure get higher.

01:01:57:08 CARTER: And Naquadria is highly unstable.

01:01:59:15 JONAS: We believe that when it reaches a certain depth, it's going to explode with
enough force to obliterate Kelowna.

END OF TEASER

ACT ONE

01:03:39:18 JONAS: The first few references to the conversion process that we found were pretty vague. To tell the truth, I was half-convinced that I'd made a mistake in the translation, and then we came across these test results which show the ratio of Naquadah to Naquadria achieved in the process. Check this out.

01:04:09:28 CARTER (O/S): So the Naquadah that isn't converted...

01:04:12:02 CARTER (CONT'D): Breaks down into lighter elements.

01:04:13:12 JONAS: You know, for the longest time I was wondering why we never found any Naquadria anywhere else in the galaxy, and now I'm thinking it's 'cause it doesn't exist in nature at all.

01:04:21:27 CARTER: Which would explain why none of the other Goa'uld knew about it until Anubis probed your mind.

01:04:26:11 KIANNA: We've got the latest geological data. It looks like--

01:04:30:21 KIANNA (CONT'D): Oh. Hello.

01:04:33:08 CARTER: Hi.

01:04:35:16 JONAS: Oh, uh, Samantha Carter, this is Kianna Cyr.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:04:40:00 JONAS (CONT'D O/S): This is Sam Carter.

01:04:42:01 JONAS (CONT'D): She helps me out on the translation.

01:04:44:12 KIANNA: I've heard a lot about you, Major. We could really use your expertise
right now.

01:04:47:13 JONAS (O/S): What've you got?

01:04:48:28 KIANNA: It looks like the Naquadria has progressed deeper than we thought.

01:04:52:09 CARTER: How much time do we have?

01:04:53:21 KIANNA: A few weeks, a month. It's hard to say.

01:04:56:00 CARTER (O/S): Well, we need to understand...

01:04:57:10 CARTER (CONT'D): How the conversion process works if we want to find a way
to stop it.

01:05:00:13 JONAS: Yeah, but the information stored on the crystal is incomplete.

01:05:04:06 CARTER: Well, then we're going to have to figure it out for ourselves.

01:05:10:14 HAMMOND: Ambassador.

01:05:21:01 HAMMOND (CONT'D): Welcome to Earth.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:05:22:24 DREYLOCK: Actually, it's First Minister now.

01:05:24:24 DANIEL: First Minister.

01:05:26:07 DREYLOCK: This is Vin Eremal, Lucia Tarthus, the Tiranian and Andari representatives on the Joint Ruling Council.

01:05:32:19 HAMMOND: Councilors. Right this way.

01:05:40:04 TARTHUS: I assumed Jonas Quinn would be joining us.

01:05:46:09 DREYLOCK: He sends his apologies, but at the moment, he's devoting his
attention to the Naquadria problem.

01:05:51:15 EREMAL: Has any progress been made?

01:05:53:21 DREYLOCK: So far, very little, I'm afraid, but I believe that with the participation of our friends from Earth, a solution will be found soon.

01:06:00:29 DANIEL: Of course, we all hope...

01:06:01:24 DANIEL (CONT'D): That's the case. However, you may want to begin considering some contingency plans.

01:06:05:29 HAMMOND: We can offer you limited relocation through the Stargate.

01:06:09:28 DREYLOCK: Limited?

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:06:11:20 TEAL'C (O/S): A full evacuation...

01:06:13:01 TEAL'C (CONT'D): Of an industrialized world is a practical impossibility.

01:06:15:17 TARTHUS: I'm not sure I understand. You invited us here to propose that we
abandon Langara?

01:06:25:02 DREYLOCK: Langara is the new name of our planet.

01:06:27:07 DREYLOCK (CONT'D O/S): It's from an ancient dialect...

01:06:28:27 DREYLOCK (CONT'D): Common to all three nations.

01:06:30:25 EREMAL: A symbol of our new unity.

01:06:33:29 O'NEILL: Has a nice ring to it.

01:06:36:02 EREMAI: It was chosen by committee.

01:06:38:05 TARTHUS (O/S): We understand...

01:06:39:11 TARTHUS (CONT'D): That if this problem cannot be solved, Kelowna will suffer severe devastation, at which point we are prepared to offer humanitarian aid...

01:06:45:16 TARTHUS (CONT'D O/S): To the survivors.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:06:47:00 EREMAL (O/S): Of course, we have limited...

01:06:47:19 EREMAL: Resources, but we pledge to do what we can.

01:06:50:19 O'NEILL: Are you kidding?

01:06:53:22 DANIEL: Has no one explained this to you?

01:06:55:16 DREYLOCK: We've tried, but they seem unwilling to accept the truth.

01:06:59:00 TARTHUS: If you knew more about our history, you'd understand our reluctance
to believe Kelownan propaganda.

01:07:04:02 DANIEL (O/S): Well, our own scientists have studied the problem,

01:07:06:15 DANIEL (CONT'D): And while it is true that Kelowna will bear the brunt of the
initial explosion...in fact, by our calculations, almost half the country's
land mass will be destroyed...you're not taking into account the amount
of dust and debris that'll be thrown into the upper atmosphere.

01:07:16:14 DANIEL (CONT'D O/S): It'll block the sunlight and lower the average surface
temperature significantly.

01:07:20:27 DANIEL (CONT'D): For all intents and purposes, your entire planet will be
uninhabitable.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:07:30:05 KIANNA: It doesn't make any sense. Naquadria is a heavier, less stable isotope than Naquadah. The conversion should require the continuous input of large amounts of energy.

01:07:41:25 JONAS: Yeah, but it seems to be continuing on its own.

01:07:44:19 KIANNA: Which is impossible.

01:07:46:10 CARTER: Not necessarily.

01:07:47:25 CARTER (CONT'D): Low-energy fusion can occur in the presence of certain subatomic catalysts, like muons.

01:07:52:09 KIANNA: But I believe that only works for extremely light materials...

01:07:55:10 KIANNA (CONT'D O/S): Such as deuterium.

01:07:56:19 CARTER: Wow, Kelownan understanding of particle physics seems to have come a long way recently.

01:08:01:20 KIANNA: We're quick learners.

01:08:02:28 CARTER: Well, in any case, I wasn't thinking about muons specifically.

01:08:06:10 CARTER (CONT'D): There are certain other subatomic particles which could have catalyzed this reaction.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:08:10:13 CARTER (CONT'D): The real question is, why didn't this planet blow up a long time ago?

01:08:14:22 JONAS: What do you mean?

01:08:17:01 CARTER: I think the reason you haven't been able to figure out the process is because you've been working under the assumption that this transformation began 3,000 years ago.

01:08:24:09 KIANNA: But that's what the historical data indicates.

01:08:26:06 CARTER: Maybe so...

01:08:27:12 CARTER (CONT'D): But if you put that aside for a moment and assume the presence of the right catalysts, you can account for this reaction. It's just a lot faster than you thought.

01:08:35:07 JONAS (O/S): How...

01:08:35:20 JONAS (CONT'D): Much faster?

01:08:36:27 CARTER (O/S): Well, a deposit the size...

01:08:38:02 CARTER (CONT'D): Of the one you recently discovered could take as little as a few years to transform...

01:08:41:20 CARTER (CONT'D O/S): Completely.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:08:43:17 (RATTLING)

01:09:01:16 CARTER: What was that?

01:09:07:02 TECHNICIAN: Receiving video transmission, Sir.

01:09:12:06 HAMMOND: Major, what's your situation?

01:09:14:19 CARTER (V/O): Most of the fires that were caused by the earthquake are under control now, Sir. Doctor Fraiser's organizing the distribution of medical supplies.

01:09:22:06 HAMMOND: I find it hard to believe this was a coincidence.

01:09:24:08 CARTER (V/O): It wasn't. We traced the epicenter of the quake to a small pocket of converted Naquadria located about 20 kilometers below the surface.

01:09:31:22 HAMMOND: A small pocket?

01:09:33:08 CARTER (V/O): When the main deposit goes, Sir, we estimate the explosion will be about 100,000 times more powerful.

01:09:43:11 EREMAL (O/S): This planet--

01:09:44:22 TEAL'C: Madronus.

01:09:45:23 EREMAL: And how far away is it?

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:09:47:13	TEAL'C: Approximately 14,000 light years.
01:09:51:22	O'NEILL: Give or take.
01:09:53:14	TEAL'C (O/S): The Madronans are a peaceful, advanced society...
01:09:55:20	TEAL'C (O/S CONT'D): With the resources...
01:09:57:18	TEAL'C (CONT'D): To accept many thousands of refugees.
01:09:58:26	TARTHUS: Jonas Quinn's reports refer to several uninhabited planets capable of sustaining life. The Andari government might consider relocation if one of these were made available.
01:10:07:13	TEAL'C (O/S): Without infrastructure...
01:10:09:01	TEAL'C (CONT'D): Any uninhabited planet would not be able to sustain as many Langan refugees.
01:10:13:14	TARTHUS: I'm not suggesting one planet for all of us.
01:10:16:12	DANIEL (O/S): You want...
01:10:17:21	DANIEL (CONT'D): Your own planet?
01:10:18:25	TARTHUS (O/S): The Andari people...

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:10:20:03 TARTHUS (CONT'D): Would welcome a fresh start, given the oppression we've suffered in the past.

01:10:23:21 EREMAL: The only thing you suffered under Tiranian rule was peace and good government.

01:10:27:27 TARTHUS: And mass arrests, summary executions...

01:10:29:20 EREMAL: In response to terrorist acts against innocent civilians.

01:10:32:11 O'NEILL: Whoa! Whoa.

01:10:35:06 O'NEILL (CONT'D): We're getting a bit off-topic here, don't you think?

01:10:37:25 DANIEL (O/S): Three separate relocations is just...

01:10:40:20 DANIEL (CONT'D): Not practical, and Madronus is your best bet to save as many lives as possible.

01:10:55:04 DREYLOCK: Jonas, Major Carter. General Hammond tells me you've discovered something about the conversion process.

01:11:04:25 CARTER: Well, we determined that the transformation must have begun with a massive bombardment of certain subatomic particles which catalyze the reaction and allow it to continue without the input of energy.

01:11:17:22 CARTER (CONT'D O/S): It's possible to create these particles in the lab...

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:11:20:24 CARTER (CONT'D): But there's really only one way they could've been produced
 in sufficient quantity and with enough energy to penetrate several miles
 into the crust of the planet.

01:11:28:16 JONAS: It was the Naquadria bomb test...

01:11:31:05 JONAS (CONT'D O/S): The test that was conducted two years ago.

01:11:34:17 JONAS (CONT'D): We did this to ourselves.

END OF ACT ONE

ACT TWO

01:12:06:19 DREYLOCK: Historical documents indicate that Thanos was destroyed in some cataclysmic event. Maybe this was the explosion that triggered the chain reaction.

01:12:15:03 CARTER: It did, at least in the case of the Naquadah deposit near the surface.

01:12:18:29 JONAS (O/S): It appears that Thanos...

01:12:20:19 JONAS (CONT'D): Managed to create a small amount of Naquadria in the lab, but something went wrong. The resulting explosion released the subatomic particles which catalyzed the conversion of the first vein of Naquadah.

01:12:32:18 JONAS (CONT'D O/S): The rest of the deposit transformed in less than a year.

01:12:35:05 CARTER (O/S) After that, it simply lay in the ground.

01:12:37:23 CARTER (CONT'D): Another 10,000 years and it would've decayed back into Naquadah, if you hadn't mined it first.

01:12:43:10 JONAS: Then we set off the bomb, which started the conversion of the second, deeper vein.

01:12:53:14 EREMAL: This is outrageous. If what you say is true, the Kelownan government bears full responsibility for the imminent destruction of Langara.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:13:03:06 DREYLOCK: Your governments formed an alliance for the express purpose of
 attacking Kelowna.

01:13:06:11 DREYLOCK (CONT'D): We were merely looking to defend ourselves.

01:13:08:13 TARTHUS: We only went to a heightened war alert after we learned of your
 research.

01:13:12:05 DREYLOCK: Which only goes...

01:13:12:17 DREYLOCK: To prove that you were spying on us.

01:13:14:15 TARTHUS (O/S): What choice did we have?

01:13:16:18 TARTHUS (CONT'D): We certainly weren't going to rely on the Kelownan
 government to tell us the truth.

01:13:19:10 DANIEL: Councilors, please.

01:13:21:00 EREMAL (O/S): These talks will have to be suspended...

01:13:22:22 EREMAL (CONT'D): Until I can confer with my cabinet.

01:13:24:02 O'NEILL: Oh, for crying out loud!

01:13:25:24 DANIEL: Jack.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:13:27:01 O'NEILL (O/S): Who cares whose fault it is?

01:13:28:19 DANIEL (O/S): Jack.

01:13:28:27 O'NEILL: Your planet is going to blow up.

01:13:30:22 DANIEL (O/S): Jack.

01:13:30:10 O'NEILL: The whole damned planet, Daniel.

01:13:32:07 DANIEL: Okay, I think it's best if we all take a little recess right now.

01:13:36:29 O'NEILL: General.

01:13:42:25 O'NEILL: I say we send 'em packing.

01:13:44:00 TEAL'C: Indeed.

01:13:45:00 DANIEL: We can't give up on them yet. We still have the potential to save
thousands of lives here.

01:13:48:09 O'NEILL: And yet, curiously, they don't seem to understand, nor care.

01:13:50:18 DANIEL: This is diplomacy, Jack. This is the way the game is played. It takes
patience.

01:13:54:12 O'NEILL: Yeah, well, I'm fresh out.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:13:56:17 TEAL'C: As am I.

01:14:00:09 O'NEILL: I think you're on your own.

01:14:13:04 KIANNA: No matter how many times we go over this, we're still going to come to the same conclusion. There's simply no way to reverse the process.

01:14:20:21 CARTER: Maybe we don't have to. According to the latest geological data, there's a minor fault line crossing the vein of Naquadah about a kilometer above the large deposit.

01:14:32:11 CARTER (CONT'D O/S): If we could somehow trigger a move along the fault line...

01:14:35:29 CARTER (CONT'D): We could isolate the advancing Naquadria and break off the chain reaction before it gets any deeper.

01:14:40:11 KIANNA: And how do we do that?

01:14:42:18 CARTER: We set off a large explosion near the fault.

01:14:44:09 CARTER (CONT'D O/S): Stargate Command could provide...

01:14:46:19 CARTER (O/S CONT'D): A small nuclear device that would do the trick. The only problem is...

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:14:48:25 CARTER (CONT'D): We'd have to get it down there, which means drilling through
 20 kilometers...

01:14:52:29 CARTER (CONT'D O/S): Of solid rock.

01:14:57:14 CARTER: What?

01:14:59:07 JONAS: There's something I want to show you.

01:15:28:15 JONAS: It took us two and a half years to build, at a cost of over half the annual
 Kelownan research budget.

01:15:34:04 JONAS (CONT'D): The Deep Underground Excavation Vehicle.

01:15:40:15 CARTER: Cool.

01:15:42:09 JONAS: The fore and aft sections have both been outfitted with titanium cutter
 heads, each of which can withstand, or apply, a thrust of up to 50 metric
 tons.

01:15:58:15 CARTER: What kind of an advance rate are we talking about?

01:16:02:05 JONAS: Up to 80 meters an hour. Now, look, I know it's not fast enough, but I do
 have an idea for a little adjustment that would give us a lot more speed.

01:16:14:17 CARTER: Tok'ra tunnel crystals.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:16:16:04 JONAS (O/S): Modified, of course...

01:16:18:01 JONAS (CONT'D): To work in conjunction with the cutter heads.

01:16:19:18 CARTER: Pretty impressive.

01:16:21:02 CARTER (CONT'D): Do you mind if I take a look at your power systems?

01:16:23:02 JONAS: After you.

01:16:31:02 KIANNA (WHISPERING): Do we have to show her everything?

01:16:33:22 JONAS: Kianna.

01:16:36:00 KIANNA: Everybody has an agenda, Jonas. Her people have made no secret of
their interest in our Naquadria deposits.

01:16:41:14 JONAS: Look.

01:16:41:27 JONAS (CONT'D): I've wanted to come forward with this for a long time, but I
always got overruled by the Cabinet. Now we have no choice.

01:16:48:13 KIANNA: Well, we don't need her. We can go to the Tok'ra ourselves.

01:16:52:10 JONAS: I worked with these people for over a year. I trust them with my life.

01:17:13:29 JONAS: Don't worry.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:17:23:16 TARTHUS: The machine was designed to mine Naquadria, and, according to the terms of our alliance, any information related to Naquadria is to be shared. We were purposely misled.

01:17:31:18 DREYLOCK: We had every intention...

01:17:32:19 DREYLOCK (CONT'D): Of telling you once the prototype was fully operational.

01:17:34:27 EREMAL: Do you take us for idiots? It was you that created this disaster, and now you expect to benefit by acquiring alien technology?

01:17:44:17 DANIEL (O/S): I think we can all agree that it's unfortunate the...

01:17:47:03 DANIEL (CONT'D): Kelownan government didn't come forward with this information sooner...

01:17:49:24 DANIEL (CONT'D O/S): Um, however, regarding the Tok'ra crystals...

01:17:52:00 DANIEL (CONT'D): You really have no choice. Without them, we won't be able to reach the Naquadria vein in time to save your world. It's that simple.

01:18:01:08 CARTER: Wow, Jonas, this technology is beyond anything I've seen on Kelowna before.

01:18:12:27 JONAS: Well, I did make a few suggestions for some adjustments based on what I learned at Stargate Command.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:18:17:18 CARTER: Pretty amazing.

01:18:19:24 JONAS (O/S): Yeah, I tell you, most of the credit goes to Kianna.

01:18:22:17 CARTER: Kianna?

01:18:24:16 JONAS: Oh, yeah. She took what she learned from me and she made modifications to the hydraulics...

01:18:29:15 JONAS (CONT'D O/S): The shielding mechanisms, everything. I'm telling you,
without her...

01:18:34:21 JONAS (CONT'D): This thing would be months away from being operational.

01:18:38:16 CARTER: So you two have been working pretty closely on this.

01:18:41:27 JONAS: Yeah, I guess.

01:18:45:10 JONAS: What?

01:18:46:22 CARTER: Come on, Jonas. I'm not blind. What's going on?

01:18:50:16 JONAS: Let's just say that it's in the development stage, although I do find her interesting.

01:18:57:11 CARTER: I'll bet you do.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:19:53:20 HAMMOND: Teal'c, I trust your mission was a success.

01:19:58:23 TEAL'C: Indeed.

01:19:59:12 TEAL'C (CONT'D): The crystals you requested.

01:20:02:09 DANIEL: Thank you.

01:20:05:09 TEAL'C (O/S): How are the negotiations progressing?

01:20:07:13 DANIEL: Well, they finally agreed to send a three-person delegation to Madronus
to evaluate the planet as a potential evacuation site.

01:20:14:09 TEAL'C: What of Jonas Quinn and Major Carter?

01:20:15:25 HAMMOND (O/S): They're making...

01:20:16:29 HAMMOND (CONT'D): Some final adjustments to the Kelownan excavation
machine. It should be ready for launch within 24 hours.

01:20:31:24 JONAS: Hey, you're just in time to help me run a few diagnostic programs.

01:20:39:13 JONAS: What?

01:20:42:07 CARTER: Jonas, did you design the primary power distribution...

01:20:46:12 CARTER (CONT'D O/S): Circuits?

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:20:48:10 JONAS: Well, I didn't really design anything.

01:20:49:12 JONAS (CONT'D O/S): I did make some suggestions for some upgrades, but...

01:20:51:15 CARTER: Based on advanced technology you encountered while you were with...

01:20:54:16 CARTER (CONT'D O/S): SG-1.

01:20:56:05 JONAS: Yeah, that's right.

01:20:57:29 JONAS (CONT'D): Why? What's wrong?

01:20:59:11 CARTER: Well, the hardware is different, but the basic principle is very similar to a
Goa'uld design.

01:21:06:02 JONAS: Well, that's impossible.

01:21:08:00 CARTER (O/S): I went over it three times.

01:21:09:18 CARTER (CONT'D): I probably wouldn't have even noticed myself if I hadn't
calculated that the generators were operating at 130%...

01:21:16:01 CARTER (CONT'D O/S): Efficiency.

01:21:18:27 JONAS: No. No, there's some mistake.

01:21:23:09 CARTER: Jonas, who did design the system?

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:21:36:11 KIANNA: Jonas, what's going on?

01:21:38:22 JONAS: We know.

01:21:40:27 KIANNA: What are you talking about?

01:21:42:22 JONAS: Who do you serve?

01:21:44:07 KIANNA (O/S): Jonas...

01:21:44:24 KIANNA: Whatever you think, whatever she told you is a lie.

01:21:48:08 CARTER: They searched your quarters. You want to explain why they found a
Goa'uld communication device among your personal belongings?

01:22:00:10 KIANNA (SPEAKING IN GOA'ULD VOICE): Very well. You know the truth. Now,
how shall we proceed?

END OF ACT TWO

ACT THREE

01:22:43:10 CARTER: I'm assuming this is the drug that allowed you to escape detection.

01:22:47:21 CARTER (CONT'D O/S): It somehow masks the presence of the symbiote, right?

01:22:52:01 CARTER: You don't have to tell me. I'm sending this back to the SGC for analysis.

01:22:56:03 JONAS: How long have you been on this planet?

01:22:58:01 KIANNA: We knew Anubis...

01:22:58:10 KIANNA (CONT'D): Came here for a reason. After his defeat, I was dispatched to find out why he was so interested in this place.

01:23:05:07 CARTER: So you work for Baal.

01:23:06:24 KIANNA: I gained access to Kelowna's most sensitive research by implanting myself in a young scientist who was working on the Naquadria project.

01:23:14:16 JONAS: Let me talk to Kianna.

01:23:16:16 KIANNA: In a small way, I've grown to admire this host. She is exceptionally
astute...

01:23:23:05 KIANNA (CONT'D): A superior specimen.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:23:24:18 JONAS: Let me talk to her.

01:23:27:01 KIANNA: I made the major modifications to the excavator. If you wish to
successfully complete this undertaking, you will require my assistance.

01:23:35:05 CARTER: Why would you help us?

01:23:37:11 KIANNA: We share a common goal. I, too, wish to save this world.

01:23:42:13 JONAS (O/S): So you can hand it over to Baal?

01:23:44:03 JONAS (CONT'D): I don't think so.

01:23:47:18 KIANNA (AS KIANNA): Jonas.

01:23:51:01 JONAS: Kianna?

01:23:53:20 KIANNA: She's right. You're going to need her.

01:24:00:10 KIANNA (CONT'D): Let her help you, for the sake of our people.

01:24:03:13 CARTER (O/S): That's not her, Jonas.

01:24:05:17 CARTER (CONT'D): It's the Goa'uld trying to fool us. We've seen it before.

01:24:08:13 KIANNA: No. Jonas, please.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:24:11:16 JONAS: Get her out of here.

01:24:21:10 JONAS: Depth is 2,200 meters. Speed, 1.5 meters per second.

01:24:30:00 CARTER: Drills are running hot.

01:24:32:10 JONAS: Bring down your RPMs.

01:24:34:28 JONAS (CONT'D): Don't overcompensate.

01:24:37:14 CARTER: I can't stay ahead of these adjustments.

01:24:40:06 JONAS (O/S): You're going to stall us out. Power up.

01:24:42:14 (BEEPING)

01:24:46:00 JONAS: You stripped the drill heads.

01:24:49:26 JONAS (INTO COMM): Control, end simulation.

01:24:54:20 CARTER: Jonas, we've got a problem.

01:24:58:16 TARTHUS (V/O): Could this be the result of Goa'uld sabotage?

01:25:02:19 HAMMOND: Quite the contrary. Major Carter believes the Goa'uld's modifications
have significantly improved...

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:25:08:00 HAMMOND (CONT'D O/S): The speed and efficiency of the drills.

01:25:09:10 DANIEL (O/S): You see, the problem is the system requires...

01:25:11:16 DANIEL (CONT'D): Constant subtle adjustments to account for any changes in the density of the material that it's passing through, kind of like shifting gears on a racecar.

01:25:19:26 DANIEL (CONT'D): The point is, Major Carter isn't confident in her own ability to run the drill. She thinks the best person for the job is the Goa'uld.

01:25:27:13 TARTHUS: You can't be serious.

01:25:29:00 HAMMOND (O/S): We could overhaul the system...

01:25:30:21 HAMMOND (CONT'D): And eliminate the modifications, but that would significantly reduce the speed of the excavator, and it would take weeks.

01:25:37:06 EREMAL (O/S): We don't have that kind of...

01:25:38:29 EREMAL (CONT'D): Time.

01:25:40:00 DANIEL (O/S): The Goa'uld could've sabotaged the excavator any time she wanted.

01:25:42:07 DANIEL (CONT'D): Instead, she helped Jonas improve several of its key systems.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:25:45:10 DREYLOCK: Only because she wishes to preserve the Naquadria deposit for Baal.

01:25:48:17 HAMMOND: Maybe so, but averting the explosion is our first priority, and without the Goa'uld, we have no chance.

01:26:05:10 KIANNA: You've made the right choice. Your confidence in me will not go unrewarded.

01:26:17:11 CARTER (O/S): We had no choice...

01:26:18:28 CARTER (CONT'D): And for the record, our confidence in you is minimal.

01:26:22:11 KIANNA: Which is, no doubt, why the Shol'va will be accompanying us...

01:26:28:11 KIANNA (CONT'D): And why all of you are armed. Who calibrated the primary inductors?

01:26:37:23 CARTER: I did.

01:26:39:06 KIANNA: Launch now, and you'll burn through them before you pass a hundred meters.

01:26:42:26 CARTER: All right, I'll take navigation. Teal'c, you take shields and life support.

01:26:49:28 TEAL'C: Indeed.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:27:00:00	LOUDSPEAKER (V/O): We are a go for launch in 30 seconds.
01:27:05:06	JONAS: Powering up. Engines are at 70%...
01:27:10:13	JONAS (CONT'D): 80...
01:27:14:16	TEAL'C: Shields are active.
01:27:18:03	CARTER (O/S): Navigation computer is online.
01:27:20:25	JONAS: Engines are at full power. Control, we're set to go for launch...
01:27:26:05	JONAS (CONT'D O/S): In five...
01:27:28:22	JONAS (CONT'D): Four...three...two...
01:27:32:09	JONAS (CONT'D): One.
01:27:47:02	HAMMOND (O/S): We just received...
01:27:48:17	HAMMOND (CONT'D): Word from Kelowna.
01:27:50:23	DREYLOCK: Our security personnel's been monitoring a communication device we took from Kianna's quarters. Apparently a message has come through from Baal.
01:27:57:23	HAMMOND (O/S): She's overdue to report.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:28:00:10 HAMMOND (CONT'D): He's waiting for her to send a transmission.

01:28:02:01 EREMAL: And if she doesn't?

01:28:04:10 TARTHUS: He'll come back to find out what happened.

01:28:06:22 HAMMOND: That's a distinct possibility.

END OF ACT THREE

ACT FOUR

01:28:38:26 (ALARMS SOUNDING)

01:28:41:18 JONAS: What is it?

01:28:43:11 KIANNA: We are losing coolant pressure in one of the forward tubes. We must
have broken a seal.

01:28:49:19 KIANNA (CONT'D): Major Carter, take the controls.

01:28:51:22 JONAS: Where are you going?

01:28:55:21 KIANNA (O/S): I can divert coolant...

01:28:56:02 KIANNA: From the aft section, but I have to do it from the engine room.

01:28:59:10 JONAS (O/S): I'm coming with you.

01:29:03:15 KIANNA: You still do not trust me, do you?

01:29:06:26 JONAS: No.

01:29:11:11 EREMAL: Is there any way to contact the excavator?

01:29:15:02 DREYLOCK (O/S): They're too deep.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:29:16:03 DREYLOCK (CONT'D): No radio signal could penetrate that much solid rock.

01:29:18:26 DANIEL (O/S): It won't make much difference.

01:29:19:29 DANIEL (CONT'D): Telling them about Baal's message will not change anything.

01:29:23:09 TARTHUS (O/S): But if the Goa'uld...

01:29:23:22 TARTHUS: Doesn't make it back..

01:29:25:09 HAMMOND (O/S): The only reason that would happen...

01:29:26:13 HAMMOND (CONT'D): Is if the mission fails, and if that's the case, Baal will be the
 least of your problems.

01:29:30:10 HAMMOND (CONT'D O/S): I suggest we get back to planning your relocation.

01:29:36:15 KIANNA: Check it now.

01:29:43:01 JONAS: Forward pressure's rising. We're good.

01:29:52:01 KIANNA: Maybe now you'll believe that I too wish this mission to succeed.

01:29:55:05 JONAS: Yeah, for the wrong reasons.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:29:57:10 KIANNA: Has it ever occurred to you that serving Baal may not be my only interest here? I never thought I'd find the company of a human so intriguing. And suddenly I repulse you? Not that long ago you felt differently.

01:30:14:20 JONAS: Yeah, but that was before I found out who you are...what you are.

01:30:19:01 KIANNA: And yet the fact remains...you never knew the host before I took her. All
this time, it was never Kianna. It was always me.

01:30:38:07 (ALARMS SOUNDING)

01:30:41:03 TEAL'C: What is happening?

01:30:42:26 CARTER: I'm not sure.

01:30:43:26 CARTER (CONT'D): We're still on course, still descending.

01:30:52:20 TEAL'C: Hull temperature is rising rapidly.

01:30:58:19 TEAL'C (CONT'D O/S): 300 degrees.

01:31:00:29 TEAL'C (CONT'D): 400 degrees and still rising.

01:31:03:02 CARTER: Jonas, is there any volcanic activity in the area?

01:31:06:01 JONAS: Mount Kallan, but it's been dormant for hundreds of years.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:31:08:21 CARTER: Just because it's dormant at the surface doesn't mean there couldn't be magma flows in the vicinity.

01:31:13:09 TEAL'C: Hull temperature is 700 degrees and still rising.

01:31:15:22 CARTER: We're passing through a river of molten rock.

01:31:23:12 O'NEILL: Daniel. How's the whole diplomacy thing working out for you?

01:31:30:20 DANIEL: It's not. The latest argument is about the selection process. The Kelownans want a lottery, the Tiranians want assigned positions, and the Andaris want to set up a committee to discuss the problem.

01:31:37:20 O'NEILL: What?

01:31:38:20 DANIEL: I keep trying to remind them they're facing total annihilation, but they can't seem to face their own mistrust.

01:31:44:23 O'NEILL: I think I can help you out on this.

01:31:48:18 DANIEL: What do you mean?

01:31:49:23 TEAL'C: Hull temperature is 1100 degrees.

01:31:52:21 KIANNA (O/S): The ship will not take much more of this.

01:31:54:13 CARTER: Divert power to the shields.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:31:57:08 KIANNA: We have no way of knowing how thick this vein of magma is. If we turn back now, we may get out alive.

01:32:02:21 CARTER: I said divert power to the shields.

01:32:07:27 KIANNA: Power diverted. Although I'm not sure how much difference it will make.

01:32:16:11 TEAL'C (O/S): Hull temperature...

01:32:17:15 TEAL'C (CONT'D): Is 1200 degrees.

01:32:20:17 KIANNA: Do you really want to risk your life...

01:32:23:17 KIANNA (CONT'D O/S): For the people of this world, Major?

01:32:25:28 KIANNA (CONT'D): I am not so sure they would do the same for you.

01:32:33:14 JONAS: We're losing hull integrity.

01:32:45:07 CARTER: Teal'c?

01:32:47:23 TEAL'C (O/S): Hull temperature is dropping. 1100 degrees...

01:32:50:23 TEAL'C (CONT'D): And still falling.

01:32:52:15 CARTER: We made it through.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:32:58:27 KIANNA: Very impressive.

01:33:08:02 DREYLOCK: Kelowna will accept nothing less than equal representation.

01:33:11:21 EREMAL: Really? Kelowna is solely responsible for this problem.

01:33:15:13 DREYLOCK (O/S): Need I remind you that the Stargate is in our possession?

01:33:19:06 TARTHUS (O/S): For the moment.

01:33:20:13 DREYLOCK (O/S): Is that a threat?

01:33:21:13 TARTHUS (O/S): It's an assurance...

01:33:22:13 TARTHUS (CONT'D): That when it comes to the survival of our people, we will do
 whatever is necessary.

01:33:26:15 DANIEL (O/S): What, so now you want to go to war?

01:33:27:24 DANIEL (CONT'D): My friends are out trying to save your world, and you want to
 destroy it?

01:33:30:26 O'NEILL: Oh, save your breath, Daniel. You folks are done.

01:33:36:17 DREYLOCK: I don't understand.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:33:38:27 O'NEILL: Well, you see, we actually like the Madronans. They're nice people, and we've decided there's no way we'd subject them to the likes of you.

01:33:51:27 O'NEILL (CONT'D): Deal's off. You're toast.

01:33:54:08 TARTHUS: General?

01:33:56:20 HAMMOND: Colonel O'Neill's right. You can stay until we hear back from Jonas and Major Carter.

01:34:04:21 O'NEILL: That's what you get for dicking around.

01:34:07:22 CARTER: Something's wrong. We're losing speed. 1.5 meters per second, and slowing.

01:34:17:28 KIANNA: It is the forward drills. They were damaged by the magma.

01:34:22:03 KIANNA (CONT'D O/S): They are coming apart.

01:34:29:13 CARTER: We stopped.

01:34:31:27 KIANNA (O/S): Forward drill's finished.

01:34:33:06 KIANNA (CONT'D): Cutting power.

01:34:39:10 JONAS: This is as deep as we're going to get.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:34:41:25 TEAL'C: What is our position?

01:34:43:24 CARTER: We're still over a kilometer...

01:34:46:10 CARTER (CONT'D): From the target.

01:34:52:09 JONAS: What happens if we drop the bomb here?

01:34:54:00 CARTER: We're too far from the fault line. Detonating from this position...

01:34:56:22 CARTER (CONT'D O/S): Would be pointless.

01:34:59:00 TEAL'C: Then we have failed.

END OF ACT FOUR

01:35:35:21 CARTER: We're going to have to go back to the surface and repair the ship.

01:35:37:24 JONAS: No, there's too much damage. That's going to take us weeks.

01:35:39:19 CARTER: I'm sorry, Jonas, but we don't have a choice.

01:35:45:06 JONAS: We still have some Tok'ra crystals in reserve. We can use those to tunnel
the rest of the way.

01:35:48:14 CARTER: They'd never make it far enough.

01:35:50:08 JONAS: Yeah, but if we focus them, we can at least dig a passage big enough for
one person.

01:35:55:17 JONAS (CONT'D O/S): That would give us the distance we need.

01:35:57:18 CARTER (O/S): It might work...

01:35:58:23 CARTER (CONT'D): But at this depth, the heat and the noxious gases would
penetrate even a Tok'ra tunnel. It would be suicide.

01:36:05:05 KIANNA: I will go.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:36:09:20 KIANNA: Do not worry, Major Carter. I may be intrigued by your willingness to
 sacrifice yourself for others, but I do not share it. My symbiote will protect
 me.

01:36:21:27 CARTER: Why take the risk?

01:36:23:25 KIANNA: You still think of me as nothing but a servant of Baal. You are mistaken.

01:36:29:28 JONAS: You haven't told him about the Naquadria?

01:36:32:06 KIANNA: Not yet.

01:36:34:01 CARTER: You want it for yourself.

01:36:40:24 KIANNA: In any case, the fact remains I am the only one who can complete this
 mission.

01:36:51:12 TEAL'C: The tunnel is complete.

01:37:00:19 CARTER: Are you sure you understand the detonation procedure?

01:37:02:28 KIANNA: Of course. It is a simple enough device.

01:37:53:22 KIANNA (INTO COMM): I am in position. I am setting...

01:38:07:09 KIANNA (CONT'D): The detonator.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:38:16:07 (ALARM SOUNDING)

01:38:24:11 CARTER: Oh, this is not good.

01:38:28:25 CARTER (V/O OVER COMM): Kianna, this is Major Carter. Do you read?

01:38:36:03 KIANNA (INTO COMM): Go ahead.

01:38:38:21 CARTER (INTO COMM): We're losing power. I think the generators have been
damaged.

01:38:41:21 KIANNA (INTO COMM): I was afraid of that. How much power do you have left?

01:38:46:22 CARTER (INTO COMM): We're down to 70%.

01:38:50:05 KIANNA: So much for my empire.

01:38:56:25 CARTER (V/O OVER COMM): Say again?

01:39:00:04 KIANNA (INTO COMM): If you begin...your ascent now...

01:39:06:21 KIANNA (V/O OVER COMM): You may have enough...

01:39:06:21 KIANNA (V/O CONT'D): Power to reach the surface.

01:39:09:11 CARTER (INTO COMM): We're not leaving you behind.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:39:12:05 KIANNA (V/O OVER COMM): You have no choice.

01:39:13:23 KIANNA (CONT'D): If the power drops...below 50%...

01:39:18:05 KIANNA (CONT'D V/O OVER COMM): You will not even be able to restart the
 engines.

01:39:23:25 KIANNA (V/O CONT'D): I am already dead.

01:39:26:18 KIANNA (CONT'D INTO COMM): If you wait, you die too.

01:39:30:26 JONAS (INTO COMM): This is Jonas. There's still time left. Start back
 immediately.

01:39:37:01 KIANNA (INTO COMM): If you are doing this...out of concern for the host...you
 need not bother.

01:39:45:01 KIANNA (CONT'D): The body...is already...severely damaged. Even if...we make
 it back...

01:39:56:05 KIANNA (CONT'D V/O OVER COMM): I may not be able to keep her alive.

01:39:59:21 JONAS (INTO COMM): Listen to me. We're not going without you, so shut up, and
 get moving.

01:40:25:26 DREYLOCK: We should have heard by now.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:40:34:13 TARTHUS: Something went wrong.

01:40:41:19 CARTER: Power's down to 53%. She's taking twice as long to get back as she
 took to get down there.

01:40:48:24 JONAS (INTO COMM): Kianna, this is Jonas.

01:40:52:09 JONAS (CONT'D O/S): Come in, over.

01:40:54:17 JONAS (CONT'D): Please respond.

01:40:59:03 TEAL'C (O/S): I believe we have no choice but to...

01:40:02:00 TEAL'C (CONT'D): But to begin our ascent immediately.

01:41:05:17 (BANGING ON HATCH)

01:41:27:27 JONAS: I'll take care of her.

01:41:28:28 JONAS (CONT'D O/S): Get us out of here.

01:41:34:20 CARTER: Powering up engines.

01:41:37:12 TEAL'C: Beginning ascent.

01:41:43:05 KIANNA: You waited.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:41:46:28 JONAS: You held up your end of the bargain.

01:41:49:12 KIANNA: Was that your only reason?

01:41:54:22 KIANNA (CONT'D): I already know your answer.

01:42:09:27 LOUDSPEAKER (V/O): Unscheduled off world activation.

01:42:24:24 TECHNICIAN: We're receiving a signal, Sir, audio only.

01:42:26:24 HAMMOND (O/S): Put it through.

01:42:27:24 KELOWNAN (V/O): This is Kelowna Gate Control to First Minister Dreylock.

01:42:30:01 DREYLOCK: This is Dreylock, go ahead.

01:42:31:13 KELOWNAN (V/O): We're receiving reports from all over the country, a major seismic disturbance.

01:42:35:01 KELOWNAN (V/O CONT'D): Geological survey places the epicenter at the target coordinates.

01:42:38:11 EREMAL: They did it.

01:42:39:15 DREYLOCK: Any word from the excavator?

01:42:41:01 KELOWNAN (V/O): Negative.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:42:43:06 TEAL'C: Power reserves are near depletion.

01:42:48:07 CARTER: We're almost there.

01:42:49:07 CARTER (CONT'D O/S): 10 seconds.

01:42:53:12 CARTER: Five seconds, four, three, two, one.

01:43:23:17 DANIEL: You miss it?

01:43:27:08 JONAS: Yeah, I do.

01:43:32:29 DANIEL: Well, judging from what you've got to deal with back on Kelowna, I'm not surprised. I mean, I'd take life-threatening danger over one of those council meetings any day of the week.

01:43:40:15 JONAS: Yeah. I tell you, I don't know what Jack said to them, but they are being a little more cooperative.

01:43:47:09 DANIEL: Well, let's hope it lasts.

01:43:52:04 JONAS: How are you feeling?

01:43:54:27 KIANNA: I'm fine, I guess. I remember everything, but it's like a dream.

01:44:00:12 CARTER: The symbiote's dead.

STARGATE SG 1G -- "FALLOUT" -- Production #257

01:44:02:06 KIANNA: She saved me. She could have let me die with her, but she didn't.

01:44:08:14 KIANNA (CONT'D): I know you may find this hard to believe, but she appreciated
 everything you did for her...what you tried to do.

01:44:20:20 JONAS: Time to go...

01:44:25:22 JONAS (CONT'D O/S): Home.
